The ag-As usual at the opening of the congress, there is a disposition to awalt indications as a to the drift of federal legislation. The ag-stravation of the internal disorders in Tur-key and the possibilities of more serious phases growing out of the inevitable ad-vance of the second guardships of the powers has produced a cautious feeling, which is inducing some postpanement of operations in the European markets, with consequent dulbess; and this reacts some-what unfavorably upon the New York market. The continued firmness of the for-eign exchanges and the outflow of gold also discourage operations; although it is taken for granted that the government must borrow another 35,000 000 at no distant day, that element of the situation may be said to have been already discounted. There are the principal elements causing the cur-ted period reacter as tending to beget postponement than as producing any real distrust of values, and hence the changes in prices have been comparatively immaterial. Justify it. The Liverpool market only responded 4d per cental to the Chicano jump of ic per bin yesterday. A private cable-gram from Liverpool said: "Argentine circle prospects favorable, shipmants of wheat from Argentine for the week, 184.000 tu." and what perhaps influenced the cariy selers here as much as anything else was that the receipts at Minnapolis and Duluth were more than 300 carlonds in excess of these on the corresponding day of the year before. The rise which succeeded the opta-ing decline had also several good reasons to support it. The price barely touched 62% on the advance when some of the big bears jumped into the pit with clean trad-ing cars and soon had the selling side of these covery for file followed and the latest trading was at from files to suback to file. A recovery to file followed and the latest trading was at from files to support in wheat was about as expreted, but there was very little business. wise than make a very quiet and featureless market. In the way of dressed beef cattle there were some right good heavy cornfed steers on the market in addition to the usual showing of half fat stuff. The market was very dull and hardly steady. One bunch of 1739-10, heeves, the heaviest cattle seen here in some time, sold at \$4.25, while beeves weighing 1,400 r a little over went at \$5.0973.70.

bere in some time, sold at \$4.25, while beeves weighing 1,400 or a little over went at \$3.6073.30. The market has been downward this week and at the close prices are fully for to 25c lower than at the opening of the week. There is a strong influence at work at the present time that is decidedly against the cattle trade. In the first place the holiday season is near at hand and it is the time when poultry, oysters and game attract the public appetite and beef is neglected. Again mutton and pork are very low, and under the fullence of the money stringency con-sumers are inclined toward the cheapest meat, which cuts down the consumption of beef still more. As a general thing cat-tlemen do not anticipate much activity in the beef market until after the new year. Cows and helfers were in moderate supply today and holders did not experience much difficulty in scenning about steady prices. The market on butchers' stock has also ex-perienced a decided reverse the past week, but prices on that kind of stuff are still sood the way other cattle are selling. Two or three straight loads and a few odds and ends constituted the firsh supply of stockers and feeders. There were not enough to make any test of the market. HOGS-The week closed with a goad blocal run of hogs, nhely-three loads, though has saturday's figures were not reached by over a thousand head.

ran of hors, ninety-three loads, though last Saturday's figures were not reached by over a thousand head. The market opened a little slow, with buyers offering about Friday's closing prices, and some few loads changed hands on that basis. The dis-covery that Armour's representative was in the market spurred the other buyers on and the market soon active at a sheade stronger prices. Every one bounds freely and the pena were soon cleared. The tange of prices was about the same as on Friday, but there were more sales at 82.374 and 81.46. The great bulk of all the nors soid at 83.374 arise, with a sprink-ting at 83.46. Suddenly has the change come. It hap-pered but yesterday; to speak more accurately, about a month ago. The public alcal-ate of good, old, strong America was at last saled, the abused public stomach rebelled. The publishers tell us that there has been a remarkable failing off in the demand for such literature as I have mentioned and the market new calls for clean stories. t is dawning upon expert opinion that question of note guaranty is practically most vital factor in the problem of currency reconstruction, its importance being not only in the facilitation of the with drawal of the government currency, but also as involving the requirements of per-fectly sound retail money that would au-tomatically respond to the wants of business and largely contribute toward a natural and largely contribute toward a natural tomatically respond to the wants of business and largely contribute toward a natural and even regulation of the market rate of interest. But, from present indications, there is little to encourage the expectation that any important action on the general currency question will be accomplished, if indeed attempted, at the present session of coorgress. The possibility of disagreements between the two houses, and between con-gress and the administration, are so great that men of force and leading are likely to defer a campaign on this question until the achievement of some real result becomes a possibility. We take it therefore that the next few months of legislation are not likely to prove an influential factor bearing upon the investment and speculative inter-

LONDON WEEKLY STOCK REVIEW.

Money Rates Have Been of the Eastest. LONDON, Dec. 8.-With the bank reserve

again at the record amount, money rates have been of the easiest. The stock market has passed an exceedingly quiet week. The fact that the Peris settlement was gotten without trouble hassgiven a better feeling in foreign securities and mines. Other departments have been practically lifeless. Against the heavy gold exports President

Cleveland's message has had no effect in supporting American railroads, which, tosupporting American² tailroads, which, to-gether with Canaditans, were all lower on the week. Turks were fairly supported on official assurances that the froubles in Ar-menia would have no effect on the reserve. The week's declines were as follows: Illi-nois Central and Louisville & Nashville, 14 per cent; Atchison fours and Chicago, Milwaukee & St. Faul, 's per cent; Atchison, Central Pacific Union Pacific and Wabash 's, 's per cent; Denver & Rio Grande, Luke Shore, New York Central and Reading firsts, 's per cent, The advances were: Pennsylvania & Reading, 's per cent.
