Interest in the Contest.

Considerable interest is being taken inthe approaching contest for the justice of the peace offices. Justices Vien and Cook, whose elections are being disputed by J. R. Lewis and George Haynes, have decided on A. S. Hazleton as their representative context board. The democrats have settled upon W. H. Ware to look after their Interests and Chairman Kerney of the Board of Supervisors will be the third member of the board.

Up to the present time J. W. Ferrier has not in any way figured in the contest, as he was generally conceded to have been de-fcated by Ambrose Burke. He has filed no mitest papers, but it is understood that will figure in the contest if any evidence developed tending to show that some of the ballots cast for him or any of his op-ponents were improperly counted. One of first questions that will come up before the board will be the scope of its power In making any changes from the returns of the canvassing board. Ferrier will insist that the beard will have to count all the votes cast for justice and if the result should favor him he would be entitled to a certificate of election just as much as if had instituted a regular contest proceed-
