What Scientific Research Has Accomplished,

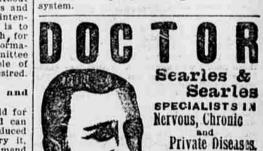

Proved by Success Where All Else Has Failed.

There is one true specific for diseases aris-ng from a debilitated nervous system, and that is the Paine's celery compound so genmost remarkable remedy that the scientific research of this country has produced. Prof. Edward E. Pheips, M.

A Revenue D., LL. D., of Dartmouth college, first prescribed what is now known the world over as Paine's celery com-pound, a positive cure for dyspepsia, billous-ness, liver complaint, neuralgia, rheumatism, and kidney troubles. For the latter Paine's celery compound has succeeded again and again where every-

Sufferers from neuralgia, neuralgic headaches and rheumatism should stop short their morphine, quinine and such pain-killing drugs. No cure can be hoped for from these temporizers. There is one way of getting rid forever of the causes of all this suffering; that is by taking Paine's celery compound. In this great modern remedy the real means to health is attended to; sleep is made sound and refreshing, the apprtite improves and the nerves stop complaining, because they get the nutriment that nature requires. This is the fundamental, rational way that Paine's celery compound takes to be able to cope successfully with diseases of the liver, kidneys and stomach, and to guarantee a complete return of sound sleep, good digestion and a quiet, well regulated nervous
