Features of the Trading and Closing

Prices on Saturday. CHICAGO, Aug. 1.-There was an un-usual wheat market. It sold up the early on rainy weather, then turned weak and closed at 5515c for September, or %c below

Friday, Corn and oats each lost a triffe of their previous values and provisions gained a little. Hather a dull day was noted in wheat, the market exhibiting but little life and fluctuations kept within 'i.e. The feeling manifested was rather easy and fimil fig-ures showed a loss of 'i.e. The steadiness early was attributable largely to the wet weather in most of the winter wheat states.

ountry acceptances were again small and isignificant and St. Louis strong and laber and imparted some strength to the ituation. Argentine shipments were larger

Ritication. Argentine shipments were larger than last week, but still small. The small trade and the absence of foreign advices, owing to the bank holidays in England, were rather against the price and then local arrivals exceeded the estimates. Northwestern receipts too, showed a moderate increase. Grop prospects were not very favorable from the northwest. The local out inspection was moderate and four local clearings fair. The closing Paris 1 market was unchanged, as was also Antwerp. There was not much of a trade in corn, the market keeping within pace of the transactions principally between room operators. The opening was a little irregular and after selling up 5% broke ise, changed some and closed with ise decline. The late heavy lake enginements, small acceptances from the country and action of wheat were productive of the early strength. Cats were stronger, early, but weakened. The close, however, was at about the same to a shade over yesterday's, May being the strongest. The best solling was of 100,000 but, by a commission house, which was taken in scattered lots. There was an

Provisions were very firm considering the weakness of the grain markets. Some out-side orders to buy were met by sales from the packers. The whole of the day's ad-vance was not maintained, but September closed with a gain of 7½c, while lard and ribs each left off at an improvement of fac. A moderate day's business was done in the plt. Estimated receipts for Monday are: Wheat, 250 cars; corn, 1,600 cars; oats, 400 cars; hogs, 24,000 head. The ienaing intures ranged as follows:

market was better and there was a little more life and strength to the trade than usual at the end of a week. Beef steers sold a little stronger and it would be safe to quote the market 5010c higher on really desirable beeves. A few corn-fed cattle were offered, but none of them were good. A few head sold up to \$3.55, and two hunches brought \$3.56 and 33.55, and two bunches brought \$3.50 and \$3.55. CAUSE OF THE ALARM.

RESULT OF NEW ISSUES.

This is the significance of the revolu-tionary tendencies in politics which have found expression at the democratic and populistic sonventions. Few comprehend

tionary tendencies in politics which have found expression at the democratic and populistic sonventions. Few comprehend these aspects of the situation; and there-fore there is a general alarm at the signs of the times and most men are anxiously asking-what next? Thoughtful men, while feeling carnestly that these new political drifts must be promptly met by discussion and by the dif-fusion of information, are yet beginning to ask whether the situation really warrants the extent of alarm to which the public is yielding. So far as respects the silver question, competent judges have found no reason for changing the estimate so gen-erally conceded immediately after the con-clusion of the St. Louis convention-namely, that the maintenance of the gold stand-ard will be assured by the election of Mr. McKinley. As for the other issues sprung upon the country by the Chicago platform and nominess, it should hardly be a matter for surprised alarm if the revolutionary polities which have made such extensive headway in Europe should find sympathiz-ers in this country also.

VERY LIKE ANARCHY.

COURAGE AND CONFIDENCE RETURN

Investors Satisfied that Free Silver Cannot Possible Win, NEW YORK, Aug. 1.—Wall street had a

mild mannered week, compared with recent preceding activity. With scarcely an exception the net changes of the week are declines, though in few instances are they of any special consequence. A great ma-

ples of the new crop are highly satisfactory, but the yield per acre is reported not equal to that of last year. The market for wheat followed American advances, prices being 3d to 6d higher on the week. The quantity of offerings was reduced. Buyers were re-served and there was little doing. Califor-nia wheat prompt delivery, 28s 6d Parcels slow. Duluth wheat for August and Sep-tember, 24s, 75d. trap. The arrival of Mark Hanna to start the McKinky campaign vigorously has been an influence of consequence. The confident way in which Mr. Hanna talks of victory has given courage to the rank and file of sound money people here. The men who were despondent a week ago have become not only hopeful but really convinced that the danger of Bryan's success has passed away. This is a factor of the utmost importance quite outside of polities. It gives courage to investors, who, how-

by New York banks would be \$5,000,000, or more in excess of deposits. One year ago there was a margin on the right side of something like \$75,000,000 between loans and deposits in these same banks. An element in the situation not too encouraging is a fact that while the banks are now loaning practically \$7 per cent of their total de-toolts the rates they are getting are rela-tively small. 141070 OMAHA GENERAL MARKET.

posits the rates they are getting are rela-tively small. Probably less than 10 per cent of the loans in New York banks are drawing as much as 5 per cent net per anaum, wane 50 per cent of the loans are probably at 3 per cent or under. One significant feature in the New York banking situation is disclosed in a current review of commercial conditions sent out by one of the leading mercantile agencies, which says: EGGS-Choice stock, S@Sige. BUTTER-Common to fair, 7@7%c; choice t fancy, country, 11@12c. VEAL-Choice fat, 80 to 120 lbs., is quoted a Mc: large and coarse, 405c.

review of commercial conditions sent out by one of the leading mercantile agencies, "Many interior banks advised their cor-respondents that funds would shortly be taken out of New York deposit accounts for employment on Northwestern terminal elevator loans on wheat, rates for which were slowly advancing, but the New York institutions sought to keep these with-drawals as small as might be by notifying of a small increase in the rate of interest paid on balances when they thought it would be effective." Thus there may be some foundation to expect tight money during the next few months. But in a period when all business men seem quite content to go slow there are, I apprehend, no substantial reasons for nervousness on this account. As I have over and over again pointed out lately, bar-gain counter prices are being made this summer in Wall street. A prominent stock exchange firm summarizes what seems to me the right sentiment in a dispatch they sent today to out-of-town customers, say-ine: Jar's, per doz., \$3.69; Young Americas, 12c; twins, (ancy, IUSc.)
