BARRY SUPPORTS THE SCHEME.

Adjutant General Writes Concerning the Disposition of Fort Omaha. LINCOLN, Feb. 28 .- (Special.) -- Adjutant General P. H. Barry, in aid of the plan to secure old Fort Omaha for the use of the Nebraska National guard, has written as follows to each of the Nebraska senators at Washington:

at Washington:

LINCOLN, Neb., Feb. 27.—My Dear Senator: I notice that the house of representatives has passed the bill to transfer eld Fort Omaha to the state of Nebraska for the use of the National guard of this state, when the general government has ceased its military occupancy of the same.

The experience of several states which have established permanent camps for their guards has clearly demonstrated the value.

ards has clearly demonstrated the value of these permanent places of encampment. The proposed encampment meefs with the entire and enthusiastic approval of the

The proposed enthusiastic approval of the entire and enthusiastic approval of the whole guard.

The establishment of a military school under the control of the State university would be of the utmost benefit to these young men, who desire to take a post military course in military science.

Therefore in asking you to use your best endeavors to promote the passage of this bill by the senate, I know I am voicing the sentiments and wishes not only of the guards, but those of all patriotic citizens of this state, who desire to see our great nation, at all times, in such a condition as to be ready to assert its dignity before the great military powers of the world. Very respectfully yours.

P. H. BARRY,
Adjutant General.

The following has also been sent to Hon.

The following has also been sent to Hon.

Daniel S. Lamont, secretary of war:

Pear Sir: I have the honor to enclose you copy of the letter which has been sent to the senators of this state regarding the bill to turn over old Fort Omaha to this state for the use of the National guard.

The attempt to secure the old post of Omaha for a permanent annual encampment is received with great satisfaction by the members of our guard. General Charles F. Manderson has taken much interest in the matter, and it was his suggestion that the matter should be laid before you in the hope that your influence might be secured for the measure.

During the past year there has been a decided improvement in the Nebraska guards. Officers and men are showing a marked increase in efficiency, and should be encouraged to persevere. Daniel S. Lamont, secretary of war:

guards. Omcers and men are showing a marked increase in efficiency, and should be encouraged to persevere.

There has, also, been a much greater interest taken in military matters by the people, as shown by a large number of applications received to form new companies. Helieving that the establishment of a great military school and a permanent camping ground for the annual encampment of the guard will foster a true military spirit and help in the training of our

was the ancient hero condemned by the gods to push a big boulder up hill forever, lest it should roll down and crush roll down and crush him. When the myth-mak-ers got up that story they must have been thinking of

must have been thinking of fyspepsia; for there is certainly no other trouble on earth that keeps you so everlastingly struggling against being crushed into utter despair. Anything that cures dyspepsia lifts about half the weight of misery that crushes mankind,—and womankind.

The trouble with most of the so-called The trouble with most of the so-called dyspepsia cures, is that they don't cure. They give only temporary relief. Indigestion usually extends all through the digestive tract, from the stomach clear down to the large intestine; the liver too is frequently involved in the trouble being torpid and inactive. For a thorough, radical, permanent cure you must have the whole discounted the story of t mactive. For a thorough, radical, per-manent cure you must have the whole di-gestive organism set right.—Not violently stirred up, but regulated. Doctor Fierce's Pleasant Pellets will do it. They stimu-late the digestive juices of the stomach; invigorate the liver and help it to actively secrete the bile; and act gently on the bowels to promote a regular healthy move-ment. This means a complete and last-ing cure of digestive troubles.

The "Pellets" are not a severe cathartic.

ing cure of digestive troubles.

The "Pellets" are not a severe cathartic, They act on the bowels naturally and comfortably though surely. The dose can be regulated to your needs, and when the "Pellets" have done their work they can be discontinued. You don't become a slave to their use, as with other pills. If the druggist suggest some gripping pill that gives him more profit, think what will work you most.

MRS. STROHM AND HER MISSION citizen reldiers, 1 am in the hope that you will see your way to place your stamp of approval on the contemplated measure. Your obedient servant, 1, H. BARRY, Adjutant General.

Here the letter was lately discovered by a clerk and sent to Grand Island, where it yesterday found the man to whom it had been addressed. The long delayed receipt for the money was at sent to the Luebeck Gazette.

CREEKS HIGH IN DODGE COUNTY. More Water in Sight Than for Many Years.

FREMONT, Feb. 28 .- (Special.)-The Rawhide creek, which rises at the edge of the bluffs about fifteen miles northwest of Fremont, and which has been dry since last spring, except for occasional stagnant pools now has quite a stream of water flowing through it. The Ames cut-off ditch, which has been dry about the same length of time, is also carrying considerable water. As there have been no rains here to amount to anything for the past five months and the ground is very dry, the probable source of the water is an interesting problem. It is a well known fact that the Platte bottoms are underlaid by a body of water which can be reached by driving wells down in some places as low as eight feet, but usually from twelve to twenty, and that the distance of water varies with the height of the Platte river. The Platte is not as high as it usually is when the ice goes out, and it is thought that the water underground is thought that the water underground is higher, owing to the ice gorges at Schuyler and in the vicinity of Columbus. There was a very strong wind here Thursday afternoon.

MURDERER'S STORY REJECTED. Alleged Slayer of Russell Graham Given Great Encouragement.

BEATRICE, Feb. 28 .- (Special Telegram.) The trial of William Henry, charged with the murder of Russell Graham at Bower, was resumed this morning. E. F. Hinshaw, prosecuting attorney of Jefferson county. was recalled for cross-examination. George Tolleth of Fairbury was on the stand the greater part of the day. The testimony of both witnesses related largely to the alleged confession of the defendant. It seems the defendant made a statement concerning the cr'me, which was afterward put in writing. The question of the admissibility of the written confession was discussed at some length. The defendant's attorney objected on account of the confession not having been sworn to. The court sustained the objecsworn to. The court sustained the objection and decided that the written confession could not be accepted or go before the jury. Sheriff Mendenhall of Jefferson county was on the stand when court adjourned. Many witnesses are yet to be examined for the state. state. DISTURBING ASHLAND PEOPLE.

CORRECT BREATHING.

How it is Said to Help the Stout Woman to Become Thinner, It has been discovered that the double

chin can be banished by correct breathing, says the Philadelphia Record. The woman says the Philadelphia Record. The woman themselves in one section, then in another, with a short neck must hold her head high. to the annoyance and discomfort of storeeven stretching her neck until conscious of the tension of the cords. She should also place became a necessity, and the city practice dropping her head and letting it authorities, ten years ago, set about proful poise to the head, and the exercise of muscles will help consume the extra amount of fat. Lung exercises in breathing are the best exercises for excessive stoutness. The best time for this is before dressing in the morning and after undressing at night. Five or ten minutes' exercise every day will reduce the flesh in a wonderfully short time.

The best time for excessive stoutness. The on any street except the locality to be chosen for a market place. A lease of a portion of the navy yard reservation, adjuct the flesh in a wonderfully short time. Stand erect, with the head and chin well up, and rise upon the toes at each inspiration. Immediately upon completing the transfer holding the breath a moment, then expelling it forcibly, coming down upon the heels at land and divided it with streets. Following the same time.

the same time.

Another good breathing exercise is to draw in a full, deep breath. Retain the breath while counting fifteen and then slowly expell it. Sometimes riout women move the arms gracefully, but the body has an utter lack of liberty and free motion or suppleness. Drawing her corsets tighter never did make a stout woman less stout in appearance. The first care is not to lace too tightly; the second is to banish all idea of being stout from your mind, and let the muccleo have as free play as possible. All women can learn to use their bedies gracefully, even if there is a predisposition to stoutness. Stout women are often the lightest dancers, and there is no reason why they should not be graceful in pose and motion. If a woman draws her breath freely from the bottom of her lungs she diminishes the effect of her size immediately by doing away with that ready-to-burst look that is generally associated with stoutness. That is the look that must be she diminishes the effect of her size immediately by doing away with that ready-to-burst look that is generally associated with stoutness. That is the look that must be avoided, even if the walst measures an inch or so more and the bust and shoulders gain a little.

THE OFFICE-SEEKING HORDE.

Ex-President Harrison Says His Positive of the land occupied by the matter of the land occupied by the land occupied by the matter of the land occupied by t

Ex-President Harrison Says His Post-

At the beginning of every administration Washington fills up with persons who desire some office either in the states, in the departments or in the foreign service, writes ex-President Harrison in March Ladies' Home Journal, discussing "The Presidential Office." Many of these persons have a limited purse, and as the days pass on this is exhausted, and impatience and iil temper come in. Many of these persons are deserving and well fitted to fill the offices they desire. But it is impossible to find places for all the deserving, and the position of the president is full of trial. The suspense and uncertainty that the officeseeker suffers is illustrated by the case of a man from my own state who the form of the president is proposed in the value of the market having been thus recognized, it assumed such importance and importance and ill temper come in. In the market and each employs from six to ten men. They have their regular customers and do a good business. Farmers who do not care to pay this fee assume these duties themselves. At the stables 40 cents is charged for a single horse and 75 cents for a gournel of the president is for the past ten years, it will soon prove by far the greatest source of income of all the city investments.

The value of the market having been thus recognized, it assumed such importance and labour market is the most valuable property in possession of the city, and if the revenue derived from it continues to increase in the same ratio that has marked its augmentation for the past ten years, it will soon prove by far the greatest source of income of all the city in vestments.

The value of the market having been thus recognized, it assumed such importance and labour market is the most valuable property in possession of the city, and if the revenue derived from it continues to increase in the same ratio that has marked its augmentation for the past ten years, it will soon prove by far the greatest source of income of all the city and the north property in possession of the city, and if the revenue and do a good business. Farmers who do not care to pay this fee assume these duties the men. They have the men. They ha Many of these persons have a limited purse, and as the days pass on this is exhausted, and impatience and ill temper come in. hought he had good reason to expect an appointment from President Garfield. After had been weeks at Washington, and had brought to bear all the influence he could command I met him one day on the street command, I met him one day on the street and asked him how he was getting along. His answer was, "Very well, very well, but there is nothing focal yet." It was wonder-fully expressive, and has remained in my memory as a type of the state of uncertainty which accompanies officeseeking. "Nothing focal yet," but a hope that is hard to kill.

There are few offices at Washington the salaries of which enable the incumbent to save any money, and the average experience of those holding places in the departments. I am sure, is, if they would express it, that private business offers better returns and gives a better chance for advancement.

For South Dakota—Cloudy and threatening, with snow flurries; colder; northerly winds.

For Kansas—Increasing cloudiness, probably followed by light snow; colder in the northern and western portions; variable winds, becoming northerly.

WASHINGTON, Feb. 28.—To Observer, Omaha; Hoist cold wave signal. Temperature will fall 20 to 25 degrees by Saturday night.

CHICAGO, Feb. 28.—Snow has begun falling throughout the northwest, a depth of two to four inches being reported in North Dakota and parts of Montana, with a decided drop in the temperature. The temperature is be ow zero in the north of North Dakota and Montana. At Chicago the temperature at 7 o'clock tonight was 30 degrees, a fall of 24 degrees in a few hours.

Local Record.

will be in a block by itself, occupying a space of 44x100 on the lower end of Wash-ington avenue. In exterior design this building will harmonize with the general market plan, but the interior will be fitted up to meet the requirements of the fire department. The office building will be situated at the southeast corner of the market square, adjoining the hospital wall, and from it a commanding view of the entire square and the majority of the market buildings will be obtained. The main tower will be twenty-five feet square and will extend 100 feet from the ground to the gable wails, with a turrer on the peak roof running about forty feet higher. Clock faces will be placed in the north, south and west gables. The private and general offices on the first floor will be handsomely fitted with interior deco-rations. The stables, also to be erected on the east side of the square, will include car-riags, wagon and tool houses and a loung-ing room for the men. At the northeastern end of the square three more blocks of stables will be built, each occupying 56x250 feet. One block will be two stories high and will be reserved for the use of the occupants of stores, the other two, one story in height, will be rented by the men who board and care for the horses of the farmers.

A PAYING INVESTMENT. A PAYING INVESTMENT.

The city of Brooklyn is the sole owner of this property and the landiord of every tenant. Into its treasury drops every cent collected there, from the silver quarter for street privileges, paid by the farmer, to the monthly rental of the store. Of course hundreds of thousands of dollars have been expended, but this outlay will continus but a pended, but this outlay will continus but a pended.

department of city works is very simple, and is controlled by an act (chapter 569), which passed the state legislature in 1894. It au-thorizes the city to grant lot holders five years' lease, with privilege of two renewals, and calls for the erection of buildings at the expense of the lessees, such buildings being subject to forfeiture should the owners default in the payment of rent or refuse to renew licenses.

The following table showing the revenue for three years, forwarded to Commissioner

White just before the expiration of his term, speaks eloquently of the financial success of speaks cloqueths market: Total for year..... Ground rent \$24,618 57
Rent from farmers 10,958.00 Total for year.....

he year 1894. The cost of maintaining the market for the year ending December 31, 1895, was \$11, 222.32, which leaves a surplus revenue of \$38,947.85. As to the possibility of the increase of these figures for the present year t may be said that already an additional number of plots have been leased, amounting to 36,365 square feet, which will bring in an annual revenue to the city of \$5,990. Payment will begin in the spring, when build-

ompleted.

The city spent in construction work during the year \$33,205.77, which amount was dis-tributed as follows: New brick and pipe sewer system, covering every street in the \$18,332.43; new water mains, 695.29; Belgian block pavement, \$4,677; new curb, furnished and set, \$2,501.05; removal of entire Washington avenue pavement, \$600; filling hauled to market streets and graded,

The revenue for the year more than covers this outlay and the prospect therefore be-comes very promising when one realizes that, while the yearly revenue is bound to in-crease, the city may rever again put out such an amount in improvements, for the work has been done with great care and several generations will come and go before other improvements are necessary. There still remains to be leased seventy-five lots, recently laid out, which will bring the city a revenue of \$19,248, and when ne-gotiations for these are closed the city will receive annually from lot rental alone nearly \$63,000, Presuming a few hundred wagon rents may be added, which is more than

conservative, the annual income will eventually amount to \$76,000, against which there will be the maintenance of the market amounting to not more than \$11,000 or \$12. 000; perhaps less. SCENES ON MARKET DAY. Not the least interesting feature of mar-ket life is "market day," when the wag ns of

the farmers from all parts of the rural dis-tricts crowd the big square to overflowing and the owners dispose of their produce to the wholesale dealers and grocers. The market day at this time of year is Friday. As early as 3 o'clock on Thursday afternion the farmers begin to arrive and, of course, have their choice of good positions in the square. Late comers who follow them until all hours of the night must be content to wheel into line where spaces are left. The wheel into line where spaces are left. The majority of the farmers are greeted by men in waiting, known as "carriers," and they throw the reins over the backs of their horses and walk off with no further responsibility and they than to engage a room in an adjoining hotel and mingle with their acquaintances in the restaurants and bar rooms. The carriers unhitch the teams and take them to the stables at the nith end of the square. The duty of a carrier engaged by a farmer does not end with the mere taking of the horses to the stable. He must be on hand early next morning and remain within calling distance of the farmer, so that should a grocer whose wagon is at the end of the street make a purchase, he will be ready to carry the goods

wagons, whose fancy decorations and neatly painted gilt letters contrast strongly with the crude vehicles from inland villages.
