

Platte, and as far an Sidney. Superintendent May of the commission expects to send another carload of fish in December to the rivers and streams in the southern tier of counties. Nearly all of the northern streams of the state have already received attention from the commission, and the results obtained in most instances have been very gratifying. Where there have been planted spawn and small fry, a sharp watch has been main-tained against the fish pirates and fishermen who use seines. When a man has been violating the state fich laws he has been promptly arrested, jailed and heavily fined These arrests have proven an excellent ex-ample to those who are inclined to fish in the dark of the night, when all honest men should be in bed. Mr. May reports the hatcheries at South Bend in fine condition and the output larger this year than ever before.
