Barbarity in Madagasear Set Side by Side with Its Fawning on Russia -Probability of War Still Remote.

NEW YORK, Sept. 28.-(Special Teleing on Friday in the course of an atter-dinspeech at Ripon that he thinks the question. That is a much more doubtful from the Vatican to the Quirinal. matter. Lord Rosebery told Lord Salisbury in the House itself in 1888, while the sonservatives were in power, that the gravest charge against him was his failure to do anything toward reform of the upper cham-London paper, with a positive statement that not be a worse authority. The conservatives have not hitherto been in the hab't of con fiding their plans to their radical opponents. I know of no reason why they should do so now. Who are the conservative leaders who through this radical medium? They might be difficult to identify.

Lord Londonderry was vicercy of Ireland in the last conservative government. When Lord Sallsbury formed his present cabinet he invited his ex-viceroy to enter it as lord of the privy seal. Lord Londonderry demuch to the regret of his party friends, who think he has in him the stuff of a capable and judicious minister. He has since been mentioned as a probable ambassador to Paris on the retirement of Lord Dufferin. In such a post as that he would have, as he had in the Irish viceroyalty, the advantage of Lady Londonderry's social gifts and prestige, and the advantage is very great. High as is Lord Londonderry's position, however, he is hardly the man who would be chosen to announce a new departure on a political issue, which is perhaps the most momentous that can now be raised in

the English political world. BALISBURY THE SUPREME ORACLE. The subject is one on which one man can speak with authority and one only. The prime minister is the only possible mouthpiece of the ministry on this question. Not only because he is prime minister, but because he is Lord Salisbury. We never do justice to Lord Salisbury in America. We known in England, even to his opponents, as a man of strong convictions. One of the strongest of his convictions is a belief in the hereditary principle. The hereditary principle is, for many purposes, cut of date, but not in his view, as the basis of the constitu tion of the House of Lords. He clings to that. He may very probably do a great injury to his order and the chamber which be rightly regards as a bulwark against revolutionary legislation. It would be easy to give way if he considered expediency merely.

Looked at as a matter of principle his po sition is perfectly intelligible. The House of Lords is to him, and is, in fact, the one constitutional safeguard against the reckless inpovations of a radical majority when ther happens to be a radical majority in the House of Commons. Were it not for the House o Lords the majority of the moment might overturn the constitution or break up the empire during a single sitting. There is no supreme court with power to intervene, n reference to states, for there are no states no veto, no reference to the people, no means of securing a reference to the people save by the rejection of a bill by the House of Lords. If it be a great measure and the sense of the people be clearly declared at a general election the Lords accept the decision of the people and pass the bill. That is their admitted constitutional position and duty.

That, says Lord Salisbury, they have per formed as a hereditary body. Who knows what they would do if they were elective Who has ever suggested a workable system of election or any practical or practicable scheme for abolishing the hereditary character of this body and substituting some other? There is no pretense that any such scheme has been brought forward. Till it In view of the enermous influx of Americans has, says Lord Salisbury, I stand by things as they are. The present scheme is not perfeet, but it works well. If you add, and the general conservative conviction that it works well, Lord Salisbury's personal partiality for Cheer' company. The Kreuz Zeitung of Berlin has been publishing an alarmist article on the imminence of a Buropean war, and saying that the trumpet note which will summen the vast armies f the field will come, not from St. Petersburg. but from Paris; in other words, the deciding voice in hostilities is to be French, and not tradicts anything that is known and much at those places.

more that is believed of the true nature of the relations between France and Russia. Moreover, there is no occasion to believe in immediate war. We are in full autumn, w'n ter is near, and no ruler in his senses o really means will precipitate a winter campaign. The Kreuz Zeitung is a sober sort of paper, but these epidemics of war alarms break out in the most unexpected quarters.

BETWEEN POPE AND PREMIER. The friends of the pope and the friends of Signor Crispi have each been making a demonstration in favor of their hero, or supplying each, as it were, with a testimonial. Million of messages, says a papal organ published in Rome, have been sent to his hell ness and expressions of sympathy with him and of protest against the recent festivals in commemoration of Italian unity. Some of them were telegraphic, and the majority came probably by post. There are 8,000,000 of faithful Catholics in the United States alone but cable rates are high, and even postage is sometimes prohibitive. A million of mes-sages from all over the world is, nevertheless, a remarkable number. Remarkable in a less degree are the 40,000 signatures in Signor Crispi's album in response to the personal attacks on him. Neither his enemies nor his friends believe in the personal attacks. The Italian prime minister is an honorable man as well as a statesman of genuine genius. The same may be said of the pope, gram.)-Lord Londonderry is quoted as say- and the pity of it all is that between two tuch men, each representing vast political interests and genuine convictions, no modus House of Lords could be improved. Presumption of Anyone to Dare to Challenge Until Conditions Suit Great Britain's Peculiar Notions Bitterly Rebuked.

Copyrighted, 1895, by Press Publishing Company. LONDON, Sept. 28 .- (New York World lable-Special Telegram.)-The leading English yachtsmen express the curious conviction that Mr. Rose's challenge for the America's cup will eventually come to nothing. I have heard this said many times during the past week by men of authority in the yachting world, but being pressed for reasons none is given. Perhaps it has its only basis in the very widespreading feeling here that Mr. alterations, if for any." Mr. Hardy recently ber. The Royal Victoria Yacht club, to which Mr. Rose seems to have gained admission only very recently, as I do not committee all wrong and believes Valkyrie find his name in the last club list, is a very respectable organization and disputes with the Thames the second rank after the Royal Yacht squadron, but in the estimation of the British in general, as well as the yachting world, it is a very inferior one to it in social er technical position. It is at present, at least, considered quite impossible that Mr. Rose can be elected to membership this year or before next September. It is, in fact, the habit of the squadron to "pill" even an available candidate at several elections before final success, possibly as an exhibition of its exclusiveness. As already noted in this corre spondence, Mr. Clarke, the owner of Satanita. and Mr. Walker, owner of Atlsa, were unsuccessful candidates, even while their respective yachts were Britannia's foremost

The Daily Standard, which is more tory even than the Times, has a paragraph undoubtedly illustrating the general sentiment anent Mr. Rose's challenge, and note especially "Mr. Rose" as referring to one of the first London bankers, whose father was made baronet for conspicuous service to the empire: "The announcement that a Mr. C. There was every reason to hope that after the recent fiasco no Mitre opposes the measure, asserting that the British yachtsman would take a vessel across the Atlantic to challenge for the cup until conditions had been placed on a fair footing, the new and illegal deed of gift canceled. equitable rules and conditions laid down, and, railway and for improvements at the ports of above all, arrangements made for races to be sailed over a course far removed from any large town, and admitting of a fair trial of speed, uninterrupted and undisturbed. On this point it seemed that British vachtsmen were unanimous, and to say the least, it is extraordinary that a challenge should have been thus hastily dispatched by a gentleman whose name is little known in yachting ciron the Lucania this morning. At a farewell Lord Dunraven, a thorough sportsman and theater he said to your correspondent: "I yachtsmen. There is probably no cheaper racing yacht, and so long as yachts simply to represent British yachting in an international contest and a challenge is given under such circumstances as those now existing. the verdict of English yachtsmen on the affair will be all but unanimously hostile." This feeling may possibly end in the with-

drawal of Mr. Rose's challenge. STARTLED STAID LONDON. CHURCHILLS CAPTURE CASH. The engagement of the duke of Marlborough to Miss Consuelo Vanderbilt prominently directs attention to the fact that he is maintaining the record of the Churchill family unique even in the British aristocracy, for marrying money. The first marriage of the late duke was the only exception in two generations, but he atoned for this divergency from the rule by his second union with Lily Hammersley. (Copyrighted, 18%, by the Associated Press.) BERLIN, Sept. 28 .- Prince von Hohenlohe, the German imperial chancellor, has abandoned the attempt to secure a majority in the Reichstag through the aid of the centrist votes. The centrist party furnished ample proof last winter of being both irreconcilable and unreliable, and Prince Bismarck's advice on this point is said to have changed the opinion that Prince von Hohenlohe formerly held. Negotiations are now on foot between the factions of the conservative party M.
