As usual, it is once more the harmonious democracy of New York with the harmony left out.

President Cleveland has another opportunity to display his ability as mediator between the warring factions of his party in his own state.

After doing everything he can to make other people avoid the Union Pacific and travel over the Southern Pacific road C. P. Huntington shows great condescension in himself using his pass over the Overland route.

Dr. Talmage is apparently tiring of being a preacher without a pulpit and is looking with favorable eyes upon a tempting call from Washington. Washington has some charms for people who are not professional politicians.

If the railroads can afford to haul anthracite for \$1 a ton for even a brief period they can afford to haul corn and other farm products at rates that will enable the farmers of the west to compete with other farmers and to get a living price for their crops.

The question is, Will the Texas authorities be as violently opposed to prize fights on the day the great contest is to occur as they profess to be now. Is ft not likely that their ardor to suppress pugilists will become less and less until it finally disappears just in time for the great event?

The nonpartisan idea as applied to a judge "means one who will faithfully all alike without feeling, bias or prejutemper his decisions favorable to that come this, especially as the party is

Collis P. Huntington swears that he has no intention of crippling the Union Pacific by diverting traffic from the connecting Central Pacific to his Southern Pacific. Mr. Huntington's deeds would be far preferable to his swearing. If he is really in earnest about his good will toward the Union Pacific, let him use his influence to restore the train facilities which were formerly accorded the public.

Local coal dealers complacently assure the people of this community that should the transportation charge on hard coal between Chicago and the river go down to 50 cents a ton the price to local consumers would not be reduced. The supply, they say, has long since been stored in their bins, and upon it the regular rate was paid. The dealers forget that when the rate was raised in midwinter the price to consumers was hoisted to \$11.50 a ton. It's a poor rule that won't work both ways.

Republican presidents have appointed democrats to the federal supreme court out of respect for that wholesome American sentiment which is opposed to a partisan judiciary. Look back over the line of district judges elevated to the bench by the electors of this judicial district. The men upon whom all parties centered are those who honored the office and the profession of law. And the men who have scandalized the bench and made hollow mockery of justice were the creatures of machine politics.

An enterprising member of the South Carolina constitutional convention proposes to create by the organic law a county board to pass on the qualifications of all applicants for marriage licenses and - TO refuse to grant them to parties not physically fitted to enter the married state. This is unique to say the least. But of what avail would it be if other states were to remain as they are, without regulation of this subject? If South Carolina should adopt the proposition she would soon see elopements from that state in numbers never dreamed of.

In addition to two large ironclads now building in England she is to have four battleships of the royal sovereign type, three cruisers of from ,000 to \$,000 tons, four cruisers of 4,000 tons, with a speed of twenty knots, and a number of smaller craft. When this program is carried out her fleet will comprise first class battleships, each more powerful than any vessel flying a foreign flag in east ern waters, together with a large squadron of magnificent cruisers.

SAN DIEGO, Sept. 25 - A. J. Condee, county clerk of San Diego county and a large land owner in the Las Andre mining district, accompanied by George H. Maxwe'l, a San Francisco attorney, has been in this city and vicinity for several days past for the purpose of arousing interest in the movement cure Joseph H. Choate of New York and other eminent lawyers to appear before the suprem court of the United States and uphold the decision given by Judge Ross in the Falbrook

ful. Members of the various irrigation dis-tricts of this county have subscribed and paid a considerable sum toward the fund and have appointed an executive committee, consisting of Captain J. H. Barbour, J. E. Boyl and Carlos Olvera to look after their interests. The committee has retained ex-Suprime Justice John D. Worls of this city to represent them in the legal contest at Washington.

On a tract of twelve acres on the water front it has a plant which cost \$300,000. Its foundry is the best on the coast, with the exception of the Union Iron works of San Francisco, and its ship building facilities are almost unequalled and are immediately to be largely increased. Financially the company is very strong.
