Writes to the Governor of the Draining of a Pond and the Slaughter of More Than a Ton of Fish.

LINCOLN, Aug. 11 - (Special.) - William Garvin has written to Governor Holcomb from Cambridge, making complaint of the wanton destruction of fish practiced in that community. Mr. Garvin says that on the 23d of July last the water was let out of a millpend at Cambridge for the purpose of repairing the mill, and that this caused the destruction of fully 2,500 pounds of fish. Men appeared with pitchforks and threw the fish out of the pond by the bushel. Some of them took fish into Cambridge to the amount of 600 pounds and sold them for 10 cents per pound. He says he has notified the fish commission of the lawless acts of these people but that no attention has been paid to his complaint. He now calls on the governor of the state, as its chief executive, to right this wrong, and to see that the fish laws are

GERMANS LIKE WHEAT BREAD.

Consumption of Rye Flour Being Gradually Decreased. WASHINGTON, Aug. 11 -- Mr. Thomas Ewing Moore commercial agent at Weimar. Germany, has forwarded to the Department of State a report on the consumption of wheat and rye flour in that country. Since 1879 a more than proportional advance. As the United States exports large quantities of wheat and wheat four to Germany, Mr.

Moore says this is of great importance. The year 1895 was remarkable for an that thirty-eight counties are already organized in the state and that such organizations will be rapidly pushed until the entire state has a pretty thorough knowledge of the candidacy of C. E. Bentley pounds per capita and of rye its pounds per capita and of rye its pounds for the presidency. The thirty-eight counties already organized gave Bentley 15,444 votes in 1884, when he ran against Bryan for Entire that Mr. Bryan, who is attempting to served the prohibition vote, will be held; the four imports have steadily increased. corral the prohibition vote, will be badly left at the polls, as the Bentley people are since 1890, with the exception of 1895, when they became slightly lower than the previous year. The imports last year were \$2.557 tons of the value of \$1.475.690.

The United States furnished but 3,910 tons, a comparatively small quantity, and advantage. American four is more expen-advantage. American four is more expen-sive than any other kind and this fact ac-counts for small imports of that article. We would be much better off. In case of Advantage should be taken by the American farmer and exporter, says Mr. Moore, of the growing demand for these articles in throughout this broad land of ours.

Last Tuesday Mrs. Seiden of Persia, la presided over a home in the suburbs of that village, where her only duties are said to have been to tend chickens and look after her husband's meals. Miss Thomas, a neighbor, is a warm, personal friend of her, younger by two years and of an imaginative mind. Country life for both grew monotonous and the two determined to visit the sights of Omaha. Both husband and father believe that the couple are in hiding in this city and have been scouring about, accompanied by police officers, to find them.

have to draw the line somewhere and I think it should be drawn when we reach old lath and second-hand lumber. As long as such stuff don't endanger the health of the city it would seem as though it is
