WOOL TRADE CONCENTRATING

Opening of the New York Exchange Marks a New Epoch.

IS A MENACE TO LONDON'S SUPREMACY

Regular Auction Sales Will Be Held and It is Hoped to Center the Trade in This Country at That Point.

NEW YORK, Dec. 1.—The Herald today says: The opening of the Wool exchange, whose handsome new building at Beach street and West Broadway is almost completed, is intended to make New York the wool market of the country and to revolutionize the wool trade in America.

But that is not all. It is asserted by those who are back of this scheme that its effect will be to drive the wool trade of Boston to this city in a body. Already many eastern merchants and traders have taken offices in the Wool exchange building.

They understand this. Some of my free silver friends practically admit the force of this logic, admit the country should pass to the silver basis and to silver money.

These are the arguments which are being advanced in support of the free coinage of silver. Why, according to the reports of the director of the mints, the annual output of the mints of the United States is about \$100,000,000.

THE OMAHA DAILY NEWS

SPEECH MADE BY JOHN L. WEBSTER

His Presentation of the Truths of Financial History—Free Silver Claims Disproved by Existing Facts.

John Webster of this city made the principal argument in opposition to the resolution favoring the free and unlimited coinage of silver.

"I think it unwise and extremely unfortunate that the majority of the committee felt it its duty to take any affirmative action in favor of the free and unlimited coinage of silver. The primary purpose of this congress is to condense into a reasonable shape our views upon such questions as affect the material development of the country west of the Mississippi river, questions which in a measure are local, of which irrigation, forestry and agriculture may serve as illustrations.

"The advocates of the free and unlimited coinage of silver, in their present ratio, with uniformity, assert that the financial disasters of the last three years are the result of the demonetization of silver. I cannot understand how they can say this, when the fact is that the gold standard was established in 1873, and that the demonetization of silver in 1873 struck down and wiped out of existence one-half the money of the country.

"The history of this country from 1873 to 1891 stands as proof that none of the present existing evils were the outgrowth of the act of demonetization of silver. The prosperity of this country has ever known a greater period than that which followed after the enactment of the law which should have brought them into existence.
