ADVERTISING RATES: First position, \$1.00 per line per week; Second position, \$0.75 per line per week.

STAYMENT OF CIRCULATION: The Omaha Daily Bee, for the month of May, 1895, was as follows:

Table with 2 columns: Category (Total, Paid, Unpaid) and Amount.

It is plain that the Tammany string on President Cleveland has never been severed.

Now for a short spell of good dry warm weather to make our promised corn crop doubly sure.

The report of the State Relief Commission was promised for not later than July 1. Isn't it almost overdue?

It is apparent that President Cleveland has not lost the art of writing letters without committing himself on any subject.

Those settlers who moved out of Nebraska on account of the drought scare of last year are already regretting their hasty action.

The prohibition state convention had to beg its nominee for judge of the supreme court to accept a nomination.

When it comes to getting up good old-fashioned rousing Fourth of July celebrations the average Nebraska town will hold her own with the best of them.

Think of Chicago contributing the new head of the weather bureau under the Department of Agriculture! New York may as well recognize her relegation to a back seat hereafter.

Senator Hill thinks all the H's in what we are here are due to the spirit of socialism which is abroad in the land.

Governor Holcomb's notice to the state auditor until it be shown that all the property recently appraised is intact and in possession of the state was a most timely document.

Mosher says that his penitentiary contract was worth "nil" when he gave up attending to it personally.

The men who were howling loudest for police reorganization during the late legislative session and for whom police reorganization couldn't come soon enough do not seem to be pleased now that their wishes have been complied with.

Reports of mortgages filed and released continue to make a favorable showing in a majority of counties that have reported recently.

Members of the police force may soon realize the fact that it is in all respects unprofitable to mix politics with official duty and to engage in attempts to undermine their superior officers.

Perhaps the newly elected secretaries of the State Board of Transportation might, if they were so inclined, accomplish something in the way of reorganizing and improving the wretched train service which all Nebraska cities have been compelled to endure for two years and more past.

The Chicago Times-Herald wants the successor to the late speaker of the Illinois house to be selected from the group of capable and unprejudiced representatives who have remained detached from corporatist schemes at Springfield.

Governor Holcomb in his letter to the State Board of Public Lands and Buildings intimates that in his opinion it is the warden who is to have control of the state's prison.

There is some ground for thinking that the administration, conscious of the weakness of the democratic party upon all questions of domestic policy, is disposed to divert popular attention from the mistakes and the proved incapacity of the party by inaugurating an aggressive foreign policy, particularly with regard to Great Britain.

MAKING PROGRESS.

There is no question that the cause of sound money is making steady progress. The resumption of industrial activity, the demand for labor at increased wages, and the improvement in prices are conditions operating to show the fallacy of the free silver contentions.

The sound money movement is steadily declining. The action of the Kenney democratic convention has had, as was expected, a most excellent effect in this direction.

The declaration of the democrats of that state against free silver, after one of the most vigorous contests ever made on any question, was a trumpet blast for a sound currency that was heard in every state of the south with telling effect.

Now, I have never sneaked behind a screen to dodge an issue and have never shirked a responsibility. All my political acts and utterances concerning public men and measures have been public property.

One of the two principal speakers at the Tammany celebration on the Fourth was ex-Governor Campbell of Ohio, who may again be the democratic candidate for the governorship of that state this year.

My editorial rival asks, Why did Rosewater support those A. P. A's if he is sincere in his present opposition? First, because it was my honest conviction that a general cleaning out of the court house and city hall was essential to the public welfare.

Let the now ask, Where was the World-Herald in the campaign of 1892? If it had any convictions on A. P. A's, why did it not make them known? As a pretended democrat it organizes its dirty and opportunistic ways to make the fight open and level the political drab and bartered with the worst element of the A. P. A. order, which like driftwood and seaweed, always floats on the surface.

There is an interesting piece of political gossip floating around to the effect that Senator Allison's visit to New York a short time ago was not with any real intention of visiting the Harriss and McKinley were making speeches and attending social dinners and making graceful replies to the press.

membered that a short time ago Mr. Don Dickinson, postmaster general in Mr. Cleveland's first administration and a close friend of the president, in a public address made a vigorous attack upon the agrarianizing policy of the British government.

What does this mean? Is the city to continue indefinitely to act as a bad debt collecting agency for Mr. Buller's bondsmen?

Our amiable contemporary, the W-H, never misses an opportunity to cast a slur upon Mayor Bemis. His latest malicious thing is inspired by the refusal of the council to confirm a successor to William Wallace as director of the Omaha public library.

Ever since Secretary Morton entered the cabinet he has advocated certain reforms in the weather service. Prof. W. J. Moore, the new chief of the bureau, it is said, has outlined a vigorous policy and will concentrate the work of the bureau on weather forecasting.

Who Cares for Principle? Washington, July 5.—By the nomination of a free silver candidate and the adoption of an anti-silver platform by the Kentucky democrats, simply give official publicity to the fact that it is the offices only the free silver people are after.

Incident of the Horse. Kansas City, Mo.—The prices of thoroughbred racers, as of all other kinds of horses, have fallen mightily in the last year or two, and sales in New York of runners have been failures.

Need of Political Disinfection. Kansas City, Mo.—To the municipal authorities in Denver and Omaha has been added an exposure of the corruption of the municipal judge of Portland, Ore.

Keep an Eye on Allison. St. Paul, Minn.—News indications of prosperity in the increase in the demand for small coins. In the first five months of this year the silver coinage minted to meet the demand have exceeded by \$19,000 the amount minted of this denomination during the whole of 1894.

Go-Bullion! Exposed. The biography of James G. Blaine by Gail Hamilton, which has just been published, contains a letter from Garfield dated January 17, 1881, in which occurs the following suggestive passage.

OTHER LANDS THAN OURS.

All efforts to ally the dangerous irritation and jealousy between Norway and Sweden have been unavailing, and unless a compromise of some kind is soon reached, an armed collision is among the possibilities.

Signor Crispi achieved a signal triumph in the recent Parliamentary elections in Italy. But there are no indications of serious trouble.

It looks as though Foreign Minister Hanotaux was guilty of an attempt to fool the French people and the world, when he spoke in the Chamber of Deputies of the alliance between Russia and France.

The new Austrian premier, Count Klemensauer, is described as one of the ablest and most energetic officials in the country.

COMPLETED AHEAD OF TIME.

Work on the Eleventh Census is Now Practically Finished. PRINTING IS ALSO WELL ADVANCED. Published Report of the Great Work Will Require Twenty-Five Volumes—Advocates a Permanent Bureau.

WASHINGTON, July 5.—Dismissing the prospect of concluding the work of the eleventh census, Superintendent Wright today said that there still remained only one table to complete, the deductions to be drawn therefrom and when this is finished the work of the census bureau on this census would be finished.

SECRETARIES FAVOR THE TRANSFER. TALKING OF PLACING THE COAST SURVEY UNDER THE NAVY DEPARTMENT. WASHINGTON, July 5.—The recent change in the coast and geodetic survey has again called attention to the feasibility of bringing the coast survey portion of this bureau under the Navy department.

It looks as though Foreign Minister Hanotaux was guilty of an attempt to fool the French people and the world, when he spoke in the Chamber of Deputies of the alliance between Russia and France.

The new Austrian premier, Count Klemensauer, is described as one of the ablest and most energetic officials in the country.
