Much Long Wheat Was Sold Out and Some Shorts Covered.

TRADING CONFINED TO HOME TALENT

This Was Due to the Bad Condition of the Wires, Rendering Outside Connections Almost Impossible.

CHICAGO, Jan. 23 .- A great deal of long wheat was sold out today, and a lot of short wheat was covered also, the net result of which was a decline for the day of 4c per bu. Corn was a shade easier, in sympathy with wheat, and provisions a trifle higher because of small hog receipts. The sleet storm caused such poor working of the wires that the trading was confined largely to the home tatent. The sleet storm, with a drop of 20 to 25 degrees in the temperature predicted for tonight, raised great apprehensions in the minds of a number of the local traders concerning the wheat plant, and May opened all the way from 63c to 634c bid, and was quickly run up to 634c, half a cent above yesterday's close, but soon reacted to 63'4c. Apart from the fear of damage to the Apart from the fear of damage to the wheat plant, there was not much to create any impression that a further material advance would be sustained. The Liverpool cablegrams noted an advance of only 14d to 14d at the opening, as against 2c per bu rise on the day before here, and a later private dispatch quoted Liverpool closing 14d lower, and said; "Argentine wheat damage exaggerated." Quite a number of the centmission houses here acknowledged having recommended to their customers who were long the taking of profits. A large proportion of such orders as came over the wires were from the northwest, and to seil. An increase in the movement from farmers up there was said to be one reason for the sending of selling orders. The closing continental markets were strong, and the closing Liverpool market was let higher, and futures 14d over yesterday's closing prices. The market here was very nervous during the entire session but the most anxious party in the last half of it were the buils. The price surged up and down twice between 12%c and 63c, but had worked down by 12.20 to 62%c. Much of the early strength came from the buying of abut 1500,000 bu, almost all for account of Ed Partiridge. After a drop to 62%c and 62%c, a rumor that Russia and Turkey had come to an arrangement, presumably to the exclusion of the other European powers, caused a sharp rally to 62%c, at which the market closed.

Corn was traded in rather light, and the wheat plant, there was not much to create

sharp raily to 62%c, at which the market closed.

Corn was traded in rather light, and the market inclined to droop, but the storm, it was thought, would lessen farmers' deliveries for a time, and that helped to prevent a radical weakness. The openling price for May was practically unchanged at from 20%c to 25%c, and that was immediately followed by sales at 25%c, which was the beight it reached. It was down around 28c about half an hour from the close, and closed at 25%c.

Oats were quiet and fluctuated in narrow range, with wheat and corn. May opened unchanged at from 20%c, sold at 20%c down to 20%c, and closed with sellers at from 20%c to 20%c, sold at 20%c down to 20%c, and closed with sellers at from 20%c to 20%c.

Provisions were quiet all day, with trading light. Fluctuations were narrow.

Estimated receipts for Friday: Wheat, 40 cars; corn, 466 cars; oats, 130 cars; hogs. 20,000 head.

STOCKS AND BONDS.

Speculation in Securities Was Domi-NEW YORK, Jan. 22.—The speculation in stocks today was dominated by a reported change leged in early cables that a combination had been formed between Russia and the Porte, and this condition of affairs was reflected in a this condition of affairs was reflected in a slump in prices, including Americans on the London Stock exchange, and by persistent and fairly large selling in this market for foreign account. This new phase in the situation followed by a hardening tendency in the sterling exchange market encouraged bear predictions of probably heavy shipments of gold on Saturday. The impression had gained ground previously that very little, if any, of the metal would go forward, in the foreign selling referred to all of the international shares were included, with St. Paul and Louisville & Na hville mat close income. The local market opened irregular, but soon developed general weakness. General Electric led the declining movement, followed in close order

expectations that the company would come well out of the coal tennage controversy. The general of 13, 132,000, The changes on the bid quotations for governments were slight. The old coupon is advanced 134 per cent on dealings. The aggregated 11, 252,000, The changes on the bid quotations for governments were slight. The Scening Post's cablegram from London mays: The Russo-Turkish alliance is generally discredited in the best informed quarters here. At the same time there is a disposition here to regard an amicable arrangement between Russia and Turkey as a natural solution of the castern question Queen Victoria's indisposition was the main cause of the relapse of the stock markets today. The markets opened good, but reinpsed on the report of the queen's indisposition and the unconfirmed reports of the Russo-Turkey treaty. Comeals, after touching the record price, 108, fell to 1978. The other markets shared in the depression, but the close was above the worst. Americans opened strong, but closed in many cases II under the best. There are rumors that 12,000,000 in gold may go from here to New York soon in connection with the new loan, but at present I cannot confirm it. In the increase of 11,84,000 in the Bank of England's coln and buillen this week, 182,000 was gold imported, and the rest came from home circulation. The details of the gold movement of the week were: 17,550 bars bought, 144,000 imported from Holiand, 18,000 from Faris and
