LONDON, Oct. 10 .- The Constantinople correspondent of the Standard says: The situa-tion is far from reassuring. While the An-mentans and some sections of the Christian population show less alarm, the Moslem element is in a state of effervescence which is causing the greatest anxiety at the palace. This fear will almost certainly bring about Armenian reforms, which there every reason to hope will be embodied, as published, before the end of the week.

The work of Clara Swain, the first woman physician who visited India, was highly com-mended. She was sent out by the society under whose auspices the present meetings remain on board the warship with twenty men, and, addressing the second officer in command, said: "If you can send back the boats in safety, do so.
