GROCERY TRADE UNCHANGED. The volume of business doing in the gro-cery line is about the same as noted a week ago, there having been no material change during the period under review. Oatmeal is away down and it is claimed by the manufacturers that they are selling it at a lors. It is practically the lowest in the history of the trade. Packing coffees are to cent lower than last week. The sharp advance in Zante currants at points of production causes a stronger feel-ing here. Stocks of salmon are reported as low at almost all markets and yet prices do not advance.
