The paper strongly urges upon the notice of its readers the fact that America is drained of millions of dollars annually to send to foreign countries for a product that is one of the prime causes of the increase in nervous diseases in America to-day and states that a well informed physician on stomach and nerve aliments has, after a year's experiment, produced a delicious beverage from American cereals, wheat, etc., which has the exact color of high grade Java coffee and turns to the rich golden brown of ocha when cream is added.

It is said to be less arid and bitter than the lower grades of coffee, but has much the mel-low piquancy of the more expensive grades of Java and the tables of Java and the Arabian berry.

This grain beverage never produces the unpleasant effect on heart or stomach and liver that is all too frequently the case with imported coffee, and while it looks and taste like coffee, the originator expresses the wish that it be krown as Postum Cereal, a food drink, and not as an imitation of any other beverage, coffee, tea, chocolate, etc. This beverage is said to become very popular with those who find it hard to digest coffee, and the children can be seven with the children can be served with it rs a liquid food, pure and nourishing, while to them it appears like berry coffee.
