Men Employed in Preparing Lists Ask Pay for the Actual Time Engaged and Will Fight for It.

There premises to be a merry war between the members of the Board of Supervisors and the Election Registration board The controversy has arisen over the action of the board in reducing the bills presented by the registrars for their services at the general election this fall. The registrars general election this fall. The registrars had a little conference among themselves and all agreed to fix the price of their compensation at \$25 for the five days' work performed. The county board also had several conferences on the matter and came to a conclusion that was equally definite and unanimous. They cut the bills of the registrars squarely in two. Two years ago the board allowed \$25 for four days' work, but this year they were gov-erned absolutely by the recent court de-cisions holding that a calendar day con-tained twenty-four hours. The law declares that the compensation of registrars may be fixed at 25 cents an hour, and it has been generally understood that this is the loweat amount the registrars shall receive. For the actual time put in in the registry offices this would amount to \$18, and the men based their claims upon this law and concluded their claims upon this law and concluded that the additional time they were obliged to work on the books during the days when they were not sitting as registration heards entitled them to the additional \$7.
