COMMERCIAL AND FINANCIAL

Yesterday Was a Day of Realizing on Long Wheat.

SHORTS OFFERED EVERYTHING IN SIGHT

Wheat Was Affected at the Opening Very Much as It Was Thursday on Heavy Receipts.

CHICAGO, Jan. 21.—This was a day of realizing on long wheat. Not only that, but short sellers, who for a few days had watched like a cat at a mousehole for a move on the part of the longs in the above directions flooded the market with their offerings. The price closed at a decline for the day of % per bu. Corn and oats are each a little lower in sympathy, and provisions moved up a little.

Wheat was affected at the opening very much as it was at the same time on the day before by heavy receipts at Minneapolis and Duluth, while higher quotations from Liverpool started May at from 65% to 65% at the close yesterday. After a further decline to 65% the price began to receive again and rose in a very short time to file or a hour as a treat on the country short and the close yesterday. After a further decline to 65% the price began to receive again and rose in a very short time to file or a hour as a treat on the country short and the close yesterday. After a further decline to 65% the price began to receive again and rose in a very short time to file or a hour as a treat on the country short in the country about as high as it got on the country shorts. The price closed at the close yesterday. After a further decline to 65% the price began to receive again and rose in a very short time to file or a high as it got on the country of the country shorts.

ecver again and rose in a very short time to 66%c, or about as high as it got on the previous day's bulge. The advance was chiefly due to the bullishness of the wheat chiefly due to the bullishness of the wheat situation, as set forth by the Liverpool Corn Trade News, which estimates the wants of the importing countries for the whole season at 48,000,000 bu., against available supplies of 25,000,000 bu., and says that the deficiency of 72,000,000 bu. and says that the good business and America. The trading was active for about an hour and a half during the fluctuations recorded above and the market had another range over the same ground, but after that it quieted down for an hour for want of anything further of an exciting character. The price meantime had worked down around 65%c, and did not for some time get away from between that and 65%c. Later the market began to feel the weight of the sales which had been made at around 65c and by 12 o'clock it had begun to wear a very dejected appearance. In half an hour later it had declined to 65c sellers, or 1%c decline from the highest point it touched earlier. The stocks at Minneapolis and Dubth are estimated to have increased 500,000 bu, this week, and New York stock to have decreased 750,000 bu. The prevailing impression with regard to the visible supply for the week was that it might show a small increase, or at least a very light decrease, and probably the heavy operators were influenced by that in selling as freely as they did. Business was very much smaller than on the previous days of the week, and, as on the day before, it was largely on the local account. The closing figures were at from 55c to 65%c, practically the lowest of the day.

The corn market followed the course of the fluctuations in wheat, being strong early and weak later in the day. The we situation, as set forth by the Liverpool

pected.

Business in oats was quiet, and no new features were developed. Outside of a small amount of liquidation, trading was almost at a standstill. at a standstill.

Provisions were irregular, opening firm and after a weak spell becoming strong with closing prices moderately higher for the day. The general impression in the pit was that soon after the opening the Cudahy brokers were the chief bidders for the product, but after they had joilled it up they became heavy sellers.

Estimated receipts for tomorrow: Wheat, 85 cars; corn, 435 cars; oats, 200 cars; hogs, 9,000 head.

HIDES AND TALLOW.

The Chicago packer hide market is on the down grade, according to the Shoe and Leather Review, but the brakes are working and the packers haven't lost control. The decline so far about represents the actual deterioration of quality. The difficulty of obtaining ready money is the most powerful deterrent at the present time. The banks are hoarding their money to back up their bids for the bond issue, and there will be little relief until the successful bids are back up their bids for the bond issue, and there will be little relief until the successful bids are announced February 15. That enough money is being held back to underwrite the bond issue several times over is universally believed, so that the moment it is known whose bids are accepted there will be a pronounced relaxation of the monetary stringency and loans will be easy to secure. It will be remembered also that a pronounced revival of confidence and business activity followed the last bond issue. It is, therefore, quite natural to expect the markets to continue slow and waiting until February 15, when, unless all signs fall, there will be a general commercial revival. Two large English leather buyers are in New York this week, and the influence of their purchases will be quickly felt in the leather trade. Europe Has Been a Buyer, Though to a Limited Extent.

NEW YORK, Jan. 31.—Bradstreet's New York market review says: The rise of the bullish sentiment in speculative circles has been very marked during the past week. Not only has

checked industrial operations. Least satisfactory is the waiting attitude of some of the more important industries. Cotter goods makers regard the outlook for their profile unpromising. There is a reaction in the price of steel billets. Among fifty pig from furnaces in the Pittsburg and Shenango districts Fourier are idle, and the position of woolen goods manufacturers is shown by the fact that foreign involen roods are reintively most active. General trade at the close of January proves disappointing, particularly in central, western and northwestern states, where the movement of merchandise from jobbers has been slow and unsatisfactory, it being only fair at a few points. The volume of spring goods distributed from Chicago in January falls behind expectations, although larger than in January. 186. Some traders in territory tritutary to Chicago are making orders small, owing to have the confine purchases to actual requirements. At St. Louis the apring demand is slow and general.

PRICES ON WOOL HOLD STEADY. tone Very Strong, BOSTON, Jan. 31.—The American Wool and Cotton Reporter says of the wool trade: "The sales in the three principal markets have amounted this week to 4,959,750 lbs., 2,856,750 lbs, of which were domestic. A considerable number of manufacturers were in on Wednes-day, but as a whole the week may be set down as the quietest since New Year. Prices continue to be very steady, and the undertone of the market is very strong. The aggregate wool sales since January 1, 1896, in New York, Boston and since January 1, 1886, in New York, Boston and Philadelphia are 28,107,530 lbs.

"The sales of the week at New York amount to 912,590 lbs., of which 287,590 were demeatic, and 625,090 lbs. were foreign wool. The tightness of money is preventing many manufacturers from purchasing as freely as they might wish. The sales since January 1, 1896, have amounted to 7,777,590 lbs., against 6,196,690 lbs. in the corresponding period of 1895.

"Sales this week at Boston have amounted to 2,704,750 lbs., 1,490,750 lbs. being domestic stock and 1,244,090 foreign. This has been, on the whole, the quietest week street, some contents of the whole, the quietest week street. and 1,244,600 foreign. This has been, on the whole, the quietest week since January 1, but prices continue to be very steady, and the undertone of the market very strong. The sales since January 1, 1896, have amounted to 13,942,550 lbs. In the corresponding period of 1895 they were 14,401,600 lbs.

"The sales of the week at Philadelphia amount to 1,342,560 lbs., 618,500 lbs. domestic and 624,600 foreign wool. Several factors of late have caused some in the trade to be more hopeful of the future prospects in the wool interests. Prices have not materially changed from the week preceding. The sales in this market since January 1 have amounted to 6,257,430 lbs.; for the corresponding period of last year they were 3,729,815 lbs.

at all points gave the markets a stronger tone.

CATTLE—Only 1.189 head of cattle were on sale, as against 1.481 yesterday and 1.012 on Friday of last week.

Only a few loads of fat steers were on sale, and while there were some very fair cattle, there was nothing very fancy. The market was fairly active, as the buyers all wanted a few cattle, and practically everything was sold in good season. As to values, salesmen generally were reporting their sales as showing a little more strength to the market, though the buyers were, as a rule, claiming only a good, steady market.

Butchers' stock was in very light supply, and the demand being good, prices were a little better on the good stuff at least. The few loads of cows and heifers on sale were soon cleaned up.

Fully a third or more of all the cattle here consisted of stockers and feeders, quite a number of them westerns. The market was fully stendy, with the demand equal to or in excess of the offerings. Representative sales:
