STORIES OF THE "BLACK ART"

Amusing Experiences and Tricks Played by Herrmann the Great-

HOW HE SOAKED THE SULTAN'S WATCH

The Famous Shooting Trick Saveessfully Worked on Murderous Arabs - A Batch of Interesting Reminiscences.

The public stock of harmless pleasure has been Impoverished by the death of the famous necromancer, Alexander Herrmann. The English-speaking world know and admired hun, and lavished fortunes upon him for the enjoyment he gave. A prince of entertainers, socially as well as on the stage, he was beloved by thousands young and old, who had been at various times charmed and mystified by his art.

Among his intimates, Heremann was no less entertaining than on the stage. The innumerable tricks with which he mystified the public were often played upon his friends. They served the dual purpose of perpetrating a practical joke and intensifying public interest in his mystic busi-Countless stories are related of his experiences, some of which were con-tributed by the wizard himself.

Herrmann was a terror to waiters. A fa-verite pleasantry was to keep the waiter running after salt or pepper. He would running after salt or pepper. draw the waiter's attention to the fact that was no salt on the table. The cellar would be brought and Herrmann would pick it up and shake out the pepper, look angry and insist on sait. Hefore the waiter was through he would have the table covered with the sait and held salt. ered with pepper boxes that had held salt when the waiter brought them.

He moved in a mysterious way to per-form his liberal acts. Of a Christman eve he delighted to walk through the poor quar-ters, pulling dressed turkeys from his vest pocket and giving them to poor women. He has disposed of piles of stuff in a short walk, getting it from pockets that had not bulged, but that apparently had no bottom. It is related that once Herrmann was a t on board a ship at a South American He scared the Chinese waiters nearly o death by pulling bottles, glasses and gold bleces out of the mouth of one of them Finally he picked the waiter up and shook him. There was a rattle as of thousands of gold pieces. Some time afterward the Chinaman was killed and cut open by his com-panions, who had hoped to enrich them-

In the New York Stock exchange he took eggs out of the brokers' pockets and changed them into live pigeons and chickens. He transformed bags of wheat and corn into coal and grew a banana tree in his silk hat from which the men picked ripe bananas. Sometimes his tricks were very pleasant. He bought some oranges them open and found gold pieces, which he honestly insisted upon giving to their owner. But the woman could not be prevailed on to sell any more of her fruit and ent them all open in the hope of finding some more gold pieces. In Chinatown, San Francisco, he performed a similar trick with eggs bought of a Mongolian. The latter seeing gold drop from the broken eggs took the balance of his stock indoors and prospected for gold on his own account. "oman on a Cincinnati street, cut prospected for gold on his own account. TRICKS AT WHITECHAPEL.

Once, about three years ago, the wizard was a guest at the Whitechapel club of Chicago, that rendezvous for Chicago boemians so well remembered for its strange On the night in question a venerdoings. On the hight in question a venerable Japanese archbishop was also present. In the course of the evening Hermann picked up a deck of cards and asked some one to select one of the pasteboards. This was done and proved to be the seven spot of clubs. This was shown to the spectators, but not to the magician. The card was replaced in the deck, which was shuffled, and

then scattered about the room.
"Now, gentlemen," said Herrmann, "If
one of you will kindly unlace the archbishop's shoe you will find there the card which was drawn from the pack. After a brief protest by

and gentle old man he unlaced the shoe and there, to the amazement of all, was ound the seven spot of clubs. The look of wonder on the face of the old Japanese prelate afforded the wizard much pleasure On another occasion, during a visit to this same club, Herrmann took two packs of cards, and, putting them together, an-nounced that he intended throwing one of them in such an accurate manner that it would stick under the woodwork lining the upper ceiling. The space into which the thin card must be thrown was almost invisible, and the distance from where Herr-mann stood was perhaps twenty feet. After exhausting every card in the two packs but one he glanced slyly about him, and then, quick, deft movement, lodged in the little crack, where it remained until the club went out of existence One of his favorite and most difficult tricks was the painting of tilliard balls. Often-times when visiting his newspaper friends he would scoop up three or four of the ivory balls, and by a cluck of the tongue cause them to disappear. This trick, done with

coins or small articles, was very common, but when done with billiard balls amazed all Such tricks as pulling live i chiekens, rabbits and guines pigs out of the pockets of his friends were of common ocwhile chatting socially on the streets.

A MEAL FOR A FRIEND. Remenyl, the great Hungarian violinist was an intimate friend of Herrmann, and the latter often had much good-natured fun at the expense of the celebrated fiddler. At just as the latter was about to partake of his ! midelight lanch of limburger checae, pumper-nickel and apollinaris water. "Had your luncheon yet?" asked the ma-

gician of his friend.
"No, just going to order it." "Well never mind doing so. I've got every-thing all ready for you," and without more ado the magician pulled a large and odorous cheese from the coat-tail pocket of the vio-linist, a chunk of pumpernickel bread from Remenyi's breast pocket and a bottle of

epollicarts from beneath his chair. Remenyi fell to and was heartly enjoying the joke, as well as the remat, when he was visited by Herrmann, and by a quick movement be abstracted from the tail pocket of the proprie-tor's cutaway coat a large bottle of cologne,

which he uncorked, and placed on the table. friend drinking a decection of sherry and sel I also bad an experience.

sees the professor face what looks like certain death, and then smilingly present to the gaze six bullers that, necerding to all laws of mechanical force—if the laws are not individual, from the cabin boy on the force of mechanical before on the have gone clean through him. A squad of picked men under command of Sergeant Patterson, con-

sisting of Privates Baker, McCarthy, Wiles, With this trick I certainly should be put in Menry, Whitney and Yachn, marched out from: but I called for a fishing line and, inupon the stage. They had been secured by stead of showing my anxiety, proceeded at permission of General Forsythe, who had at once to do a little fishing, while every one first to refer to the matter to General Miles, looked at me, not so much with astonishment and they are sharpshooters. Herrmann went as with pure disbelled in my ability to realist the line, examining each gun, and then retired to the background, where he remained. Sergeant Pattersen took a common china plate and every soldler took one cartificate from his last and devery soldler took one cartificate from his last and devery took one cartificate from his last and the last china plate and every solder took one cartifies from his belt and dropped it on the plate with a clink. The sergeant holding the plate before him, went among the spectators, and General Foreythe, Police Commissioner Gunst, Alf Bouvier and others selecting a builet apiece, marked it and dropped it back on the plate. Next the sergeant went back to his men, still holding the plate in front of him and in plain sight of everybody. Each sharpshooter reached out, took a cartrage between his thumb and finger and loaded his riles at the word of cuminand. The squad marched out on a temporary platform erected in front of the squad marched out on a temporary platform erected in front of the squad marched out on a temporary platform erected in front of the back of plate their beards; but on this occapions of the squad marched out on a temporary platform erected in front of the back of plate their beards; but on this occapions. stage and twenty-five feet away. Every impression and dignity. Reaching the temporary platform, the soldiers about faced, forming in two ranks, those in front kneeding. Hermann came forward to the center of the stage. Perhaps he looked a little nervous. He held in his hands a fragile descent plate. He held in his hands a fragile descent plate in readiness. There were the quick words of the sergeant, a roar like the roar of a cannon. Hermann leaned backward, bracking himself as if stemming a flerce wind. ing himself as if stemming a flerce wind. Recovering himself, he brought the dessert

Recovering himserf, he brought the dessert six bullets. They were hot, too hot to hendle, but the men who had marked six bullets while iterroans was at the rear of the stage examined them eagetly for each case the mark was quickly recognized."

When Herrmann tried that trick to Havana the speciators thought his bullet-proof condition a reflection on their soldery, and supersted a market for him and he had and suggested a mochete for him, and he had

The shooting trick was performed in New York last summer for the benefit of the Her-ald's free ice fund, and soldiers from Gov-ernor's Island did the shooting. It excited much wonderment and discussion, but only one satisfactory explanation was given as to the manner in which the trick was perrmed. The plates used to snow the genuine diets also concented blank cartridges. By sching a spring, the real exchanged places with the blanks, which, of course, were used by the soldiers. The plate which Herrmann held as a sert of a shield contained the hot builten concealed, and after the firing, were erly sprung to the exposed surface of the

THE BITER BITTEN.

Some of his marvelous adventures were de-ited by the famous necromancer in the orth American Review, a few years ago. I paid a visit to the Paris bourse," he wrote, fore the asphaltum pavement had been ut down around the square upon which that reat monetary institution stands. The streat monetary institution stands. The square was then paved with a regular block pavement, which, owing to the great travel, was frequently out of repair. While inside the edifice I had seen the stock brokers and heard them how! in their frenzy of speculation, and my mind had wandered off in altocather a different direction after I got out and stood on the broad granite stairs of the emple of Mammon with a few of the stock brokers, friends of mine, who had gathered around me and asked me to "do samething."

A gang of workmen stood directly before gang of workmen stood directly before, and one of the stockbrokers said, "Why a't you play a trick on them?" I thought would. I walked down the broad stains aging the payers and extracted from under among the pavers and extracted from under one of the cobbicatones a 100-franc gold coin, which is about the size of one of our double eagles. Instead of being amazed, the paver simply looked at me and said, 'moitte,' meaning half. There was a law, at least at that time, in France, that the finder should have half of anything found. I, naturally, did not want to give up half, and I thought it would be a good thing to find another coin, so as at least to show the fellow that it was a trick, and straightway I put my hand down again and brought out a five-franc piece. The paver looked at me again, his face wreathed in amiles this time, and once more he said, axer looked at me again, his face wreathed a smiles this time, and once more he said, half," which would be 52½ francs, rather good day's carnings. Well, as I did not seem willing to give up half, as he wanted, he began to talk loud. I then changed my had began to talk loud. I then changed my sastles, explaining to him that it was a had for some time before been practicing a bad for some time before been practicing a bad for some time before been practicing a he workman, and his wild gesticulations and loud talk having collected more than 500 "I began to he 600 people around us. I thought it best to the manner."

elieve that the fool is far more dangerous.

BEFORE THE SULTAN. "In 1863, when this country was engaged finally made up my mind to accept.

Toward evening a gorgeously uniformed escort came to my hotel and I was driven to one of the great palaces overlooking the Golden Horn. It was April, and one of those lovely evenings that one sees in the Orient, as one looks across the beautiful waters that divide Europe from Asia.

"One of the chamberlains entered and gave me to understand in French that I was o appear before his august sovereign. led the way to a magnificent hall gloriously ism, and I was shown to a raised platform with damask draperies. The room was one pockets of his from the hat bands and shee tons of his acquaintances, even great big circular arches on all sides hung over with silken curtains.

"The first thing I did when I got on the platform was, naturally, to look for my audience, but only one person sat in the addle of the room, an elderly, portly gen deman, with a nicely trimmed black beard and a red fez. I at once recognized his and a red tes. I at once recognized his august majesty, the sultan of the Ottoman empire, and he in return, with a twinkle of his coal-black, brilliant eye, gave me a sign of recognition, which I supposed was a signal for me to proceed. From every came faint wisperings, which intuitively told me that while my audience in the front con sisted of one only, there were a numbe concealed behind every bit of silk and every rillar. I afterward found that I had appeared before over 500 persons, including the entire harem, and I did not like it. "I went through a number of experiments

which seemed to please the sultan very much. He paid as much attention to m that the other guests objected to the horcu-lean offer emitted by the cheese.

"Oh, well, we can fix that all right," said could see in the twinkle of his eye that he was trying to fathom the mystery of my black art. He falled, however, and before I left Stamboul I was commanded to appear before him on his pretty yacht, which

Once in the City of Mexico, he came upon a friend drinking a decoction of eherry and a friend drinking a decoction of eherry and egg.

"Here, take the mother of that egg along with the drink," said the magician, who produced from some unknown region a live chicken, which perched on the drinkers.

"How do you do those things?" was asked by a witness of the trick. "Dou'd carry those chickens around with you?"

"I do not carry them about me, as you can see," answered Heremann, unbuttoning his coat and rolling up his friend's hat from an adjacent chair, he shock out a rabbit, which he did. I then said ("Will your and personally it was not etiquetic to take anything that Prod." Scores of such tricks could be told of the dead man.

THE SHOOTING TRICK.

Less than a year ago one of the apparentials may be formed with me for making the requisit. It, and the looked just a little bit as the watch to me was thus described by a San Francisco newspaper after a performance in that for a second and personally it was not etiquetic to take only the defense was that the prisate of the dead man.

ing but 'Herrmann, the Great.' In every block, on every street, and in every bazza there was nothing talked of but the wizar and the watch, and I was just thinking the I owned not alone Turkey, but all of Asi Minor, when I was awakened rather abruptl to the reality of the situation. After havin breakfasted, feeling very much satisfied wit myself, I looked over the baleony and sathat I was the observed of all observer. The attendant informed me that his imperi majesty had deigned to send a message me. I at once, in a grand and eloquent ma ner, instructed the slave to admit his male ty's dispatch bearer. I stood in the middle of the room, expecting he would salaam to the greatest man on earth at about that time. Well, he entered and he salaamed, and put a bag loaded with 5,000 plastres before my feet, and over his head he handed me an envelope on the outside of which were numerous hieroglyphics, which, of course, I did not understand. I tore of the envelope quickly, and imagined that some new honors had been showered upon me. To tell the truth, I had an idea that I would be made a commander of the Medjidie. The message that met my eyes, pure French, was, "You are advised to leave Constantinople instantly." That was a nothing more and nothing less. I had I That was al fore been in Mohammedan countries, a knew to a nicety what it meant. I look at the slave and dismissed him, not quit as grandly as I received him, and looke out of the window, where I saw an Englis steamer puffing the blackest kind of blac smoke from its funnel. I knew it belonge

ever, wholly devoted to sovereigns, and there are some incidents in his history that are rather unpleasant. One of these happened

oon after I left Constantinople.
"I had mapped out a tour of northern Africa and landed in Algeria. There were no railfoads there then, and I had to travel, as I did in India and South America, chorseback. After appearing successfully some of the towns near the coast I starte boldly for the interior, and in a short tim encountered a tribe of Arabs, who mad me a prisoner, and, in spite of all my gestic ilations and attempted explanations, tie ne to a tree with the evident intention outting me to death. It was a situation which I hope never to be placed again, bu I was young and full of spirit, and I though

Cob Sands' Battle for Life in the Shaft of a Mine. Bob Sands, boss of the Buzzard mine at Dakdale, lies at home suffering from wounds and bruises received in a fight with a wildcat, relates the Cleveland Plain Dealer. That he is alive seems a little short of miraculous, for during his tussle with the beast both fell into a 100-foot airshaft.

He left home Friday morning to hunt quail, and as he did not return his wife gave the alarm and a searching party was formed. Crowds of twenty-five each went in different directions, after agreeing to meet at the Buzzard airshaft at 2 o'clock. The men had hunted all night, when Tom Wirt said he thought he heard a noise in the shaft, and, going to the opening, he secred down into the dark hole. He heard a low mean coming from the bottom of the shaft, 160 feet below. The men could not The case of Marie Barberi, concluded last go down into the shaft, as there was no week in the New York courts, was one of ladder, so they ran to the mouth of the the remances of criminal jurisprudence, say: mine, one mile away. evolution of the whole fairy-like structure.

When the party reached the opening the will make a surprisingly beautiful setting. I question whether the greatest wrong aims boss was found to be in a terrible by day, while at night the effect will be done the children of the poor in the past andition. His face was terribly cut, his dazzling beyond description, as electric has not been the aesthetic starvation of their

sixty-four bells, accompanied by a huge steam organ, a procession of ti'anic agures will move from a door in the clock tower and encircle the zerial balcony. The figures will allegorically represent ballooning, steam,

railways, telegraphy, and photography. A night they will be rendered magnificent b

And high above all, on the extreme sun

It is the general opinion in Paris that ing wunder of the exposition of 1900. Many other suggestions far more startling have been made, but none that combines such practical features with probabilities of s creat a financial return and popularity so enduring.

You cannot deny facts, and it is a fact that Salvation Oil is the greatest pain cure. 25c. A BETTER NEW YORK. Reforms that Have Been Adopted in

the Metropolis.

Upon the road which New York has been treading this half-score years, says the Century Magazine, there is at last no turning back. The streets evacuated by the trucks have been occupied by the children the truckman's with the rest, for the want fixed this height, that he was planning a of better playgrounds, and the truckman has abandoned the fight; and where they crowd thickest, playgrounds of their own are being fitted up for them in school and "Hereafter no school house shall be constructed in the City of New York with many, and the building referred to above in connection with the same," says one of will have thirty when completed. But the the briefest, but most beneficent laws ever Parlsians will doubtless meet the American cuacted by the people of the state of more stories. New York. It is all there is of it, but more stories. New York it is all there is of it, but stands for a good deal. No child r more stories.

As planned, the revolving tower will be ivided transversely into four grand despoiled of his birthright—a chance to ivisions. The two lower will have five floors play; and as for the streets, does any one persuaded to barter away their clean and public, each with a gorgeous, almost magical, whirling dust clouds, the summer stenches display of the grandest and most striking ac- and the winter aloughs of old, seasoned and the winter sloughs of old, seasoned with no matter what mess of political poto pleasure.

The great feature, however, will be the Colonel Waring has shown us that the streets explusion of the school falsy like attractive. of New York can be cleaned, and any future city government, no matter how current or despotic, will have to reckon with him. And right well the enemy knows it; he may not refrain from picking our

Mulberry Bend is gone, and in its place have come grass and flowers and sun-shine. Across the Bowery, where 324,000 the most crowded blocks have been selzed for demolition, to make room for the two small parks demanded by the Tenement pulled from a car.

The party started toward the opening of the mine, when Jack Thomas atumbled over an object on the ground. Thomas stooped down, and to his surprise found what he thought to be a hog, but after a and oreaments of every degree, beld the influence it will have upon young lives. noment's examination the snimal was found of colored glass, the various pieces held the influence it will have upon young lives to be a wildest.

This heretofore framed in gutters?

to do it with due regard to the decencies

He said that he had form the scene into one of startling bril- vigorous warfare upon child labor, by the sance.
So much for the palace of science and as to factories, and by the restriction of started over the hill toward the airshaft, and reached it about 7 o'clock in the evening.

It was very dark, and he was standing close to the mouth of the shaft trying to think of some plan to cover up the hold and still have it serve its purpose. All at once a rustling of the branches overhead aroused him, and suddenly a huge animal dropped on his back and began to tear at his face and body. He grappied with the beast, and a terrible battle ensued.

As the mine boss dropped his gun at the fight, and in a short time man and beast were on the ground and every minute they rolled nearer to the opening. At last both fell over the bank and were hurled downbidden by law.
