COMMERCIAL AND FINANCIAL

All the Principal Articles Dealt in on the Board Closed Lower.

SHOWED MUCH FIRMNESS

Being Dominated by the Slack-Provisions Were Dull, the Market ness of the Cash Demand-Stocks and Bonds.

CHICAGO, July 20.-All of the principal articles dealt in on the Board of Trade were easy today and closed lower. Weak cables were the principal influence in wheat, which shows a loss of Mc; corn is off Mc in spite of threatened frost; onts like amount; pork, 4216c, in sympathy with the lower prices for hogs and on light demand for products. Lard shows a decline of 10c

and ribs of 12%c.

Lower quotations from Liverpool, in the face of yesterday's strength here and what appeared to be heavy receipts at Duluth, gave the wheat market a very weak start. The decline of he at the opening in Liverpool was said to be due to a disappointing demand for spot wheat. The receipts at Duluth were largely comprised of wheat sold at Minneapolis to go east via the lake port, and of 345 cars reported at Duluth this morning 256 cars were from Minneapolis. That explanation did not have any offect, however, in arresting the decline or changing the bearishness with which the crowd commenced. Nothing occurred to face of yesterday's strength here and what crowd commenced. Nothing occurred to disturb the screnity of the short sellers until a synopsis of the Orange Judd Farmer's crop report for the month was made public On the information afforded by that the on the information amount of the price of September recovered from around 70% to 71% although the quick advance at St. Louis about the same time was attributed to the recovery. According to the agricultural publication referred to, the average condition of spring wheat has been reduced six points this month. The falling off in South Dakota is seventeen points, in Washington, incteen points, in Minnesota, eight points, and North Dakota, five points. The average condition indicates a crop of about 165,000,000 hu, of which 123,000,000 hu, is credited to Minnesota and the Dakotas. The estimate of the Pacific coast crop is reduced from 70,000,000 to 10,000,000, and the total winter wheat is tentatively estimated at perhaps less than ten bu, per acre. It estimates the entire crop at 450,000,000 against 420,000,000 on July 1. The Atlantic port clearances were again disappointingly light, the wheat amounting to only 20,181 bu, and the flour to 13,285 bbis. Primary market receipts were rather heavy, but still very much below lost very more lost control of the control of th price of September recovered from around

light, the wheat amounting to only 20,181 bu, and the flour to 13,285 bbls. Primary market receipts were rather heavy, but still very much below last year's movements. The total received at western markets was 458,000 bu, against 1,229,000 bu, a year ago. The opening price for September was from 71%c to 71%c, and after its early tumble to 70%c and subsequent recovery to 71%c it kept within easy call of 71c. The trade was light and largely on local account.

The corn market ruled lower today, but showed a considerable amount of firmness at the decline. The cool weather prevailing raised visions of possible frost in the minds of the speculators, and that was the sustaining influence which prevented the present prospect of a crop of over 2,250,000 bu, as estimated by the Orange Judi Farmer, from causing more weakness. The local speculative feature was early selling of a rather aggressive character by Bartlett-Frazier & Co., fellowed by equally bold buying by Baldwin-Barnum and the Barret Bros. Speculation was on the whole light. Receipts for the day were 417 cars. Spot opened at 43c, dropped at once to 42%c, improved to 43c to 43%c, declined again to 42%c to 42%c, and at the close was worth 43c. May ranged from 35%c to 35%c to 35%c to 35%c to 35%c to 42%c and closed at 35%c bil.

Outs were dull and featureless. The market followed the course laid out by wheat and corn, and while doing so met with very few sales. The early market was more active than later on in the session. The demand for choice outs continued and was

and corn, and while doing so met with very few sales. The early market was more active than later on in the session. The demand for choice outs continued and was the principal feature of the market and influenced a higher price for July.

Provisions were dull, the market being deminated by the slackness of the cash demand, weakened by the lower prices for live hogs. A private estimate of the stocks of provisions shows remarkably little change for the month. It makes park stocks the same as on July 1, land 4000 tierces and ribs 2,000,000 lbs. less than a month ago. The opening prices were at respective reductions from yesterday's closing quotations in pork and lard and ribs of 17½c and 2½c. Pork declined another 10c in the forencon and another 15c near the close. ther lac near the close corn, 238 cars; oats, 108 cars; hogs, 12,000 head.

OMAHA LIVE STOCK MARKET

Receipts of Cattle Small but Quality Better Than Usual of Late.

133 EVERYTHING DESIRABLE SOLD EARLY

Hog Receipts the Largest of Any Day During the Month-lown Shippers Much in Evidence-Market Fell of to Cents.

TUESDAY, July 30. The receipts today were 1.600 cattle, 4,105 hogs and 440 sheep, as against 3,685 cattle. 400 hogs, no sheep and 35 horses yesterday. and 1,934 cattle, 3.100 hogs and no sheep on Tuesday of last week. The receipts for the two days of this week

cattle than have been seen here in a long a time. One bunch of prime beeves sold at \$5 in and some pretty good 1,220-1b. natives sold at \$4.65. The market was reasonably active and a little stronger. Everything desirable changed hands early in the day. There were about twenty loads of cows and helfers in the yards. There was a good demand and the offerings were soon cleaned but. It was a good, strong and active market. One load of good natives reached \$5 and quite a string of westerns sold at the same price.

same price.
Stockers and feeders were not in very Stockers and feeders were not in very large supply. The demand, however, was good and the offerings were soon cleaned up at about steady prices. Quite a string of westerns sold at \$3.50 to \$3.55. The good prospects for a large crop of corn have created a lively demand for good feeders, and there is more activity in the feeder division than any other part of the yards. Representative sales:

CHICAGO LIVE STOCK.

There Was a Fairly Active Demand for Cattle.
CHICAGO, July 20.—In cattle there was a fairly active demand for Tuesday and prices were strong for all desirable lots, fat native beeves ruling firm at yesterday's advance. Common to choice native steers averaging from 1,000 to 1,650 ibs. were salable at from \$3.40 to \$5.80, with sales largely at from \$4.50 to \$5.25, and extra choice lots were nominal, as none were offered. There was a very good cow trade at from \$1.75 while bulls went for from \$2 to \$3.50. Texas cattle showed no change, grassy to good fed steers meeting with a fair demand at from \$3.25. The receipts for the two days of this week are 5,337 cattle, 4,561 hogs and 440 sheep, as against 4,910 cattle, 5,095 hogs and 373 sheep Monday and Tuesday of last week.

One year ago today the receipts of hogs were 20,000,

CATTLE—The receipts of cattle were not large, there being less than half the number here yesterday and 300 head less than were received on Tuesday of last week. Of the sixty-one loads here today thirteen were cannot have been seen here in a long than the average of late. There were better cattle than have been seen here in a long time. One bunch of prime beeves soid at \$5 and some pretty good 1,220-th. natives sold at \$4.65. The market was reasonably active and a little stronger. Everything desirable changed hands early in the day. There were about twenty loads of cows.

rolling somewhat, although not suffering any material damage. Reports by countles any material damage. Reports by counties:

SOUTHEASTERN SECTION.

Butter—Corn suffering for rain and cannot make more than half a crop. Wheat and oats mostly harvested and in good condition. Pastures drying up and wells going dry.

Cass—Wheat yielding ten to fitteen bushels. Oats thirty to fifty. Corn in excellent condition. Clay—Harvest about completed and threshing commenced. Grain turning out better than was expected. Corn growing fairly. Rain needed.

Fillmore—Nearly all of our early corn damaged, some past help. Late corn in fair condition.

Gage—Most of the corn is beyond redemption. tion.

Gage-Most of the corn is beyond redemption.

Threshing mostly done. Wheat averaging from two to ten and outs from six to fifteen bushels ser acre.

Hamilton-Harvest about all dene and threshing segun. Yield better than was expected in all until grain. Rain needed, Corn never looked setter, Some of it will make a crop without any better. Some of it will make a crop without any more rain.

Jefferson—Corn in places looks quite well, but the southeastern part of the county is almost past redemption. Millet and corn look well. Plenty of home grown apples.

Johnson—Corn has not suffered much in the eastern part of the county. Tacre will be an average yield of wheat in the eastern part of the county. Potatoes a good crop. Pastuces in bad condition. the county. Potatoes a good crop. Pastures in are glutted.
Lancaster—Early corn past recovery. Harvest Dronth Prevails in Some Sections. Lancaster—carry corn past recovery. Harvest nearly over.

Nemaha—Early corn is slamaged at least half, Late corn is coming on well, but is damaged somewhat. Euckwheat is doing well.

Nuckoils—Corn is suffering from the severe heat and dry weather.

Otto—Oats being threshed and will make a seneral necrose of over forty bushels. Winter Pawnee-Potatoes dried up so that the crop of late ones will be very poor. Garden truck male

boddy.

Pawnes—Potatoes dried up so that the crip of late ones will be very poor. Garden truck making little growth.

Polk—Early corn has not suffered as the late. Pastures needing rain. Oats in eastern part of county unusually good.

Richardson—Early corn considerably injured. Oats yielding forty-five to fifty-live bushels per acre. Wheat fifteen to thirty. Pastures and mendows tasily dried up.

Saline—Most corn badly damuged. Some oats tirreshed yield ten to twenty-live bushels peacre. Finx three to five; wheat three to six. Not much hay. All spring sown alfalfa dried up. Saunders—Corn needs rain, but is not suffering. Oats turning out well. Pastures and meadows getting dry.

Sward—Corn badly hurt. Threshing in progress. Wheat yielding five to ten bushels be acre, poor in quality. Oats also a poor quality. Thayer—A dry, hot week has runned early corn and badly damaged late corn. Some have threshed and many will not get back their seed.

York—Late corn needs rain very much. Oats about harvested. Pastures getting short. NORTHEASTERN SECTION. Antelope—Most small grain cut and some brested. Too dry for corn and millet. Burt-Early corn is doing fairly, but late corn a very backward. Millet, where sown late, is

Cedar-Harvest nearly over. Corn folling some and needs rain.

Culfax-Early corn damaged by continued dry weather. Cars threshing begun and crop making about forty bushels per acre. Hay will be a very short crop.

Cuming-Wheat and cats nearly all cut. The yield will be large. Some oats as high as seven y bushels. Corn doing well, but it is getting dry and rain is needed.

Bodge-Cutting and stacking nearly done, and some three-ling. Wheat yielding from twenty to thirty bushels per acre. Corn nearly all tasselled out and needing rain.

Douglas-Temperature ten degrees below the normal and rainfall about half the average amount. out and needing rain.
Douglas—Temperature ten degrees below the normal and rainfall about half the average amount.

Both—Small grain harvest giving the best results for many years. Corn beginning to suffer from dry weather. Haying going on slowly. Hay on lowlands good, on uplands poor. Early corn tasselling and needs rain.

Knox—Field corn is doing nicely. Gardens holding their own. Hay is being put up as rapidly as possible.

Madison—Barley and oats promising fifty bushels per acre. Curn badly in need of rain, but is not yet first. Beets are doing well.

Pierce—Good weather for havesting and nearly done. Same frew have threshed and report a good yield. Some report as high as 100 bushels per acre, and sixty-five for barley.

Platte—Harvest nearly completed and some threshed, oats yielding from forty to eighty bushels; flax ten. Early corn needing rain Sugar beets and potatoes line.

Sarpy—Rain needed badly in western portion, where corn is firing some. Center of county is in excellent condition. Oats, wheat and grass in good condition.

Stanton—Harvest about completed and some threshing done, nearly all grain yielding better than was expected. Corn in tassel and in good condition.

Washington—Corn somewhat damaged; oats yielding sixty to eighty-five bushels to the acre.

Wayne—Harvest about done. Wheat premises about twenty bushels per acre. Cats fifty 1.

Seventy-five and quality good, Quality of weat not very good. Sugar beets doing well. Corn beginning to need rain. Lale potatoes doing well. Sioux City, in.—Harvest well under way an all crops excellent. Hay a heavy crop and of excellent quality.

Yankton, S. D.—The week has been very favorable for harvesting and practically all the small grain is cut. Both wheat and oats are of fine quality and a large yield. Hency thunder storms the last week, with some hall, but no damage reported.

CENTRAL SECTION.

Boone—Corn. affalfa, millet and polatoes nesting rain. Still corn is not rolling. Small grain is cut. Both wheat and oats are of fine quality and a large yiel

CENTRAL SECTION.

Boone—Corn, sifulfu, millet and potatoes needing rain. Still corn is not rolling. Small grain yielding better than was thought. Onto averaging forty bushels and barley sixty. Wheat statem to twenty.

Buffalo—Crop conditions favorable except that rain is needed for corn and pastures. Late outs now being cut. Apples a good crop; also the potatoes. Hay on the bottoms good; on the uplands light.

Dawson—Weather getting dry. Small grain being harvested and some floids will yield well. Corn looks well yet.

Greeley—Corn holding out remarkably well, but must have rain seem to save it? Most outstpening before the spring wheat,

Hall—Harvest about half done. Early corn earing well. Late corn doing well, but needing rain badly.

Howard—Fine weather for harvest, Rain badly hadiy.

Howard—Fine weather for harvest. Rain badly needed. Corn curling very badly.

Loup—Weather hot and dry. Wheat hadly dried up. Corn fast drying up. Pastures bare.

Merrick—Oats mostly harvested and a splendid crop. Potnices damaged. Corn now in fine condition. Rye a failure.

Sherman—Small grain nearly all cut. Corn at a standstill and weedy corn gone up.

Nance—Hot and dry. Small grain all cut. Oats a good crop. Corn standing the dry weather well.

Rainfall Uneven but Almost Normal, with

Temperature Favorable.

CORN GENERALLY DOING ITS BEST

Too Dry for Growth in Some Sections, but the State as a Whole Shows Promise of Large Yield.

Weekiy weather crop bulletin No. 17 of the Nebraska weather service, co-operating with the United States weather bureau, is sued from the central office at the University of Nebraska, Lincoln, under direction of G. D. Swezey, meteorologist of the Nebraska experiment station, for the week ending July 29, 1895:

Admins—Hot and dry, Corn never looked bets to Corn here were so that whether serving here were setting with growing finely. Corn tasselling and ears setting with Ground wet down litres of four feet. Cane, millet, buckwhest and lare corn milet of course, and the corn make the property of fund blast. Corn doing finely weather the corn litres of fund blast. Corn doing finely but many fields very weedly. Hay of all kinds coming on heavy. Pastures never were so gived. Postatoes excellent.

Hattan—Ground in fine condition. Postatoes a gived weekly Milled growing nicely.

In your—An ideal week for corn. Postatoes and property for corn. Pasture the deals of grain. Oas even good, but baily todged. To tatoes and can very promising. Hay and pastures above average.

Lincoln—Corn and small grain suffering for the least of the property of the tatoes and carn very promising. Hay and pas-tures above average.
Lincoln-Corn and small grain suffering for the lark of rain.

Perkins-Good week for corn. Lats wheat coming out well. Oats one-ture of a crop.

Red Willow-Ground their spily wet. Corn is becoming. Hay will be plenty.

Webster-Corn in some breakings doing well and in others needing rain budly, but no serious dam-ages yet. NORTHWESTERN SECTION.

Box Butte-Warm and dry. All small grain suffering for want of moteture.

Cherry-A hard week on crops. Late corn
buildy withed. Small grain ready to cuit. Severe
had stom on the 25th, affecting a marrow strip
of the county.

Cheyenne-Very dry and very warm. Wheat is
short. Oats are better. Corn doing well so far.
Dawes-Thieugh center of county cast and west
crops are fair; elsewhere very poor. Fotators
and sugar bests doing well. Harvest haif done.

Keith-Fine heal rains. Oat harvest begin;
will have a very light crop, except where irriment. Polators will make the largest or p ever
grown here. Corn doing finely; average height
about six feet.

Keya Paha-Corn is rolling some; some is insselling very short. Most milet suffering for rain.
Logan-Corn holding its color, but heeding rain,
Some wheat too short to bind. Pastures getting
very short. cory short. Scotts Bluff-Weather fine and all crops doing Secretary Countries of Sheridan Crops look well. Prospects of small

The week opened cool and rainy, followed during most of the remaining days by high temperature. The mean temperature for the week was nearly normal.

The rainfall has not generally been heavy over the state, although in limited localities it has been excessive, particularly in the scutheastern corner of the state. Over an area covering several counties in the northeastern section none at all fell.

The harvest is about completed in the ensiern part of the state. The yield of small grain in the northeastern section is phenomenal. Some oats have threshed out as high as eighty-five bushels to the acre and some barley as high as 109.

Corn has continued to suffer considerable damage during the week in the southeastern section of the state, where a third to a half of the crop is estimated to be injured beyond recovery, except in the river counties. In the southwestern section of the state three corn crop is generally in a very promising condition; in the northern portion it is now beginning to feel the need of rain and is rolling somewhat, although not suffering any material damage. Reports by counties:

**Reridan—Crops took weil. Prospects of small state in excellent.

**Too Much Rain in Some Sections.

**COLUMITIA, Mo., July 20.—The weekly crop teport says: Except in eastern sections the weather during the past week was much more favorable to the farmer than for some weeks and southwastern, east-rounded damp and showery and harvest and anyling have progressed very slowly; further damage has been done to grain in shock and corn and cotten are being injured in some localities by too much rain. Over the balance of the state threshing, stacking and haying have progressed rapidly under favorable conditions, and this work is now hearing condition; in the northeastern section is not provided to the farmer than for some weeks and have progressed very slowly; further damage has been damaged to a grain in shock and corn and very progressed repressively to some favorable to the farmer than for some weeks and such terms of th

corrally.

Finx is about all cut and is a good crop.

Hay has been considerably damaged by rain in some sections, but on the whole the crop is better than expected.

Sorghum, millet, tabacco, castor beans, late potatives and garden vegetables are generally doing well, and fruits continue in good condition, with the exception of grapes, which are still rotting bally in some localities. Rain Benefits Illinois Crops. CHICAGO, July 20,-Ill nois weather crop buile in or the week ending Monday, July 29: The genral and heavy showers of the past week, to-

for the week ending adomary, July 53. The general and heavy showers of the past week, to gether with temperature slightly below the normal, have proven highly beneficial to growing crops. Severe storms occurred along the Illinois giver and northwest counties on Friday, but while great damage was done it is not irreparable. The water famine has been generally relieved and springs, wells and streams are filling. Passures, late potatoes, gardene, millet and fodder crops are dolng well, and late potatoes promise a good yield. Corn has made marvelous growth and roasting cars are pientiful on early fields, with a large crop practically assured. Threshing of wheat, rye and outs has been retarded by the rains, and some damage has resulted by spreating and smut in the shock. Fall plowing is general in central and southern counties, with the ground fine and mellow. Fruit is exceedingly plentiful in all southern and contral counties, with fair crops in the northern. Trees are bending under the load of fruit and early markets are glutted.

Drouth Prevails in Some Sections.

WASHINGTON, July 30 .- The weather bureau ing July 29 says:

ing July 29 says:

Drouth continues in western Ohlo and is affecting crops unfavorably in portions of Pennsylvania. South Carolina, Georgia, southern Texas, Kansas and Nebraska. In southern Michigan drouth has been relieved, but in the northern part of the state the rainfall has been insufficient. The general outlook for corn is excellent, although unfavorable reports are received from portions of Nebraska and Kansas and it is reported as late in North Dakota. In Indiana, Illinois and lowa it is making rapid growth and caring. In lowa the best crop ever grown in that state is expected. In the southern states an unusually fine crop is now practically assured. The candition of cotton is probably less favorable than last week. Harvesting of spring wheat is advancing favorably in South Dakota and southern Minnessta.

Early Corn Out of Danger.

TOPEKA, July 30.—The weekly Kausas cropreport says:

The crop conditions centinue favorable in the
eastern division. Early planted corn is about
made but needs some rain to baish filling. Morerain is now needed for the late planting and for
pastures and meadows. Threshing is progressing
and fall plowing has begun.

Everything is in good shape over the middle
division, except in Washington Republic, Cloud,
Dickinson and portions of Ottawa and Morris,
where the rains have been few and light. In
the other counties favorable conditions are genorally reported.

The rains are proving of great value to the
western division and crops of all kinds are in
first-class condition. Harvest is now progressing
except where delayed by rains. Corn, broom
fire.

Crop Conditions Favorable in Iowa. DES MOINES, July 39.—The lowa weather rop bulletin says: crop bulletin says:

The average temperature of the past week was about normal. Nearly all sections of the state have had sufficient rainfall for present needs and considerable damage has been caused by severe local storms, accompanied by wind and hall. On the whole, however, the week has been highly favorable for the growing crops, and for harvesting and threshing the ripened small grain. The cars harvest is about completed and threshing is in progress, with many reports of spring wheat is in progress, and some early fields of thax are ready for harvest.

**Corn is steadily maintaining its lead and bids fair to break all previous records in the districts where rainfall has been ample. Potatoes and the minor crops are doing well.
