Congressman Dolliver Whoops Her Up for Greene County Old-Thuers, JEFFERSON, In., Sept. 30 -(Special)-At the annual meeting of the old settlers of liver made a speech that greatly pleased the plenters. He said in part: "My ancestors bim the nomination for president next year. were among the hardy fifthermen and sailors One of the governor's intimate friends said along the rugged coast of Massachusetts. In today:

severe storm raged along the New England shore and several boats were beached on this point, the daily newspapers heralded the news ence with the democratic leaders in other in black headlines, 'Last night several schoon. states on their own responsibility. ers were landed on Dolliver's Neck,' and an

uncharitable democratic press has since been industriously using the statement for political effect. I have always folt a deep sympathy for the thrifty, conscientious people of New England along that rock-bound class, and am inclined to the opinion that the Almighty was unnecessarily economical in giving out coil. If the sturdy fathers who settled that region had known of Iowa New England would today be an unsettled wilderness. I will be truthful and admit that the reason I became a ctilizen of lowa was because twenty years ago, when bound for the far northwest, my money gave out at Fort Dodge and I never thought it necessary to go any further. I shudder to think of what might

have been, fighting crop failures for ten years, and really believe it would have been more exhausting than fighting matrimonial rumors the past summer, as I have done. "Talk about drouths: we don't know in Iowa what drouth is. Up in my town more

people have gone stark mad on rainmaking than any other place on earth. We actually paid two adventurers \$1.590 cold cash to experiment with a stove pipe and \$2 worth of sulphuric acid for a week, with the net re-sult that Greene and Calhoun counties on the west and south were blessed with fine show-ers, while we never saw a cloud. You will never find real drouth where wooded streams

are abundant. Work makes great people. Ohio people work makes great people. Only people have been great because they have had to ishor hard. Nowadays to get a western of-fice you must have a certificate showing yeurself to be an Ohican by birth; in fac they are actually running in Olio men for mayors in eastern cities. You will and that great business and professional men came from families who worked-they walked m, bag in hand, from the rural districts. "How well I remember my first speech in Jefferson; in fact almost my maiden effort It was a Fourth of July speech and when the committee saw me, vegetable specimen that I was, they took me for a newsboy and were going to ship me out of town. The speech seemed to please the people, however, and I may safely say my start in life was made right here in Jefferson, Greene county."

lungs, but the terrible drain and waste go on all over the body. The only way to get rid of consumption is to work on the blood, make it pure, rich and wholesome, build up the wasting tissues, put the body into condition for a fight with the dread disease. The cure of consumption is a fight-a fight between sound tissues and the encroaching germs of disease.

Dr. Pierce's Golden Medical Discovery fights on the right side. It drives the germs back, forces them out of the body. It will cure 98 per cent. of all cases of consumption if it is taken during the early stages of the disease. Its first action is to put the stomach, bowels, liver and kidneys into good working order. That makes digestion good and assimilation quick and thorough. It makes sound healthy flesh. That is half the battle. That makes the "Discovery" good for those who have not consumption, but who are lighter and less robust than

they ought to be. A large book of 160 pages, telling all about this wonderful medicine, will be mailed free on receipt of this notice and 6 cents to cover postage by WORLD'S DISPENSARY MEDICAL ASSOCIATION, No. 663 Main Street, Buffalo, N. Y.
