No one can tell whit the convention will finally do. It is expected, however, that the developments will be highly sensational. If the Reed men are able to follow up their advantage, which is probable, it will give Reed four delegates. McKinley already has four and it is asserted that the delegates yet to be chosen from the districts will also be equally divided between McKinley and Reed, giving each eight votes from Louisiana.

When the Reed men nominated R. F. Guichard for temporary chairman, the Mc Kinley men waged a personal warfare upor him, making all corts of charges. Finally Guichard announced the choice of the conven-tion. He said it was held that Reed was the natural successor of Blaine, and was en-titled to the colored support, as he was an outspoken advocate of the force bill, which meant a free ballot and a fair count for the negro in the south, while McKinley and Harrison had dodged the question in the last republican convention. WEAKENED ON TARIFF.

"There was plain evidence to show that the president himself had weakened on the question of tariff reform and the financial plank was cunningly drafted so as to satisfy both gold and silver men, with the intention that it should be interpreted, if Cleveland was elected, as meaning the cessation of silver coinage and the forcing of a gold stand-srd upon the people. Whether the scheme was agreed to by the president in person or not, and whether he bound himself in plain terms or not, will, perhaps, never be known. His course has been unswerving in the abso-iute contradiction of his public professions and letter of acceptance. "There had been no trouble with the gold

"There had been no trouble with the gold reserve," the senator asserted, and no bint of any loss of confidence in the national credit until about the time of the last presi-dential election." Then for the first time we got a glimpse of the conspiracy which he had referred to before. Secretary Foster, he said, gave the holders of greenbacks and treasury notes the option of having govern-ment paper cashed in gold or silver, and as they all demanded gold, the gold in the treasury rapidly ran down. The financial papers took up the cry of the country going to a silver basis, and the first premonitory bine zelver basis, and the first premonitory to a survey basis, and the first premonitory bisezee of the planic of 1633 swept over the land and the conspirators fomented it by every possible means. The senator quoted from President Cleve-land's response to the committee that notified him of his nomination the last time, and de-

him of his nomination the last time, and de-clared there was nothing in it to warrant the belief that the leader of the democratic party would ignore the platform and treat with contempt the trusted lieutenants whom the people had sent to the national capital to assist in shaping national legislation. The language would lead us to expect the very reverse. How many, he asked, of these reasonable expectations have been met? "Whose advice has he (the president) rec-ognized?
