W. A. Belknap, Webster Street Depot. "When Dr. Shepard began treating me I had been pestered for about 10 years with a catarrh that did great damage to my head and stomach. The usual nose and throat symptoms of the disease were aggravated by a soreness through the head, making me feel that this part of the system was affected through and through. More or less mucus from the throat was swallowed, especially in sleep, and soon the stomach suffered from a sort of slow catarrhal infec-tion. Among the resulting symptoms were belching of gas, bloating and sourness. I had what the doctors called acid dyspepsia and constipation. My food seemed to lie on the stomach without proper digestion until fermentation and distress came on. "My course of treatment has brought me excellent results. The stomach trouble and constipation have been mastered, so that I enjoy a splendid appetite and digestion. The same good has been accomplished in handling the catarrhal affection of the head. So that I have no hesitation in en-dorsing strongly the doctors, who have been highly successful in my case."
