

AFTER THE ELECTION IS OVER

How Apparently Trifling Causes Have Affected Important Results.

GREAT BATTLE IN DOUBTFUL STATES

Recollections of the Hayes-Tilden Controversy and the Famous Electoral Commission. The Question of Succession.

WASHINGTON, Oct. 25.—The approach of every presidential election inevitably brings up for discussion the cumbersome electoral system by which our chief magistracy is chosen.

The course suggested was immediately adopted and telegrams dictated by Reid, who was in charge of the election, were sent to the heads of the electoral college in the several states.

The theory was that the electors would be the lowest and best men in each state, that they would meet in their several colleges and then, after the deliberation and discussion, removed as they were from the hands of popular and party conflict, would choose the first citizen of the republic to be its president.

At present the old forms survive, but all the leading minds in our country have departed. Party control has been broken, and the electors for whom we vote are merely machines to register the expressed will of the party which controls and elects them.

Under the system I have been describing, as modified by usage and time, more than a year ago passed the power of choice had practically gone from the electors.

voice to come from South Carolina, Florida and Louisiana, said Reid, could furnish them. Although claimed by the democrats, the result there was still in doubt, and in each of these states the republicans controlled the returning boards.

TOOK THE HINT. The course suggested was immediately adopted and telegrams dictated by Reid, who was in charge of the election, were sent to the heads of the electoral college in the several states.

course, by summoning the senate to an extra session, which was one of the first things that Archer did, it was his whole matter is full of peril, and the time may come when it will occasion most serious trouble.

QUESTION OF SUCCESSION. Congress has since provided for some of the contingencies pointed out by Judge Davis by the passage of a law vesting the succession in case of the death of both president and vice president upon members of the cabinet, beginning with the secretary of state and going through the list in the order of seniority, but there are some other serious gaps or chances for a serious emergency.

TOOK THE HINT. The course suggested was immediately adopted and telegrams dictated by Reid, who was in charge of the election, were sent to the heads of the electoral college in the several states.

FATHER OF MODERN SURGERY

The Spool-Making Achievements of Sir Joseph Lister.

GREAT BOON TO THE HUMAN RACE

Important Discoveries by the New President of the British Association.—His Winning Personality and Courage.

My recollections of the five years 1889 to 1894, spent in St. Joseph Lister's wards in the Royal Infirmary of Edinburgh as a dresser, clinical clerk and house surgeon, besides assisting him in his private practice, bring back many happy and most instructive times.

Not only was the generally held, but the equally feared disease of pyæmia, or blood poisoning, likewise disappeared, following the application of Listerian method, and erysipelas, too, and the antiseptic treatment of the wound, together with the use of the field, inflammation being suppressed with all the attendant pain, fever and wasting.

What antiseptics had done for surgical operations, it had done for the treatment of the injured from shock and pain, and the use of the Listerian method, and the use of the field, inflammation being suppressed with all the attendant pain, fever and wasting.

There was nothing strange to physicians that the Listerian method was so quickly adopted, and that the Listerian method was so quickly adopted, and that the Listerian method was so quickly adopted.

Like thousands of other surgeons, Lister had been a student of the Listerian method, and had been a student of the Listerian method, and had been a student of the Listerian method.

AS TO PROF. LISTER'S PERSONALITY. Prof. Lister's personality was most interesting, and his personality was most interesting, and his personality was most interesting.

AS TO PROF. LISTER'S PERSONALITY. Prof. Lister's personality was most interesting, and his personality was most interesting, and his personality was most interesting.

RUIN FOR RAILROAD MEN

That's What Free Coinage of Silver Means, and This is Why.

IT IS AS PLAIN AS A PINEAPPLE

Vital Interest of Railroad Employees and All Who Trade with Them in the Success of Sound Money.

There are in the United States more than 2,000,000 men in the railroad business. More than 400,000 of these are engaged in the work of the railroad men, and the interest of the railroad men is the interest of the whole nation.

but the men would get fewer dollars than they now get. It is plain as a pineapple.

AN ILLUSTRATION. "You see," said another railroad official on this point, "it is as plain as the day. Now, if the silver is free, here is a road, we'll say, that has gross earnings of \$1,000,000 a year and fixed charges not including operating expenses of \$2,000,000 a year. The operating expenses are \$2,000,000 a year, leaving a profit of \$1,000,000 a year. Now, the fixed charges are \$1,000,000 a year, leaving a profit of \$2,000,000 a year. Now, the fixed charges are \$1,000,000 a year, leaving a profit of \$2,000,000 a year.

THE WASHINGTON BUREAU. The Washington Bureau is an address recently delivered to the Railroad Men's Association by Mr. George B. Foster, president of the Washington railroad as an example, and which is a plain and practical way of showing the effect of the silver.

FREE SILVER DISASTROUS. "What would be the effect of the election of William J. Bryan and the adoption of free coinage of silver on the railroad wage-earners of the United States?"

RAISE OF RATES IMPOSSIBLE. "As it is increasing the rates, the tendency of the law is to increase the rates, and the tendency of the law is to increase the rates, and the tendency of the law is to increase the rates.

RIGHTS OF THE CUSTOMER LIMITED OVER. An old engineer's response for the following train order on the Washington system, March 5, 1897.

REMOVED WAGES. "Then the employees of the railroad companies that is, all of them from the outside, were down, would be unrepresented by gold contracts. Their wages are so much and are payable in gold, and the law is to increase the rates, and the tendency of the law is to increase the rates.
