WAS HANDLING STOLEN HARNESS.

Officers Will Take Phillips Back to Aurora for Burglary.

Joe Phillips, who was arrested several days ago because he was selling a quantity of harness at a great discount, and it was suspected that he stole it, is likely to have much trou ble. Yesterday a farmer from Aurora, D. L. Toof, came to the city and identified nine sets of the harness as his property. Mr. Toof was accompanied by Sheriff A. J. Mc-Comaughey of Hamilton county, who will take Phillips to Aur ra this morning, where he will be charged with burglary.

A part of the harness stolen from Toof, which in all is worth \$175, was taken from his barn Wednesday night. On Friday night another visit was made to the barn and more This was too much for Toof

NO LICENSE FOR PASSENGERS.

Expressman Gordon Accused of Vio-lating a New Ordinance.

A warrant has been sworn out for the arrest of W. A. Gordon for the violation of the expressmen's ordinance. Gordon had a contract to carry the members of the German saengerbund last Sunday from the end of the street car line at Hanscom park to Ruser's park. The expressmen's license till lately, \$5 per year, has included the carrying of passengers. A short time ago the license for passenger service was increased as it was considered more responsible and Gordor was arrested under the new law, Gorden says that none of the expressmen pay any attention to the new law, and that it is simply a test case against him by other men in the same business because they were not fortunate enough to secure the job. The case will come up before the police judge this morning.

As two sets had been stolen from another farmer, named Ingalls, and three from an-other, Mike Pressler, Sheriff McComaughey, accompanied by several citizens, started on the trail. They followed the thief, who traveled in a spring wagon, as far as Grand Island. There they found the rig in a livery stable, but the bird had flown. The descrip-tion of the driver given by the liveryman answers the description of Phillips. There are a dozen residents in the neighborhood of Aurora who noticed the wagon and the driver and it is not expected there will be much difficulty in obtaining Phillips' conviction. These residents will swear that the box which was in the wagon is very like the onin which Phillips received the harness in this city. The value of all the harness which was stolen near Aurora is \$300.

Perfection in Cake Making,

Housekeepers frequently wonder why it is that they cannot make biscuit and cake that are light and palatable and that tasts as de-licious as the biscuit and cake made by their mothers and grandmothers, the delightful memory of which even to this day creates a sensation of pleasure to the paiate. The trouble arises from the highly adulterated state of the materials they have to work with, particularly the cream-of-tartar and soda used to raise or leaven the food. Cream-of-tartar and soda that are now procurable for domestic purposes contain large quanti-ties of lime, earth, alum and other adulter-ants, frequently from 5 to 25 per cent, and consequently vary so much in strength that no person can tell the exact quantity to use. or properly combine them, to insure perfect results. From using too much or too little, or because of the adulterants in them, bitter, salt, yellow, or heavy biscuits or cakes are frequently made. These adulterants are also lous to health.

All this trouble may be avoided by the use of the popular Royal Baking Powder, Where of the popular koyal making rowder, where this preparation is employed in the place of cream-of-tariar and soda, its perfect leaven-ing power always insures light, flaky, di-gestible biscuit, cakes and pastry, that are perfectly wholesome and free from the im-purities invariably present when the old rais-ing preparations are employed

purities invariably present when the old rais-ing preparations are employed. The Royal Baking Powder, we are in-formed by the most reliable scientists, is perfectly pure, being made from highly re-fined ingredients, carefully tested, and so exactly proportioned and combined that it never fails to produce the best and uniform results. An additional advantage in its em-ployment course from the fact that hread or ployment comes from the fact that bread or other food made with it may be eaten while hot without fear of indigestion or any unpleasant results, while being equally sweet, moist, and grateful to the palate when cold.
