CONDITION GETTING WORSE.

Word comes that the new British consul, Mr. Hampson, has gone up to Sassoun. The discharge of some political prisoners and later the dismissal of Bahri Pasha of Van have had a good effect, but the general condition of the country is geting worse. The Christians are having a hard time in har-vest. They are in danger of their lives. It usual for them to remain in the fields during harvest. Now they dare not. The women usually carry food to the fields for the workers. Now they are atraid to do so. The other day, about two hours from here, a girl carrying food to the fields for the workand brutally treated. A row followed and or three Christians were wounded. At another village, nine hours from here, band of horsemen entered the village of Kpri Kepri and first went through the vil-lage in a riotous way and greatly terrified the people, demanding the girls and brides. Later they took rifles and went firing through the streets. The son of the priest opened the door with the idea of inducing them to leave by giving them money. He was shot down like a dog. They kept this up for about three hours. They broke down some doors and fired into the houses. The government has yet to take any steps in the mat-ter, though this company of lazes is well known. So it goes, a veritable refgn of

A portion of Labrador belongs to Canada and a portion to Newfoundiand, and the people of each country usually fish in the territory of the other without inter-ference. The present proceedings are doubt-less due to some hotheaded official. There is much excitement here and the government held a summary meeting to consider the situ-ation tonight.
