In other words, can such an assessment as is provided for in sections is 30, 21 and 22 of the act be legally levied in such a case as this? Assume that the only theory of these assessments for local improvements upon which they can stand is that they are imposed on account of the benefits resolved and that no land ought in justice to be assessed for a greater sum than the benefits received by it, yet it is plain that the amount of the benefits is not susceptible of that accurate determination which aspectations to a demonstration in geometry. Some means of arriving at this amount must be used and the same method may be more or less accurate in different cases involving different facts. Some choice is to be made and where the fact of some benefit accruing to all the lands has been legally found, can it be that the adoption of the advalorem method of assessing the lands is to be held a violation of the federal constitution? It seems to us clearly not. It is one of those matters of detail in arriving at the proper and fair amount and propertion of the text that is to be levied on the land with regard to the benefits it has received which is open to the discretion of the state legislature and with which this court ought to have nothing to do. The way of arriving at the amount may be in spone instances inequitable and unequal, but that is far from rising to the level of a case of taking property without due process of law. taking property without due pro-

numbers of districts have been formed under the act and a very large indebtedness already incurred, and that more will be necessary before all the districts will be placed in efficient working condition. All these moneys, if the net be valid, must eventually be repaid from assessments levied upon the lands embraced within the respective districts, while the annually recurring interest upon these moneys is respective districts, while the annually recurring interest upon these moneys is also to be repaid in the same way. Taking the California act as a model, it was also stated and not contradicted that several of the other states which contain portions of the arid belt (seven or eight) had passed irrigation acts and that proceedings under them were generally awaiting the result of this litigation. The future prosperity of these states, it was claimed, depended upon the validity of this act as furnishing the only means practicable for obtaining artificial irrigation, without the aid of which millions and millions of acres would be condemned to the idle and worthless, which otherwise would furnish enermous quantities of agricultural products and increase the material wealth and prosperity of that whole section of the country.

A few weeks ago she appeared at the home of her parents and asked permission to remain there until she could get something to do, which request was granted. Saturday morning the quest was granted. Saturday morning she appeared at the Berwick block and asked if Bell and his wife were there. She was told they were and was shown in upon her husband and the West woman.
