COMMERCIAL AND FINANCIAL

## TRADE WAS EXCELLENT IN THAT CEREAL

Corn Was Again Weak and Still Further Declines Were Scored-Fairly Active Market in Whent.

CHICAGO, July 28.-There was a sharp decline in wheat today on fine weather and manipulating by bears. September closed at 57%c, or 1%c below yesterday. Corn lost 1%c and oats %6%c. Provisions made slight

There was a good trade in wheat and fairly active market, the range being 1%@ 11/c. The feeling manifested early was fairly steady, all things considered, but a weak speil set in later. Good buying by several of the largest sellers of yesterday absorbed the early offerings, but increased realizing followed and in the absence of support prices weakened. Cables were rather disappointing, early advices showing declines of 14012d, which, in the face of

rather disappointing, early advices showing declines of 14012d, which, in the face of the fact that prices were maintained on this side yesterday, was taken as an evidence of weakness. Another depressing factor was the absence of bids for cash on foreign account, and then bids to the interior were said to have received more ready acceptance. The break in corn was also feit in wheat to some extent. The weather was more favorable, being clear and warm in most sections of the winter wheat belt, and the forecast is for seasonable conditions.

Corn was again weak and still further declines scored. September selling off to 24%c. The further reduction in rates, the Atchison coming out with a flat rate of se from the Missouri river, equal to about to be proved to the recent rains and clear, warm weather were the prime factors in causing the weakness.

There was a fairly active market in oats and an unsettled feeling. A moderate number of outside buying orders came in early and crop reports from parts of Illinois were unfavorable. There were also reports of damage by rain in other sections. The break in wheat and corn made holders rather timid and after a %c raily iong stuff came out freely. There was also good selling of September by St. Louis and all the early advance was lost, the close being easy at 140 %c under yesterday's.

Hog products were weak from the beginning of the session to the close. Though heavy in feeling the trade was light and the decline was chiefly in lard and ribs. September pork, in fact, rested with a gain of 5c and January pork without change. Lard closed 5c lower for September at declines of 507½c for September.

Estimated receipts for tomorrow are: Wheat, 100 cars; corn, 758 cars; oats, 115 cars; hogs, 24,000 head.

TROPICAL FRUITS.

According to the New York Journal of Commerce there was a decided improvement in the situation in the lemon market during the past week. The hot weather has had the effect of bringing out buyers, though the demand has week. The hot weather has had the effect of bringing out buyers, though the demand has hardly come up to expectations, owing to the fact that during the preceding two weeks distributers, especially in the west, had been well filled up, and have been occupied in working off their stocks. These have been greatly leasened by the demands of consumption within the past few days, and interior as well as local dealers are again beginning to send in orders. Old stocks have been considerably reduced since the week opened, partly by sales to distributers and partly by what is technically known as "melting' in the wholesale trade—that is, the hot weather has caused a good deal of rotting in spot stocks. There was but one auction sale of lemons the past week, and the prices realized were 150 to 75c per box higher than at the preceding sale.

The advance in prices last week was most marked in the choice and extra grades, in which competition in buying at the public auction was more active than in the fancy kinds. Brokers' orders, as a rule, were limited to certain figures, which were not applicable to grades above extra choice, and for that reason most of their purchases were of this grade or of choice.

The outlook is for a steady market at present prices during the next week. It is not expected that a further important advance will occur in the near future, unless there should be a marked improvement in consuming demand, for the reason that there is a considerable stock on the way. Quotations:

ORANGES—Mexican, \$4.2554.50.

# WOOL MARKET.

Menger Sales and General Listlessness the Features.

BOSTON, July 28.—Meager sales and a general listlessness are the characteristics of the wool market just now and the outlook is far from reassuring. Advices from western points indicate that holders there are inclined to meet the views of eastern dealers, but the latter, as a cate that holders there are inclined to meet the views of eastern dealers, but the latter, as a rule, are refusing to take any more wool at present. Many woolen mills in New England are still closed and large orders that were looked for have not come. Territory wools are nominally quoted the same as before, and few quotations in any grade have changed. Selling prices are as follows: Ohio and Pennsylvania fleeces. X and above, 165(18)(c) XX and XXX above, 175(18)c; clothing, 18c; combing, 20c; detaine, 19c; unmerchantable, 18c; unwashed, 12c. #### STOCKS AND BONDS.

Distribution of Trading Was Better Than Usual Recently.

NEW YORK, July 28.—The stock market today was in most respects the same as Monday
in point of its professional character, and the
sagaing tendency of prices. The volume of bus-Iners was, however, fairly judged by recent standards, but the increased dealings were not due to commission orders. London was a fairly large seller throughout. The distribution of the trading was better than usual recently, and considerable attention was paid to some of the usually neglected shares in every instance at an usually neglected shares in every instance at an expense of values. The opening was weak in response to lower London prices for the international stocks and seiling for the account in this market, especially of St. Paul and Louis-ville & Nashville. The initial ecclines ranged up to % per cent, with Leather preferred exceptionally dropping its per cent to 47%, Manhattan at the low point attracted some covering demand and rallied a point to 91%. After the first fifteen minutes the market became apathetic. The radical cuts in railroad rates in the south and west, the practical failure to float the several blocks of New York City and Brooklyn bonds offered vesterday and today, and the lack of commission business at the declines all created an unfavorable impression, which was not relieved in the day by the announcement that the principal rate disturber had been enjoined from continuing the slaughter of rates.

was not relieved in the day by the announcement that the principal rate disturber had been enjoined from continuing the slaughter of rates.

The Burlington statement for June, showing an increase of gross earnings of \$225,728, an increase in net of \$32,021, and a decreased deficit of \$24,576, was more favorable than had been expected, but also failed to create a ripple. The market continued feverish the greater part of the day, and the extreme low points represented declines from Monday's final figures, extending to \$15, per cent in Consolidated Gas. Sugar led the active stocks with an extreme loss of 2% per cent, and closed at the lowest. The other more important declines ranged from 11% per cent to 2% per cent. Chicago, Great Western preferred more important declines ranged from 11% per cent to 2% per cent, but rathed later. Iowa Central preferred and Lake Erie & Western preferred lost 2 per cent each and other special-ties declined to a less extent. Trading in bonez was duil, but marked weakness prevailing generally. The sales were \$48,000. The principal losses were: Rock Island debenture \$8,3% per cent; St. Paul & Sloux City Ists, Truckol, St. Louis & Kansas City Ists, trur- receipts, Rochester and Pittsburg consols and Oregon Improvement Ists, 2 per cent; Iowa division \$8,2% per cent; New York Central debenture 58, 2% per cent, The stock markets were flat today, closing at the lowest. The sottlement shows a comparatively small account, and contangoes and Americans were merely 3 per cent. The weakness of the position here appears to have been much exaggerated in cable reports to American is so jives an element of weakness, but nothing serious is really apprehended here. Americans were flat, closing at the lowest. The combination of bankers to arrest gold shipments has had little effect on prices of securities, not exactly because their power to are subjected here. Americans wer

America may as a result be diverted for the moment.

Paris is at present the center of weakness. The success of the Russian loan today has been far from demonstrative. Paris operators are loaded with Turkish, Spanish, Italian and mining stocks, and the last named have been sold today in almost a panic manner. The rumor that a new Chinese loan is about to be issued is not correct, Kaffirs were flat here, Chartered company leading the decline. An operator in Kaffirs in Paris is said to have failed. The Berlin market was flat.

The following were the closing quotations on the leading stocks of the New York exchange today:

ber of head indicated:

200 Total ..... 510 4,110 800 CATTLE—There were just about enough cattle here for a Saturday, but for a Tues day it was extremely light, in fact the lighest in a long time. There were hardly enough cattle of any one kind in the yards to make a real test of the market. Of the

508 head reported in 199 were consigned direct to a packer, leaving only 300 on direct to a packer, leaving only 305 on sale.

Three or four loads of half fat steers and a few cows and helfers constituted the entire supply of beef cattle on sale. The market was just about steady and was without feature.

The few feeders here also sold at about steady prices and the meager offerings were cleaned up in good season. Representative sales:

HOGS-There were over 4,000 hogs on sale, counting the few held over from yesterday. The market opened about 19e lower and after about two-thirds of the offerings had changed hands the trade became very dull, but the yards were practically cleared before the close.

Some good light sold up to \$2.00, while the great bulk of all the hogs brought \$2.7092.80, as against \$2.8092.80 yesterday. The popular price was \$2.75.

Today's decline carries the market to the lowest point touched so far. On Thursday of last week the hogs sold at \$2.7093.10 with the bulk at \$2.8092.85, which was the lowest average previous to today. Representative sales:

WEATHER CROP BULLETINS

Last Week Unusually Cool with an Excess of Rainfall for Nebraska.

KING CORN MAKES WONDERFUL PROGRESS

Stalks Grow Large and Ears Now Developing Promise a Tremendous Yield-Fall Pasturage Already Assured.

Weekly crop bulletin No. 17 of the Ne braska section of the climate and crop service of the United States weather bureau issued from central office of the section the the University of Nebraska, Lincoln, under the direction of G. A. Loveland, for the week ending Monday, July 27, 1896, says:

Less than \_\_\_\_\_ 15 to 1 \_\_\_\_\_ 1 to 2 \_\_\_\_\_ The past week has been cool, the temperature averaging 5 degrees below normal. The maximum temperature for the week has been below 55 in the greater portion of the state and on most days the maximum temperature has been decidedly below 59. The rainfall has generally been above the normal, and has exceeded an inch over a large area in the western and northeastern portions of the state. Along the southern border and in localities in the contral portion it has been less than half an inch.

southern border and in localities in the contral portion it has been less than half an inch.

The harvest of small grain is about completed over the greater portion of the state. Threshing is general and the recorts indicate that as a rule the small grain crop will be below the average. The oats will be a very light crop. In many places fall plowing has commenced.

The corn has generally grown well, the stalks are large and they are earing in a way that indicates a very large crop. In some few localities, however, the crop has been somewhat retarded by the lack of moisture and in the southwestern counties the corn has suffered permanent injury from the dry weather.

The hay crop is an unusually good one. Pastures continue good.

Reports by counties;

SOUTHEASTERN SECTION.

Reports by countles;
SOUTHEASTERN SECTION.

Butter—Wheat and rye being threshed; a good yield and fair quality. Oats very poor yield and very light weight. Corn doing well, but more rain needed.

Cass—Wheat yielding rather light; some of fair quality, but generally poor. Oats light in quantity and quality. Corn in splendid condition and promises an abundant yield.

Clay—Threshing under way and crops turning out as well as anticipated. Flax good. Sorghum excellent. Corn doing well. Some are plowing stubble.

Fillmore—Corn doing well. Threshing of small grain in progress. Oats light in quantity and weight. Wheat a fair yield and good quality. Gage—Fall plowing has begun, ground in fine condition for plowing. Corn, cane and millet continue to show up in fine shape.

Hamilton—Harvest completed and threshing commenced. A good rain put corn in good condition.

Jefferson—Corn is shooting and some of the carry reads. condition.

Jefferson-Corn is shooting and some of the carly fields are in roasting ear. Hay crop is fine. Corn in western half of county needs

carly heids are in roasting ear. Hay crop is fine. Corn in western half of county needs rain.

Johnson—Wheat is turning out good. Oats very poor. Corn is looking very fine and the ears are filling out well; a good deal of smut in early corn.

Lancaster—Corn continues in good condition. Frequent showers have retarded threshing and some grain is in bad shape. Potatoes where well tended are a full crop.

Nomaha—Corn making a good growth; all early corn in ear and in fine condition. Wheat and oats in stack and shock damaged some by and oats in stack and shock damaged some by rains.

Nuckolls—Corn doing well, but more rain needed. Pastures good.

Otoe—Cool, cloudy weather making corn crop about sure, but stopping shock threshing and making grain very damp. Apple crop giving promise of great abundance.

Pawnee—Small grain has been damaged in the shock by the heavy rain of the previous week. As threshing goes on oats make a very poor showing. Corn and grass still in excellent condition.

ondition.

Polk—Corn still doing finely, early fields in

Polk—Corn still doing finely, early fields in roasting ear. Some oats threshed; yield light. Winter wheat yielding fairly well. Pastures needing rain.

Saline—Another good week for corn. Fall plowing commenced. Threshing delayed and some grain growing in the shock on account of wet weather. Pastures good.

Saunders—Corn doing well. Spring wheat is about all cut. Oats are being threshed. Wheat and cais a partial failure on account of rust and chinch bugs.

Seward—Corn silking out and promises the heaviest yield for many years. Wheat yielding well. Oats light. Many will not be threshed and few marketable. Some are plowing.

Thayer—A dry week and rain is needed. Corn is in good shape so far.

York—A good rain would be beneficial, although crops are not suffering.

NORTHEASTERN SECTION.

Antelope—Stacking and threshing small grain

NORTHEASTERN SECTION,
Antelope—Stacking and threshing small grain
delayed by rain. Corn laid by in good condidelayed by rain. Corn laid by in good condition and earing nicely.

Boyd—Harvesting about completed and some stacking being done. The rain of the week about insures the corn crop. All kinds of crops far surpass any previous year in the history of the county.

Burt—About all the oats cut; wheat harvest well advanced. Corn still climbing up and since the rain of Thursday has sent out ears without number. Hay is heavy on bottom lands.

without number. Hay is heavy on bottom lands.

Cedar—Harvest in full blast. Wheat good. Oats fair, but not as good as expected. Corn growing splendfully and ears filling out nicely. Millet doing well.

Colfax—Prospects for a large crop of corn. Potatoes immense. Small grain being threshed. Cuming—Harvesting is being done. Rust has caused the grain to fall down and the yield will be light. Corn prospects excellent. Potatoes, hay and beets good.

Dakota—Harvesting is well under way and shows wheat and oats quite badly damaged with rust. Corn looking well and much benefited by the rains of the week.

Dixon—Potatoes will not yield as good as last year. Wheat harvest in progress. Corn very promising.

Dixon—Potatoes will not yield as good as last year. Wheat harvest in progress. Corn very promising.

Dodge—Harvesting in progress. Oats being thrashed and a very low test quality. Timely rain gives promise of an abundant corn crop. Sugar beets growing linely; hoeling all done. Douglas—Corn is tasseling and silking and has an excellent color. Not much winter wheat planted this season, but a good many fields were injured by rust. Pastures excellent. Oats not as good as expected.

Holt—Wheat and oats nearly all cut, with about an average yield. Corn in good condition; stalks unusually large, well tasseled and earing sinely.

about an average yield. Corn in good condition; stalks unusually large, well tasseled and earing duely.

Knox—Harvest about completed. Oats are badly rusted. Wheat will be a little better than expected. Corn is in splendid condition.

Madison—Harvesting about over. Some oats threshed, yield light. An inch of rain the past tweek has placed the corn crop almost beyond doubt. Corn earing well and very promising. Sugar bests doing extra well.

Platte—Weather favorable for corn, and it is making a very heavy growth of stalk: nights a little too cool for rapid development of ears. Pierce—Harvest is in full blast. Wheat will be an average crop. Oats a full crop. Hay good. Corn much benefited by rain of the week.

Sarpy—Small grain mostly in the shock, but very little threshing done yet. Haying is pushing on rapidly. Corn looks well, and is in tassel and ears are starting.

Stanton—Harvesting in full blast. The last rain has put the corn in splendid shape.

Wayne—Harvest in progress. Oats in had shape, a light crop. Wheat average and good quality. Corn in very promising condition.

CENTRAL SECTION.

Bialne—Small grain being harvested and reconlines an excellent yield. Corn doing finely

shape, a light crop. Wheat average and good quality. Corn in very promising condition. CENTRAL SECTION.

Biaine—Small grain being harvested and promises an excellent yield. Corn doing finely and promises an abundant crop.

Buffalo—Oat harvest nearly completed and crop a good one. Corn is probably better than any grown in the country before.

Custer—Threshing commenced. Corn tasseling and some silking. Good week for corn and afalfa left for seed.

Dawson—Harvest completed. Oats not yielding as well as expected. Grass badly dried. The rains of the week of great value to corn. Greeley—Harvesting' hearly over. Wheat heads well filled, and but little damaged by rust. Corn earing sicely, but will need more rain to fill well. Stalks are unusually tail.

Hall—Small grain about all cut and some threshing done. Wheat a good yield. Oats very light. Corn bids fair for a big crop.

Howard—A favorable week for harvesting, which is now about completed. Wheat yielding moderately. Oats badly rusted, with little exception. Corn looks well; much tasseling and silking out, but needs rain.

Laup—Harvesting about half done; yield will be very light. Recent rains will save the corn and polatoes and greatly improve pastures.

Morrick—Harvesting about half done; yield will be very light. Recent rains will save the corn and polatoes and greatly improve pastures.

Morrick—Harvesting about all finished and threshing being done. Corn in allk and looking well generally, but heeding rain in some localities.

Valley—Harvesting almost done. Oats light

because of rust. Wheat blighted some by hot SOUTHWESTERN SECTION.

Adams Wheat about all cut and a good crop. Late cats fair, Corn in unusually good con-dition; potatoes fair, some complaint of retdiffon: potatoes fair, some complaint of rotting.
Chase-Alfalfa heavy and in stack. Hay
good. Corn built injured by drouth, except
in west part of county, where it is good.
Dundy-Alfalfa being cut and is a fair crop,
Corn needs rain; some pieces firing in eastern
part of county.
Furnas-Too dry for corn to do well in southern part of county. It is not injured yet, but
is not earing as well as it would with more
moisture. is not earing as well as it would with more moisture.

Harlan—Corn is all right yet and doing well, but it needs more rain to insure a full crep, Airaira being cut the second time. Pasture good. Fall plawing commenced. Kearney—Harvesting nearly completed. Small grain generally below average crop. Corn is in excellent condition, with prospects of a full crop. Hay good in yield and quality. Led Willow—The rain of the Erd helped the cort, but there are shough burn patches to shorten the crop. Harvesting nearly done, and some threshing. Small grain much below average.

Webster—Pastures are getting short and drying up in places. Corn is generally doing well, but is needing rain bally in some localities.

WESTERN SECTION.

Cheverne and Deugl—Hains of the 20th and

WESTERN SECTION.

Chevenne and Deuel-Rains of the 20th and 22d revived corn. Haying is under full headway, and a big erop will be harvested.

Lincoln-The rain of the 21st saved a great deal of the corn crop, which needed it very much. Pasture and potatoes were also benefited. Scotts Huff-Some corn beginning to ear, Affaira being cut the second time. Potatoes very good and early ones ripening.

NORTHWESTERN SECTION.

Box Butte-A wet week. Small grain too badly injured to recover, but carn coming out all right.
Cherry-Wheat is being harvested and will right well. Corn in fine condition.
Dawes-Small grain nearly all being mown for lay. Corn looking good. Potatoes need. Keya Paha-Wheat harvest well under way. Corn stiking and looking finely, Grasshoppers have damaged crops some.

Rock—The slow, drizzling rain of the 23d all soaked into the ground and about assures the corn crop. Corn has not rolled this season, and looks very fine. Hay is very light, but range feed is good. feed is good.

Sheridan-Cooler weather followed the light rain of last week, improving condition of small grain. Corn needs rain.

Corn Has Suffered in Missouri.

Collumbia, Mo., July 28—The Missouri weekly crop bulletin, issued today, sayer in many counties little or no progress has been made in haying, stacking or threshing, and considerable hay has been lost or badly damaged. Considerable wheat and cats in shock and stack have also been damared by heavy rains, and in a few of the central and south-western counties much damage has been done to flax. Corn has suffered some injury from wind and rain in a few localities, but generally the crop is doing well. Too much rain in south-eastern counties for cotton. Late paratoes generally promise a good yield. Winter apples are still falling badly, and the crop as a rule will be poor. Grapos average well. Corn Has Suffered in Missourt.

Too Much Rain in Iowa.

DES MOINES, July 28.—The Jowa weekly weather bulletin, issued today, says: Unusually cool weather and excessive rainfall have made very unfavorable conditions for harvesting and threshing, and grain in shock has suffered material injury. Onto received the greater damage, reducing still lower the condition of this unfortunate crop. A short period of dry weather is now much to be desired to give opportunity to save the unstacked grain. Corn is generally reported in good condition and there is an ample storage of moisture in the soil to develop and ripen the early and late planted fields. Too Much Rain in Iowa.

Too Much Water in Illinois. Too Much Water in Illinois, CHICAGO, July 28.—The Illinois weekly weather bulletin, issued today, says: Excess of water has resulted in very wet low lands, much flooding being reported and considerable damage to wheat, rye and oats in the shock, wheat and oats especially have begun to spreat, to mould, or to rot in many fields; and timothy, where unhoused, has been damaged. Threshing was stopped by the wet, and is just being resumed; plowing also, Corn has been benefited generally, and except on low lands is doing finely, although somewhat blown down,

Time for Growing Crops in Knnsas, ToperkA, July 28.—The Kansas weekly crop bulletin, issued today, says: A fine week for growing crops. Corn and forage crops are generally doing well; in some southwestern counties, however, rain is needed. In the eastern division peaches and grapes are ripening, but the wet weather is rotting many positives. In the middle division but little has been done in threshing or plowing on account of the dampness. In the western division harvesting is over, and threshing and haying have begun.

Nothing Wrong in Nebraska. LINCOLN, Neb., July 28.—The Nebraska, weekly crop bulletin, issued today, says: The past week has been cool, the average being about 5 degrees below the normal. The rainfall has been heavy over a considerable portion of the state and sufficient for inumediate needs in all sections. The small grain harvest is completed in southern counties, and is well advanced in the northern section. Corn has grown well, and there is every promise of an unusually large crop. The stalks are large and are earing well.

Minneapolls Wheat. MINNEAPOLIS Minn. July 28.—WHEAT—Lower; closing, July and September, 544c; December, 594c; on track, No. 1 hard, 56c; No. 1 northern, 55c; No. 2 northern, 544c; receipts, 147 cars.

ST. LOUIS, July 28.—COTTON—Quiet and steady; no sales reported; middling, 5-11-16c; receipts, 44 bales; shipments, 43 bales; stock, 25,89 bales.

'Frisco Wheat Quotations. SAN FRANCISCO, July 28.—WHEAT—Easy; December, 98%c; new sellers, 96c.
