MANDERSON ON RESULT OF THE ELECTION

In the East He Finds that Money is Coming Out of Hiding and Business Shows Signs of Improvement.

General Manderson returned home Friday after a ten days' trip through the east. He left Omaha soon after easting his vote for McKinley and in order to get a little rest after his campaign work. He visited Chicago, New York, Philadelphia and Wash- | time front, box seat, usual price, \$6,50; Monington while away, and came in contact with a number of men who are in a promipent position before the public at this time. Mrs. Manderson did not return at this time, but is visiting friends in the east. In an interview with a Hee reporter General Manderson spoke at some length upon the condition of many matters of public concern as he found them.

I see that you have been to the east, General Manderson. Have you anything to report as to any change of conditions since the election?"

Yes, there is a marked and important change. There is already a restoration of confidence that has meant the taking of money out of places where it was hoarded and its investment in new and valuable industries. Many establishments that have been closed for months have opened with a full force of artisans; many that have been running on short hours have increased their

"Do you think this is the result of the election of McKinley?"
"Decidedly so. The election of Mr. Bryan would unquestionably have made the late bad condition infinitely worse. It would have produced a panic and disturbance greater in ill results than anything that this country as undergone in its history. The conditions both at home and abroad are favorable to a greatly improved condition in the future. a greatly improved condition in the induce.

The rise in wheat, which is a most marked contrast with the fail in silver, means an advance in all food products. While this advance is to be attributed in part to foreign conditions and to a lessening of foreign production, the increase of em-ployed labor at remunerative wages means. I firmly believe, a continued demand, the increase of which will mean an additional price for the products of agricultural states. ad Nebraska will feel the good effects EFFECT ON NEBRASKA.

"What effect, if any, has the political result in Nebraska had upon the state in the

estimation of the cast? heard general expressions of regret that Nebruska was not associated with lowa, Wisconsin, Minnesota and Illinois, rather than with Kansas and Missouri. Undoubt-edly the loss of this state to the cause of sound money and reasonable protection has injuriously affected its credit. It will mean hositation on the part of capital to invest in our securities, not from any spirit of re-taliation, but because of fcar of adverse and unfair legislation. I talked with many men in Philadelphia and New York and I think I convinced those with whom I talked of the fact that I believed that the state officials-elect and the legislature-elect in this state will pursue a conservative and credit-saving policy. I am not one of these who believe that all the wisdom and all the patriotism is confined to the party to which I belong and I feel secure in the belief that the party that will come into possession of the state's interests in January next will pursue a course of wisdom and conservatism. All that is necessary is for us to establish that fact and the credit of Nebraska will stand where it always has stood-the highest of namissouri states." 'Were you in Washington during your ab-

I think that such a removal would be injurious to west-ern interests. The Crows occupy an enor-mous body of land, through which the Burlington road runs, and instead of there being an increased number of Indians places being an increased number of indians placed upon the reservation parts of it should be opened to settlement. I found that the matter had not yet progressed very far and I hope that our efforts to prevent this increase of Indians upon the reservation will

Our govern-ment has by that result taken a long stride in the direction of international arbitration and I believe that an international court of arbitration, such as was spoken of by the lord chief justice of England in his address last summer at Saratoga, will be had before many years. 'Did you hear anything concerning Cuban

affairs?"
"Nothing but rumors such as fill the news papers, but I have no idea that there is any danger of this country going to war with Spain on that question. If Cuba is to be acquired by this country it would be infinitely better that it should be purchased rather than by conquest." rather than by conquest."

Retailers Report that Buyers Are Becoming Numerous.

Omaha retailers announce that the im provement in trade that was noticed during the first few days after election continues and that the prospects for the early winter business are better than for two

or three years past.

During the excitement of the campaign comparatively little business was done, and now that there is a general feeling that better times are at hand buyers are more nu-merous than at any previous time during the year. A number of establishments that have been making big drives in certain lines have enjoyed a patronage that they consider extraordinary, and the general trade has shown marked improvement in

Advice to Omaha. You will never forget that old adage, "Be sure you are right, then go ahead," imsure you are right, then go anead, im-parted to you by a doting father almost as soon as you were put in knee pants. It was intended as a caution and guide for your whole life. A little fater when you had grown to mature years and were capable of assuming some of life's burdens, you were given another adage to encourage you in any undertaking. It ran like this, "He who healtates is lost." Of course you remember them, and how often you have called upon this advice to caution, and then nerve you in carrying out your plane.

HIS OWN CONSTRUCTION OF LAW. City Treasurer Edwards' Views

Delinquent Taxes. The action of the city council in direct ing Treasurer Edwards to remit a part of the interest in one or two cases of delinquen; taxes has brought out a number of similar requests from property owners, who were also anxious to get rid of paying the interest required by law. As the treasurer had re-fused to obey the council in this particular, the applicants will not be successful in evading the interest. Treasurer Edwards decided that to accept any taxes at less than the regular rate of interest would be a plain violation of the law for which he would be accountable on his bond. Consequently the action of the council in the first case goes

He answers the description of one of the men so closely that the Storm Lake authorities will be asked to come here for the purpose of identification. The two es-caped men are wanted for burglary. Cameron made the Young Men's Chris-ian association his headquarters. He was irrested because he had written a number of letters to a 10-year-old girl whom he met on the street. After his arrest, letters were found on his person bearing the names of Alfred Schaefer and Fred Cyes, in addition to the one he gave. He asserts that

FAILED TO KEEP THEIR DATE. Stars that Promised to Shoot Did Not

Shoot. The shower of meteors which, according o the anticipations of the astronomers, was to Illuminate the celestial arch Friday night failed to put in an appearance. Whether the cosmic wanderers were sidetracked by some of the rival planets or whether the times were so hard that they could not afford their customary jaunt is uncertain. Perhaps they were disgusted over the elec-tion and decided to give Nebraska a cold shake or maybe they wanted to fool the scientists who had bragged of knowing al-most the exact minute when they were scheduled to appear, but, anyhow, they kept away and any one who laid awake beping see the celestial pyrotechnics was disppointed.

According to the scientists, this spectacle of shooting stars recurs once in about every hirty-three years. It has been observed at intervals for more than 1,000 years, the display varying materially in its extent and brilliancy. This is not the first time that the celestial disturbance has run away from schedule time. Its last previous appearance was fixed for November, 1867, but in this case it appeared a year earlier. The display not nearly as remarkable as the one of but it was observed and commented on all parts of Europe

According to the time card which has been stablished during thousands of years, the ilimax of the present fall of meteors is an-dicipated in 1899. But it was expected to appear less abundantly at the same date in he three previous years, and scientists have tenerally predicted that an exhibition of the henomena would be visible last night. So ar as this particular portion of the hemi-phere is concerned, the predictions failed to hold good, and, although a good many people took pains to watch for the dis-play, not a single shooting star appeared. Pather Rigge of Creighton college says that in his opinion the scientists were a little ahead of time in their predictions. He has globes are beautiful. there would be no prosecution. Therefore when the cases are called in the district court they will be nolled. This action will be based on the wish of the relatives of the couple, and also on certain conditions which the Smiths have agreed to.

As a matter of fact, the relatives, while they have taken the part of the little girl, have never been very anxious to prosecute Smith and his wife. On the other hand, they were determined that the couple should Smith and his wite. On the second of the couple should they were determined that the couple should no lenger have the little girl. BACK FROM THE ST. LOUIS MEETING Talks of the Joint Letter from the

Commercial Clubs. Freight Traffic Manager Munroe of the Inion Pacific has returned from the St. Louis conference of railway officials. He said yesterday morning that the joint letter of the commercial clubs of Omaha, St. Joseph.
Sloux City and Kanass City, protesting against any change in rates that would mean against any change in rates that would mean the granting of carload rates to less than carload shipments, would undoubtedly be considered by the Western Classification nmittee at its meeting in St. Louis on Tuesday.

Mr. Munroe also said that though the Chicago jobbers would like to see such a move and though they would probably receive the support of eastern lines in the matter, he did not believe that they would be able to accomplish what they so ardently de-sired. He said the question was like the measles, it broke out every few years, and though always failing in a successful termination, it was likely to break out at any time.

Kept His Own Secret. The members of the Union Pacific's passenger department were much surprised Friday evening to learn of the marriage of Louis Beindorff, one of the clerks of that department. NOT A PARE.

There is a Reason for Selling This Clothing So Cheapty. The great Hell Clothing store of Chicago has been placed in the hands of receivers. To dispose of this vast stock of goods valued at \$250,000, they have placed it on sale at several different places. Omaha, 1514 Doug-las street, is one of them. Economical peo-ple will find it to their advantage to investi-gate this sale now in progress. As a sam-ple of the bargains offered we quote these. They are surely worth attention. hey are surely worth attention: Men's good wool pants, the regular \$1.50 \$10,00 Hats \$4.98
