RESTORATION OF RECIPROCITY.

Ex-Senator Warner Miller of New York, in his address to the convention of republican league clubs at Cleveland, said that the republican party

proposed to restore the reciprocity policy and to enlarge and widen it. If the republican party is given control of the government next year undoubtedly one of its earliest acts will be to pro of our commerce by means of reciprocal trade arrangements, and it is not to be doubted that it could do nothing more popular. The abandonment of reciprocity by the democratic party has caused a material loss to the business of the country. It has cut off a profitable trade with Cuba, has injured our

business with Brazil and has hurt us commercially in Central America. A recent report from Brazil stated that the merchants of that country preferred to trade with the United States, but the fact of England having the facilities of transportation gave that country a very

decided advantage. This is the case, but with reciprocity the United States had at least a partial offset. It is undoubtedly a fact that the merchants of

The trouble with the league leaders was that they busied their minds too much with the thought of what would help or injure the party and too little with the thought of what was right. As a consequence, the party probably would be better off if the convention never had been held. The great mass of these delegates were sound money men. There was never a doubt that they could have carried almost any kind of a sound money resolution by an overwhelming majority. That was proved in the selection of a secretary.

The conviction of Captain Howgate will undoubtedly surprise a great many citizens who thought that there would be through of evidence a total failure to reach satisfactory conclusion in this celebrated case. The finding of the jury teaches a case. The finding of the jury teaches a lesson. It indicates that guilt may be pun-ished even after the lapse of years in which evidence may disappear naturally or be de-stroyed, and even after successful flight from the hands of the law, with the semi-approval of officials who, in the present case, it is generally believed, knew of the whereabouts of the fugitive during a greater part of his self-imposed isolation from the scenes of his former popularity and for some reason concealed him from justice. Captain Howgate's conviction under all the circumstances should serve as a warning to any government official

who may be tempted to think lightly of his duties to the people while entrusted with large sums of money and grave responsibil-ities. His acquittal, after the confession involved in flight, would have just the oppo-site effect in its tendency to demoralize the public service.
