Everybody knows that when a life insurance policy is paid, on which the deceased has paid premiums for a few years only (or perhaps only one year), the returns are very large compared with the investment. But everybody does not realize that the same may be true even though one lives to pay premiums for many years. That it is true, however, when the insurance is carried in the Mutual Life, is abundantly proven by the record of actual results on twenty old policies paid this year and shown on this page. The Mutual Life commenced business on February 1st, 1843, more than 53 years ago, and has already paid its policy holders more than \$411,000,000. Of this amount \$246,000,000 has been paid to living members and \$165,000,000 for death claims. For the future protection of its insurance contracts its assets on January 1st, 1896, exceeded \$221,000,000, of which over \$26,000,000 was surplus. The financial stability of the Mutual Life may be better realized by considering the fact that its resources are more than one-half the assessed valuation of all the real estate in the great state of Iowa. No man or woman can be over insured. If you are not well insured, or, as is more probable, if you are not insured at all, you will act wisely and prudently by insuring your life in this grand old company—and do it at once. If you wait another year you may be too late. If you wait six months you may be dead. If you wait three months you may not be insurable. If you are wise you will act immediately. The Mutual Life will write just the kind of a policy best suited to your circumstances and those dependent upon you. To be happy you must be contented; to be contented you must feel that your home is secure and your family provided for.			POLICY NO. 18,160, ISSUED IN 1857 AT AGE 30. At the lowest cost you can provide insurance for your family by a Mutual Life policy on which premiums are payable every year. At greater annual cost you can pay all premiums in 10, 15 or 20 years, according to the contract. In either case the full amount of policy is payable immediately on your death. IT DOES NOT COST!
 What nonsense to talk of going without insurance because of the cost! It does not cost. It saves. It does what you cannot do for yourselves, and would not if you could. It works nights and Sundays. It protects all the time. It makes men smarter, bigger, better, richer—and women, too.—Sayings.

Corporation sorrow would starve a goat—The company can pay your widow nothing if you are not in it, and your intention to insure will be of value to her only as a memory.—Sayings.
