Meat Inspector Israel Frank was sus pended by a unanimous vote of the Board of Health yesterday forenoon pending the investigation of the charges of embezzlement which were preferred in police court by the assistant county attorney Tuesday. A majority of the members were at first vigorously opposed to this action, but when it came to a vote they were unwilling to go on record as voting for the retention of the inspector in service in the face of the serious charges which were pending against him.

The mayor called the board together in special session at 10 o'clock, and somewhat contrary to expectation all members were present. Mayor Bemis stated the object of the meeting and declared that the matter was too serious to be considered from a political standpoint. The most convincing evidence had been obtained that Frank and Poundmaster Spoerl had been systematically defrauding the city and the board could not refuse to suspend Frank until the charges were either controverted or sustained. Aside were either controverted or sustained. Aside from the evidence of the taxidermist who had skinned the dogs three men had watched the pound during the last half of July and the whole of August. No one of these men had known that there was any one else on the case and they had worked entirely independently of each other. Their reports had tailled exactly and showed that of the 385 dogs reported by Frank as drowned in August only 129 were actually drowned.

Gordon and Thomas declaimed against convicting a man before he was tried. They insisted that there was no evidence before

The mayor inquired whether the fact that Frank was at that time out on bail on a charge of embozzlement from the city was not sufficient to make it the duty of the board to suspend him until the investigation was concluded. That had always been the custom when city officials were accused of offenses, and this should be no exception to

On roll call all members voted for the motion except Gordon, and after the vote was announced, he asked and was given permission to change his vote from no to aye. None of the other inspectors have been designated to perform the duties of the meat inspector during his suspension. Commis-sioner Saville says that he will simply notify the council that Frank has been suspended and allow that body to take such action as It may think proper.

Board of Health Dismisses All Assistants and Inspectors.

The regular meeting of the Board of Health yesterday afternoon was brief but important from the standpoint of those who have been accustomed to draw salaries on its pay roll. On motion of Commissioner Saville, which was unanimously passed by the board, the whole force of inspectors was suspended indefinitely on account of the failure of the fund. This includes Dr. Towne, registrar of vital statistics, Milk Inspector Bruner, the four sanitary inspectors and Clerk Barker. Dr. Saville is the only salaried official re-maining, although Mr. Barker will remain in the office as the representative of the garbage contractor.

Preliminary to his motion Dr. Saville stated that there was a deficit in the health fund on October 1 of \$399. In view of the existing situation it was impossible to continue to do business and the only recourse was to suspend the whole force. The other members inclined to the same view and there

was no opposition to the plan.

Dr. Saville stated after the meeting that if the council had kept its agreement made at the beginning of the year they would have been able to pull through with a slight balance in the treasury. But he was tired of being criticised for work that was not done when the fault was with the council that refused to furnish the necessary funds to carry on the business of the department. He intended to submit a communication to the council detailing the situation and the action that had been taken by the board and let it take such action as it saw fit.

> PHILADELPHIA, Oct. 2 .- The United States armored cruiser Brooklyn was launched into the waters of the Delaware at Cramp's ship yard today. Miss Ida May Schieren, daughter of the mayor of the city from which the mammoth vessel takes its name, broke a bottle of American champagne on the cruiser's bow, and said: "I christen thee, Brook-

It was a fete day at Kensington, as all such occasions are, and when the gates of the big yard were thrown open to the public shortly before noot an immense crowd surged in to witness the baptism of the latest addition to the nation's fleet. On the christening stand was a distinguished party, the conspicuous figures of which were Assistant Secretary of the Navy McAdoo and Mayor received a letter from E. B. Swinging aloft the wine bottle, which was clothed with the stars and stripes, Miss Schieren crashed it against the steel bow and uttered the christening words. Then as the marine monster glided gracefully down the ways, the enthusiasm found vent. The crowds in the yard roared and screamed; the party on the christening stand waved hats and cheered, and the boats on the river let loose their ear-splitting whistles. Cramp.
The Brooklyn is regarded by naval experts

as a marvel in the art of marine architecture. She is classed as a steel-armored cruiser, having four eight-inch barbette turrets. Her cost exclusive of armament is \$2,986,000. The principal dimensions of the Brooklyn are: Length on the load water line, 400.50 feet; beam, extreme, 64.68 feet; draught, mean normal, twenty-four feet; displacement, normal, 9,271 tons; indicated horsepower, 16,000; speed in knots, per hour, twenty-four; total coal capacity, 1.753 tons; coal carried, nor-mal displacement, 900 tons. The same dimensions of the New York are, respectively, 380.65 feet, 64.10 feet, 23.35 feet, 8,200 tons, 0,000 tons, 1,290 tons, 750 tons. Speed, twenty-

The Brooklyn will have twin screws. There will be four engines, of the vertical triple expansion type, two on each shaft, in four poilers, placed in three compartments. Five of these are of the double ended type, and two of the single ended. The hull is of steel, sheathed with a double bottom and a close water tight subdivision, running to about twelve feet above he water line.

BATTERY OF THE SHIP. The ship's battery will consist of eight ight-inch breech loading rifles of thirty-five calibre, twelve five-inch breech loading rifles of the rapid fire type, twelve six-pounder rapid-fire guns, four one-pounder rapid-fire guns, and four machine guns. The eight-inch guns will be mounted in four barbette urrets, placed one forward and one aft or he center line, and one on either side of the vessel amidships. The guns in the turret on the center line are to have a train of 310 de-grees. Those in the side turrets can fire grees. Those in the side turrets can fire from right ahead to right astern, or train through an arc of 180 degrees each. This is all wrong, of course. One should feel for the wife of the modern Ananias, who, far from being a Saphbira, seems to be all a wife can be, and as truthful as she is innocent. She loves her husband, apparently; trusts him, at any rate, to an extent which renders deception an easy task so far as she is concerned. But there is little sympathy for her. It all goes to the intrepld Billings who emerges, by dint of calm and untroubled lying, from entanglements of his own creatriver for miles around were craft of every description, from local excursion boats to ing, the intricacy of which would appall a man of meaner endowments. He strolls amid the rapid and all but furious action of those whom he has embroiled, easy, grace-ful and unvexed by care puffing his cigar, ful and unvexed by care; puffing his cigar, reading his newspaper and looking in his cool white raiment like an iceberg in tropic seas; and his conscience only annoys him once, when he relapses into a momentary tenderness toward his wife. But one doubts whether that litle touch is added for other purpose than to round out the stupendous structure of deceit which he has fashioned. Tailored Apparel

Pay fancy prices for tailored clothes if you want to, but consult the clothing

Clothing stores-quite true-can't begin comparing clothes with a few tailor shops, but the majority of tailor (?) shops can't begin comparing their products with some clothing stores.

So much the better for a buyer who can judge.

Some men are easily fitted; some not; but that matters little to a concern like ours. What are our tailors here for?

Absurd, too, to think that the merchant tailor can monopolize the cloth of

Our Line of Suits from \$15 to \$21

Are of the identical cloth you'll find in all of the upper class tailor sheps-the identical patterns (if the latest).. The same suitings from the same mills, whether imported from the old world or made here, in the famous mills under the stars and stripes. Likely the lining is the same and the drapings just as good, or, perhaps, better. And it's \$5 for measure taking and \$5 for individual cutting; \$5 for the time spent in trying on a garment and \$5 toward the expense

The workmanship in our tailor-made stock is by all means as good as the average made by a tailor from \$30 to \$40.

Think \$20 is worth an investigation? It won't take but a little judgment on your part and the service on ours to prove it.

A Pleasant Dinner . .

Is one in which everything goes off smoothly and in good taste. The service is as much as the food. You can have perfection at a nominal expense by patronizing our china, glassware and crockery departments. We have just added to our stock some desirable patterns in 100-piece decorated Dinner Sets that will compare favorably with any \$25.00 Sets in the market. They are in semi-porcelain body, light as the French and in new shapes and decorations. To create a special interest in this department we offer these sets at the remarkable
