Black Has a Plan to Secure Harmony for Democracy. WASHINGTON, April 17.-Hon. Chauncey

F. Black of Pennsylvania, president of the National League of Democratic clubs, has got a platform plan whereby he believes the party may escape a division at Chicago, "It seems to me," he says, "that the mat

ter might be settled in a very fair and honorable manner to both sides by an agree ment respecting the exercise of the veto power by the president. Let it be agreed that our candidate for president is not. If elected, to interpose his veto to embarrass or defeat any financial legislation which may be sent to him by the votes of a majority of the democratic members of congress. There ought to be no objection to that. It pro-vides for leaving the question where it prop-erly belongs-with the representatives of the people, chosen to legislate in their own wisdom for the people's best interests. I believe in popular government. I am opposed to the free coinage of sliver. I hold that the adoption of such a pilicy would be in-jurious to credit and business. But if a ma-jority of my party decrees free coinage, I man.

am willing to accept it. There is more in democracy for me than the money question. The great question of taxation is yet to be settled properly in this country, and I am utterly opposed to parting company with men so sound on that as are Morgan, Vest, Crisp, McMillin and many others simply because of a difference of opinion as to money. They are men of the highest character and very eminent ability, and I concede them the same right to their opinions and the same sin-cerity in forming them that I claim for mysolf. I think they are mistaken about silver

but I'm sure they are succere." Mr. Black is sure there will be no bolt in Chicago. In reply to an inquiry if he thought the silver mcn would remain in the convention if they failed to get 16 to 1

The veto power has regard to constitutional questions, and the money question as presented to us is not such one. It is entirely within the province o a majority of the people to settle it, and an agreemnt to that effect at Chicago would tide over one of the greatest of the difficul ties now confronting the democracy."
