

CONDITION OF OMAHA TRADE

Very Fair August Trade Reported in Most Lines by Omaha Jobbers.

COUNTRY COLLECTIONS HOLD UP WELL

Bank Clearings for the Year Show a Healthy Gain—Dull Month in Many Lines of Business, Especially in Cattle.

The course of trade during the past week was inclined to be slow and dull in all the different departments of the jobbing business, but when the monthly consolidation is made for the month of August great allowances must be made. This is the month when the jobber, as a rule, looks for very little business. It means that the buyer makes the goods later in the fall, if he does not conclude to cancel the order, but the actual amount of business transacted this month is not so much as compared with other months of the year.

The grocers are putting out a considerable volume of goods and the dry goods people are not slow in showing their goods in the factory trade. Lumber is slow and hardware is not very active, owing to the small amount of building going on at the present time.

Capital is timid and new ventures do not materialize very often; in fact every one appears to be content for the present to allow business to run along in the present channels until the future can be foretold with greater accuracy.

The crop reports give promise of a very large yield of corn, but the market is not yet so certain. It is expected that the fall market will be better than the spring market, but it is not yet certain. The cattle market is expected to be better than the spring market, but it is not yet certain.

STOCK YARDS TRADE SLOW.
At South Omaha this has been a dull month so far, owing to the slow movement of the cattle trade. The cornfed cattle from the farms and feed lots are slow and the market is expected to be better than the spring market.

BANK CLEARINGS.
During the past few months of the present year the total clearings at Omaha have amounted to \$12,948,114 as against \$12,948,114 for the corresponding period of 1895.

MANUFACTURING.
In manufacturing circles the interesting question the past week has been recording of the coming season. The members of the Manufacturers' association show a decline in activity compared with 1891, and the decrease is expected to be greater if we are to go back to 1890.

OMAHA GENERAL MARKET.
WHEAT—In unsettled though the day, light trading and weaker tone early, which was followed by a recovery to steady, quiet close.

RECEIPTS.
Wheat, 12,000 bu.; corn, 18,000 bu.; oats, 6,000 bu.
