RAVAGES OF DISEASE IN HAVANA.

Alvan H. Doty of this city returned from Havana, Cuba, this morning. He spent only two days in Havana because he found on arrival that it would be impossible for him to reach either Santiago or Cienfuegos, where he says there are alarming outbreaks of smallpox. He found that there was a great deal of yellow fever and smallpox in Havana and the surrounding country. The sanitary conditions are terrible. The whole city's sewage, he says, is emptled into the bay, and the tide is not sufficient to carry it to sea. Consequently the bay is a constant breeder of yellow fever, especially around the Rigna docks and military hospital. There were 300 cases of yellow fever and 100 deaths reported from the military hospital during the two weeks previous to Dr. Doty's visit. He is confident that the condition of the city of Havana is much worse than in ordinary summers, as the presence of unacclimate soldiers has a very bad effect.

He said that he thought the House would regard Balfour's statement as eminently satisfactory, adding that, considering the anxiety felt upon the subject throughout the country, and since the negotiations had assumed a shape which led to the belief that the papers on the subject would be communicated to the House at an early date, he hoped they would be communicated to the public as soon as possible. To this Mr. Balfour replied: "Yes, it is the desire of the government to communicate the papers as soon as this can be done without

rejudice to public interests." The Bradford Observer then states that it has been arranged that the question of the settled districts is to be solved in the following manner: "If they are held to belong to Venezuela, the British settlers are to be entitled to withdraw and will be compensated for whatever losses they may sus tain by such withdrawals."
