LOOKS LIKE COFFEE

But Made of Nature's Pure Grains—A Pure Food.

HOW ONE MAN SPENT HIS VACATION

THE ancient Germans were a sturdy race, and history records that they were great users of grains in their daily food.

ABOUT AN EYE-OPENER

You've heard of "eye-openers"—we have the best method—a man's glass to have his eyes opened—when it does him good—when he can see things as he hasn't in years before—our ophthalmoscopic test is infallible—no defect escapes—after this examination the fitting of glasses is almost mechanical—no hazardous picking out of specs here—every pair is fitted to the sight by a correct and absolute science.

A SHIRT AND A GLOVE

If you're going to have a time when glove styles were complete that time is now—not only the styles, but the prices—no one hesitates to wear a "Dent's" shirt and all the leading makes at lowest prices—and colored shirts—we just received our fourth shipment of these new designs in colored shirts with cuffs—\$1.50—the biggest \$1.50 worth you ever saw.

A GENUINE BOX CALL

We are going to put on sale—beginning today a real box call—in a lady's lace shoe—with kangaroo top—a heavy sole and pointed toe—a shoe that's as near waterproof as can be made—no rubbers necessary—you'll not appreciate this shoe until you see it—its great value for \$3.00—guaranteed as good quality as anybody else's shoe at one to two dollars more.

HONEST MONEY BUCKEYES

Oh! men—and those in sympathy with the Ohio man—should wear the beautiful insignia of the Buckeye state—we have them with the likeness of McKinley—the honest money candidate—photographed on the face—we've got a good many—but when the lot is gone we can't get any more before election—nice and inexpensive watch charm.

BODY BRUSSELS 87c

Today is the last day this week when you can get your choice of any Body Brussels carpet in our store for \$7.95—Bigelow's—Lowell's—Whittall's—Hartford's—all of them—your choice for \$7.95—carpets galore—there isn't a house in America that can buy Body Brussels for the price we're selling them today—unless they buy of us—\$7.95 a yard.

CHIEF U. S. INSPECTOR

Another Well Known Citizen Who Owe Health to Paine's Celery Compound.

WHEN PRICES WENT DOWN

This brings us to the beginning of an era that, notwithstanding certain marked fluctuations, may be described as one of gradually falling prices. The average prices on the farm in 1882 and 1883, and again in 1885, 1890 and 1891, were substantially higher than the average in 1878 and for the crop of the five years, 1887-91, taken collectively, the farmer received nearly 2 cents per bushel more than for the crops of the years 1882-86.

PERIOD

Table with 3 columns: Period, Total exports of domestic wheat and flour in bushels, Total value in dollars.

PERIOD

Table with 3 columns: Period, Average price of wheat in cents per bushel, Average price of flour in cents per bushel.

LOCAL BREVITIES

J. W. Johnson was yesterday morning fined \$1 and costs in police court for riding a bicycle on a sidewalk.

There was a rough looking man about the streets Thursday night, and he carried a quantity of postage stamps, but he disappeared before an officer could be notified.

Judge Powell yesterday morning granted a decree of divorce to Alice Dean from Robert Dean on the grounds of cruelty and nonsupport. The case was not contested, and the whereabouts of Dean being unknown, the decree was entered on default.

The Young Men's institute gave its first party of the season at Thurston armory last evening, and a well billed ball room was opened at the same time.

The Webster Flambour club will go to Blair this evening to attend a big republican rally to be held in that city. The club will meet at the armory of the Omaha Guards on Capitol avenue at 5:30 in the evening, and will leave the Webster street depot at 6:15 p. m., returning to Omaha about midnight.

The Myrtle Shriners will give an informal reception at Masonic hall election night, to which all members of the Knights Templar and Scottish Rite Masons, their wives and friends are invited. It is proposed to have a large supper which will be thrown the election returns, and there will be refreshments and dancing.

The telephone line between Omaha and Council Bluffs has been under construction for some time past, was completed last evening, the first messages being received by the local office of the company. The line runs from this city to Blair, from that point to Tecumseh, to Craig, to Oakland, to Lyons, and thence to Bancroft.

W. D. Gregory and wife applied for lodging Thursday night at the police station. They are on their way from Tennessee to the western part of the state, making most of the trip on foot. Thursday they traveled from Plattsmouth to this city. Gregory spent twenty-two years and was married in this city thirteen years ago.

A. Eadstrom threatened Mrs. E. Meyer, 1112 Jones street, at the woman's residence in all manner of ways Thursday night, and finally a policeman was called in. Both were arrested. Yesterday morning Mrs. Meyer was discharged and Eadstrom was sent to the county jail for twenty days on the charge of being drunk and disorderly. The man has figured in similar affairs several times before.

A spark from an open fireplace in the basement of 167 South Seventh street, caused an alarm to be turned into the fire department last night. The spark in question darted clear across the room and lodged in a sofa, where it smoldered for some time, and at length broke into a flame. The fire was put out by the firemen, and although the room was quickly cleared of its contents, it was found mostly to the article of furniture mentioned. The place is occupied by Mrs. Farmer, and the damage is about \$10.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

It will be seen from the foregoing table that while during the first fifteen years of the second period, the price of wheat, during the years from 1873 to 1883 silver fell more than 18 cents, per ounce, or 14 per cent, the price of wheat advanced 25 cents per bushel, or 2 per cent, and while during the last fifteen years silver has fallen 4 cents per ounce, wheat, owing to deficient harvests where the cost of production is at least 6 cents to 7 cents per bushel.

HOW ONE MAN SPENT HIS VACATION

THE ancient Germans were a sturdy race, and history records that they were great users of grains in their daily food.

PERSONS who stick to a plentiful diet of grains, bread, meat and fruits are reasonably sure to keep well. Much butter or sweets should be avoided, as the starch of the food is turned to sugar and finally to fat. Tea and coffee make themselves felt with thousands of Americans of the present day. They delay digestion, as shown in late experiments, and this fact explains the cause of the serious disorders which frequently come to old and steady tea and coffee drinkers.

A new drink, called "Postum Cereal," has lately been produced by a careful preparation of the grains, and it possesses the important elements of being fat-simile in looks like the finest Mocha coffee. It is a rich, pungent flavor and is easily digested by the weakest stomachs. It is a nourishing food, the most perfect character and is quickly taken into the system and into the circulation
