

THE OMAHA DAILY BEE

Published every morning. Terms of subscription: Daily Bee (without Sunday) One Year, \$3.00...

Advertisements: All communications relating to news and editorial matter should be addressed to the Editor...

Table with 2 columns: State of Nebraska, Douglas County. Lists names and amounts for various individuals.

It is already plain that Sewall's political ship will not come in this year.

An Omaha military company captures the Governor's cup this year. Omaha's winning ways are in evidence everywhere.

Wanted—Fifty active, trustworthy, enthusiastic substantial citizens to serve as directors of the Transmississippi Exposition association.

We must have good men for the city council. No councilman whose record is not straight should have the effrontery to ask a re-nomination.

With all parties pledged to the support of fraternal insurance the mutual insurance organizations can stand back and feel safe whichever legislative ticket wins.

A clean sweep for McKinley, MacColl and the republican congressional and state tickets is what will make Nebraska a favorite with investors and turn the stream of immigration once more into this state.

Coin Harvey says that he has taken an oath not to accept any political office in reward for his services in behalf of the repudiation cause. There is no threatening danger that Harvey will be tempted to repudiate his oath.

McKinley continues to make almost continuous speeches from day to day and he has not uttered a single sentence that has lost him votes. To do this requires something more than mere natural aptitude for public speaking.

One of The Bee's subscribers enters complaint that the motor line operating between Omaha and Council Bluffs is subjecting patrons to unnecessary discomfort in compelling them to ride in open cars regardless of the change in temperature. This is a matter that deserves immediate attention and remedy.

Two years ago the voters of the Fourth congressional district had their choice between E. J. Hainer and W. L. Stark and preferred to place their confidence in Mr. Hainer, the republican. They are now called upon to choose again between the same candidates and as yet no reason has been urged why they should not re-elect Mr. Hainer to congress again.

It is announced that an unknown agent has discovered a perceptible cooling of the earth in France and Belgium and the subsidence of the Swiss Alps. The unknown apparently has so little faith in his achievement that he is ashamed to have his identity known.

Tom Patterson, who pretends to be one of the candidates for presidential elector on the republican ticket in Colorado, has been billed for a speaking tour of Indiana under the auspices of the democratic national committee. Tom Patterson always posed as a democrat until he placed silver above everything else.

The Commercial club not long ago invited the Brotherhood of Locomotive Firemen to hold their 1898 convention in Omaha. Local members of the order took up the matter and have pushed it ever since, with fair prospect of success. This year the convention is at Galveston. Certainly Omaha is much more centrally located and presents inducements for conventions in 1898 than any other city can offer that year.

With reference to the pretense of the local Bryan organ that all the prominent clergymen are being converted to free coinage, a well known subscriber of The Bee residing at Fremont calls attention to the fact that a poll taken in attendance at the annual conference of the German Methodist Episcopal church, held at his former home, Pekin, Ill., resulted in 120 for McKinley and 1 for Bryan.

DESCRIBING LINCOLN'S MEMORY.

If anything were needed to prove Bryan to be as great an egotist as he is a demagogue, it is furnished by his attendance Sunday at the Washington church at which Abraham Lincoln worshiped and his occupancy of the pew which Abraham Lincoln had occupied while president.

This incidentally recalls the fact that on the 5th day of September Judge W. L. Greene, the poperaic candidate for congress in the Sixth district, had the liberty, during his speech at North Platte, to make the following declaration: I believe you will agree with me that in the history of this country this campaign will equal in importance the memorable campaign of 1860.

LUMBERMEN AND SOUND MONEY. The great lumber interest of the country is practically unanimous for sound money and protection. It has suffered severely from the Wilson tariff and the distress due to the free silver agitation.

Production and Prices. Do you know, we have been deluded by the epigrammatic fallacies of silver-tongued orators, that the production of silver increased from 61,000,000 ounces in 1873 to 187,000,000 ounces in 1896?

Workmen's Point of View. The free silver coinage that will increase the price of bread, meat, butter, fowls and everything else that the workman uses.

A Noble Theme Neglected by the Silver-Tongued Spouters. When Mr. Bryan was in this state he missed the opportunity of his life. Though he was eloquently about the "Crime of '73" he had absolutely nothing to say about the "Crime of 1896."

At the opening of the State university the chancellor sought to impress upon the students the fact that as a public institution the university is strictly non-partisan. Yet neither the students nor the university authorities can close their eyes to the inevitable shrinkage in resources which free coinage would mean for them.

But evidently the signers of the message to Mr. Bryan misapprehend the aim and purpose of the free silver party. It does not contemplate or desire international bimetalism. It counts that utterly and demands a financial system for the United States wholly independent of Europe.

But soon the Yankees, with that preternatural "cunning" for which they have always been celebrated, began to play a low-down trick on the worthy merchants of the province with a species of inferior wash money, made out of the "cheap" Dutch gold.

At the opening of the State university the chancellor sought to impress upon the students the fact that as a public institution the university is strictly non-partisan. Yet neither the students nor the university authorities can close their eyes to the inevitable shrinkage in resources which free coinage would mean for them.

But soon the Yankees, with that preternatural "cunning" for which they have always been celebrated, began to play a low-down trick on the worthy merchants of the province with a species of inferior wash money, made out of the "cheap" Dutch gold.

metallism, because that would cheapen the dollar and enable debtors to pay in a debased currency. Mr. Bryan proposes to strike down the gold standard, which necessarily means substitution of a silver standard.

Value of National Faith. With the latest fall in the price of silver bullion to 65 cents an ounce the silver in the dollar is worth just 59 cents.

Before and After Talking. Four years ago Mr. Bryan said in a speech: "You must attribute it to the inventive genius that has multiplied a thousand times, in many instances, the strength of a single arm, and enabled us to do today with one man what fifty men could do fifty years ago."

Bryan as a Financial Secer. Somehow or other Mr. Bryan is not a distinguished financial expert. Some after his nomination he predicted that free coinage would increase the value of silver in the markets of the world, and yet, not long ago he predicted that the market price of the commodity has fallen from 85 cents per ounce on July 11 to 67 1/2 cents at the present time.

Attitude's Example Spreading. Candidate Sewall appears to be like Atgold and all the other silverites. He is going to take the silver dollar for everybody else, and he is going to make every man know that he is the party of the first part that demands payment in gold or its equivalent.

Production and Prices. Do you know, we have been deluded by the epigrammatic fallacies of silver-tongued orators, that the production of silver increased from 61,000,000 ounces in 1873 to 187,000,000 ounces in 1896?

Workmen's Point of View. The free silver coinage that will increase the price of bread, meat, butter, fowls and everything else that the workman uses.

A Noble Theme Neglected by the Silver-Tongued Spouters. When Mr. Bryan was in this state he missed the opportunity of his life. Though he was eloquently about the "Crime of '73" he had absolutely nothing to say about the "Crime of 1896."

port a 1897 candidate, he practically brands as dishonest every sound money democrat who now accepts his invitation to remain with the party.

Value of National Faith. With the latest fall in the price of silver bullion to 65 cents an ounce the silver in the dollar is worth just 59 cents.

Before and After Talking. Four years ago Mr. Bryan said in a speech: "You must attribute it to the inventive genius that has multiplied a thousand times, in many instances, the strength of a single arm, and enabled us to do today with one man what fifty men could do fifty years ago."

CLAIMING THE EARTH.

Globe-Democrat (rep.). The democratic national campaign committee has sent out an estimate of Bryan majorities in New Jersey, principally notable for the fact that Maine and Vermont are not included in the list of claimed states along with Illinois and Indiana, Michigan and Ohio.

Chicago Post (rep.). Betting on the election is a serious matter. In some states it amounts to a criminal offense. But there is one state where it is not so serious on the result. This is especially true in regard to those who can figure out a Bryan majority. It is about the only fun they get out of the campaign.

Philadelphia Record (dem.). The Bryan headquarters have given out the figures showing the exact majorities secured by the free silver party in thirty-six states. He has 324 electoral votes. For more than necessary, it has been a hard fight, but the glorious results cause the candidate and his managers to forget the hard work required to win such a memorable victory.

Philadelphia Record (dem.). From the absurd to the ridiculous is an easy journey. In Connecticut the democrats endorsed Mr. Bryan and nominated Mr. Sargent, a millionaire manufacturer, for governor. In New York they fell before the blandishments of free silver and put a "gold-bug" in the ticket for governor.

New York Sun (dem.). To lead a forlorn hope for the sake of a principle is the finest proof of moral fortitude. Some of the great heroes of history have done that thing and their names are forever remembered.

Relations of Free Coinage to the Welfare of Workmen. This is a proposition which touches the bread and butter of the majority of all the American people, for the wage-earning class is by far the larger portion of our population.

Puncturing Bryan's Fakes. String of Silver Falsehoods About Iowa Shown Up. A few days ago a man came all the way from New York to study the political situation in Iowa.

more enter to the sensational appetites of his readers. The whole article is a string of falsehoods whose tendency will be to place Iowa in a disadvantageous position. The state of Iowa is not included in the list of claimed states along with Illinois and Indiana, Michigan and Ohio.

of silver and of general products, they would still be no better off than they are today. But no one has promised them any such advance of their wages.

Illustrated Monthly. That "blood will tell" the humblest born. Yet, as a moment's thought will show, 'Tis but a vain conceit!
