

DREXEL SHOE CO.'S SALE

Shoeling Every Boy and Every Boy's Father, Mother, Brother and Sister.

IT'S TIME TO TAN THE KIDS

Our Great Clearing-Up Sale of Summer Tans Made More Interesting by Adding a Choice Lot of Boys' Shoes to the List.

We must sell the tans. We can't help it. There's no way to prevent it now. Every pair of tan shoes in the store is marked down to a price beyond all thoughts of a refusal to buy.

Saturday we make a special effort to please the boys and have marked them to FOUR LITTLE PRICES—\$1.00, \$1.45, \$1.75, \$2.50.

All the youths' \$2.99 tan lace shoes will be \$1.00. The \$2.50 kind are \$1.45. Boys' tan lace shoes that were \$2.50 are cut to \$1.75.

The \$2.50 kind, the best ever made, will be \$2.50. We want to see every boy in Omaha at our store Saturday—or his mother. I'll do you good to see a real genuine cut in price, whether you care to buy or not.

Ladies' la Juliettes and light shade Princes Alberta, some narrow square, some square, some opera toe, some hand turned, all very stylish, none worth less than \$2.50 and most of them worth \$4.00. June clearance price \$1.45.

Ladies' \$2.50 black and tan oxfords, 98c. Ladies' \$2.50 tan oxfords, \$2.00. Men's \$2.00 low shoes go at \$1.25.

Men's small sizes, 5, 5½, 6, 6½, in all colors and shapes of \$4.00, \$5.00 and \$6.00 tans, go at \$2.00.

Men's \$4.00 and \$5.00 Russian leather and patent leather shoes cut down to \$2.50. All of Hanan & Son's tan button shoes, always \$5.00, go for \$4.00.

All these \$7.00 light brown, cloth tip, button shoes for men and boys, worth \$7.00, makers' price didn't seem to suit. We've changed it to \$4.00.

We are taking extraordinary measures to make this June clearing a success. We haven't cut the price on just a few pairs, but on every pair—some of them cut so low that the makers would buy them, if they knew it. We'll sell to anybody—wholesale, makers or dealers—on a pair a case. To get rid of the tans is our object.

"If the shoe fits you, put it on;" if it don't, bring it back. Strange to say, our customers hold their jobs by giving their customers fits.

DREXEL SHOE CO. Tan shoes for all, 1419 Farnam St. Great tumbling race Courtland next week.

BARBER BILLS SHOULD BE PAID

Board of Public Works Reports on Disputed Claims of the Paving People. In its long controversy with the old Board of Public Works and ever since with the city over a claim for street repair work done in 1891 the Barber Asphalt company has now secured the favor of the present Board of Public Works.

Acting under a suggestion of the city council that it consider the dispute and recommended a settlement on an equitable basis, the board yesterday, after considering the matter for a week, drew up a report, which will be submitted to the city council at its next regular meeting, recommending that the claim, \$13,292.51, be paid. It is stated that the difficulty over the matter arose chiefly from the emphy of P. W. Birkhauser, former chairman of the board, toward C. W. Squires, representing the company and having at that time the contract for sweeping the streets. As to the conflicting statements of Birkhauser and J. W. Creighton, delegated by the board to superintend the work, the present board declares that it feels justified in taking the statements of Creighton as correct.

The report also states that the board has a bill of \$9,152.92 for repairs in 1894. The board recommends that this also be paid, less deductions on account of manifestly erroneous measurements aggregating \$2,435.47, making the total amount recommended to be paid \$19,915.56.

Bids were opened for an enlargement of the main sewer on Chicago street and on Grace street from Twenty-second to Twenty-fourth street. The bids were referred for calculation to the city engineer, and the awards will probably be made Monday.

In the economy of the kitchen Dr. Price's Baking Powder is cheaper than any other powder, owing to its greater strength and purity.

ACQUIRED TURNER'S OFFER

Commissioners Secure a Strip Along Thirty-first Street for Park Purposes. The proposition of Curtis Turner to donate a strip of land between Farnam and Dodge on Thirty-first street to the city for park purposes was accepted by the park commissioners yesterday, with a string attached to it. Mr. Turner wants the board to devote thirty-five feet additional to the east road bordering on the lots which comprise numbers 13 to 24, inclusive, in block 1 of Summit Place addition. He also asks the board to reduce the taxes for 1895. The report of the committee on locations recommends an acceptance of the land, Turner to pay the taxes. No improvements are to be made for two years. Judge Lake took the position that "the place would not be large enough to set a table on," as he expressed it, and voted against it. Mr. Redfield said it would be as large as Jefferson square.

Surveyor House made a report of his work on the boulevard, between Elmwood and Fontanelle parks, and agreed to hold all papers relating to the survey on file in the county surveyor's office for reference. The fact was mentioned that the artisan wall at Riverfront park is 248 feet, and that new apparatus is being placed for going deeper.

The salary sheet, in the sum of \$1,755.82, together with bills amounting to \$480.16, were recommended to the city council for payment.

Allen's Hygienic Fluid has been found a positive preventive of scarlet and typhoid fevers, diphtheria, smallpox and other contagious diseases. Mothers should atomize their children's throats and nasal organs with it morning and evening.

Are You Going to Colorado for the Summer? July 5th to 8th the Chicago, Rock Island & Pacific Ry. will sell round trip tickets to Denver, Colorado Springs and Pueblo at \$19.00 for the round trip, good for return passage till Sept. 1st. Teachers attending the famous summer school at Colorado Springs, and any one who contemplates a trip to Colorado, should remember that the Rock Island is the ONLY LINE running THROUGH CHAIRS and sleeping cars from Omaha to Colorado Springs WITHOUT CHANGE. HAYDEN BROS. Look out for the great tumbling race.

DIGGING INTO THE ROADBED.

Still Taking Testimony in the Van Court Faving Contract. E. D. Van Court and his lawyers are engaged in a conflict with the county commissioners over the settlement of the macadam paving controversy, which is now before a board of arbitrators. The taking of testimony, which has been in progress for some days, was resumed yesterday.

County Surveyor House was placed upon the stand by the commissioners, and asked to explain the plans and specifications which he drew for the construction of the Dodge street road. The attorney for Van Court made an effort to show that the plans and specifications were hypothetical and that Van Court could not be held for the shortage of 1 7-10 inches of wearing surface of macadam, which is the count claimed by the commissioners set up among other things in opposing the \$10,000 claim.

The first point of attack made by Van Court related to the original contract, in which it is stated that the foundation earth on which the road is to be built must conform in contour and elevation to the original ground surface. The pavement is made convex, as to its surface. The specifications then state that the macadam wearing surface must be ten inches in depth at center and eight inches either side. Van Court claimed that he was required by Mr. House's specifications to pack two extra inches of stone on the surface of the road and still not raise it so that it would be above the contour of the earth foundation. When this point was brought out it created a great deal of discussion, but Mr. House rejoined that the objection was merely technical. He afterwards explained that the specifications were drawn to cover four different classes of roads—granite, asphaltum, brick and macadam—that it is also providing for the special case of the road bed was to conform to the stake set by the engineer and consequently that the roadbed for the macadam would have to be slightly different from the granite roads to accommodate the extra stone. "But this," he said, "would be scarcely noticeable to the eye. He said that the attempt of the attorneys to make anything out of the road and still not raise it so that it would be above the contour of the earth foundation. When this point was brought out it created a great deal of discussion, but Mr. House rejoined that the objection was merely technical. He afterwards explained that the specifications were drawn to cover four different classes of roads—granite, asphaltum, brick and macadam—that it is also providing for the special case of the road bed was to conform to the stake set by the engineer and consequently that the roadbed for the macadam would have to be slightly different from the granite roads to accommodate the extra stone. "But this," he said, "would be scarcely noticeable to the eye. He said that the attempt of the attorneys to make anything out of the road and still not raise it so that it would be above the contour of the earth foundation. When this point was brought out it created a great deal of discussion, but Mr. House rejoined that the objection was merely technical. He afterwards explained that the specifications were drawn to cover four different classes of roads—granite, asphaltum, brick and macadam—that it is also providing for the special case of the road bed was to conform to the stake set by the engineer and consequently that the roadbed for the macadam would have to be slightly different from the granite roads to accommodate the extra stone. "But this," he said, "would be scarcely noticeable to the eye.
