Yesicrday was a busy day for the delegates to the Interstate Sunday School In stitute of the Latier Day Saints church. The umber of delegates was largely increased. and much new interest was taken in the proceedings by the people of the city. The first session was held at 9 o'clock. It consisted of general Sunday school review work The discussion was led and the work illustrated by J. F. Mintum. Many new methods of interesting and instructing the children were shown. W. N. AFTERNOON WORK.

The active work of the afternoon began a o'clock, and an hour was devoted to anayzing the visiting committee. At 3 o'clock a general discussion took place, with T. A Hougas as the leader, upon the subject he selection of teachers and the qualifica-ions to teach. The problem of who should select the teachers came up for considera-tion, many of the delegates appearing to fee that it was placing too much responsibilit upon the superintendent of the Sunday school to be obliged to select the teachers for all of the classes, "Who Should Work in Sunday Schools?" was also a fruitful theme.

At 4 o'clock the most interesting feature the afternoon session occurred. the blackboard work led by Joseph Roberts. He illustrated what might be termed the kindergarten method of teaching scripture to the child. While showing that the mind the child can be reached and a thorough y proper illustrations, his blackboard work was so strong that he held the attention of he old teachers present and imparted many

The evening session was devoted to the eading of a paper illustrating the system-tic and unsystematic methods of teaching. PEMPERANCE PEOPLE ARE WARY.

Preparing to Provoke Sentiment to Counteract Work of Saloon Men. The secret of the temperance meetings hat have been held within the last few days was disclosed in the meetings of the Council Bluffs Ministerial association yesterday, when it was admitted that it was the urpose of the temperance people to use all available means to build up a sentiment op-posing the possible adoption of a liberal amendment to lowe's present prohibitory idear laws, an amendment that will permit the manufacture of alcoholic liquors in the state. The temperance people, recognizing the existence of a strong influence in all parts of the state to secure such an amendment, if the subject is discussed at all in the extra session of thelegislature this winter, feel that it is their duty to take action to create a counter sentiment. The matter was freely discussed at the union temperance meeting, held at the Fifth Avenue Methodist church last night. It was declared to be the nurpose of the temperance people to hold meeting all over the state as build up a sentiment that will make it impo sible for the members of the legislature vote for the liberal change in the law of manded by the advocates of the manufac

Death Rate for December. The death rate in Council Bluffs for December is heavier than in any previou nonth for two years. Up to last night City Clerk Philips had recorded thirty-three deaths, several more than the record. The laws of the State Board of Health requiring undertakers and physicians to report a once every death coming under their pro fessional notice is being pretty generally observed, but it is possible that some deaths have occurred that have not been reported The increase of the death rate for the month is not due to any epidemic or the unusual prevalence of sickness, but is attri-buted to the great number of very old people who have passed away. Deaths of extremely old people has been a remarkable feature in the mortuary reports of the city and county during the year. Death has been very busy among the old patriarchs and pioneers, and a score or more who had reached the vicinity of 90 years have been gathered to their fathers, and there are several in stances where 1896 finishes the century of

life for old citizens. Diphtheretic diseases, which threatened ecome epidemic in the city thirty days go, have been entirely stamped out. Not case has been reported to the Health lepartment for two weeks. No contagious liseases of any sort have been reported for ten days. This makes the paradox a little more remarkable, that while the health of the city's people is better than at any time luring the year the death rate is the

> TRAGEDY IN AN IOWA TOWN. Mrs. Robert Howard Meets Death While Out for a Ride.

ceola that Gilfillan had been seen in town,

but this is erroncous, as advices from Brad-

ford locate him in that place.

MADRID, Ia., Dec. 28 .- (Special Telegram.)-Last night occurred the death of Mrs. Robert Howard, who was thrown from a buggy while out riding with John Slick. a liveryman, while Mr. Howard was at home taking care of the children, supposing his wife was at church. She had gone for a buggy ride with Slick. The accident happened about 9 o'clock only a short distance from the Heward home and parties who happened along soon after picked up the unconscious woman and carried her to her home. Drs. Moench and Gingsley were sent for immediately and did all they could for Mrs. Howard, but she died in a few moments. An examination showed a deep wound at the base of the brain and she bled a great deal from the mouth and ears.

There were no other marks on her. Slick says they were out riding together when the team became frightened and ran away throwing them both out of the buggy, killing the woman, but burting him only slightly. It was noticed that his clothes were somewhat torn. The doctor said the wound in Mrs. Howard's head had been caused by some sharp pointed instrument. Possibly one of the horses might have kicked her and made the hole with the cork of the shore.

Mrs. Howard leaves a husband and two small children. Many of the citizens of Madrid are not satisfied with Slick's story and expect startling developments at the coroner's inquest, which is to be held this evening. Some things look suspicious to those who have taken the pains to probe into the case and the verdict of the jury is awaited with a great deal of interest.
