Wants the Meil Schedule Changed. Secretary Judson of the Business Men's association has taken up with the department at Washington the question of arranging the schedule of the fast mail leavng Chicago for the west. The most cerious objection to the present schedule is the short interval between the arrival of the fast mail from Chicago and its departure for that city. The time is too short to permit the answering of a letter till the ext day. It frequently happens that a professional or business man receives a let-ter to which an immediate reply is request-The interval is entirely too short, as some collections and compilations of data may be necessary. The present arrangement accommodates the publishers of Chicago dailies, as they are sent west on the fast mail, but business men have long com-plained of an arrangement that discriminates against the whole eastern country in the interest of the publishers in one city.

### COMFORT AND KNOWLEDGE.

(Sent free by mail).

Set aside for twenty-four hours a bottle or common glass filled with urine. A sediment or setiling indicates an unhealthy condition of the kidneys. When urine stains linen it is positive evidence of kidney trouble. The frequent desire to urinate or pain in the back, is also convincing proof that the kidneys and bladder are out of order.

### WHAT TO DO.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp Root, the great kidney remedy, fulfills every wish in relieving pain in the back, kidneys, liver, bladder and every part of the urinary passages. It corrects inability to hold urine and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to get up many times during the night to urinate. high relief sculpture, emblematic of the mili-tary and civic life of General Grant. The crypt is reached by site s ways, which lead directly into passage encircling the space in which rests the sarcophagus. This passage is shut in by square columns which sup-port the paneled marble ceiling. The saropliagus rests in the center of the crypt, 140 cet below the dome. Of all the perpicking questions which arose in connection with the ew tomb the greatest was that of obtaining sitable material for the sarcophagus. The proper quality was found, after long search, in the quarries of Montelle, Wis, a porphyry of fine texture, brilliantiy reddish in color. Cut from the solid rock, it is highly polished. the crypt. The great block is ten feet four inches long, five feet six inches wide and four feet eight inches high and weighs five tons, in this immense block a space was hollowed out into which the coffined re-mains of General Grant were lawered. Then cap stone was set and the sarcophagu a became as a solid block. It is plain save for the simple engraved inscription at the head of the capstone, "Ulysses S. Grant." The pedestal on which the sarcophagus rests a square of ten feet ten inches. The ser course of one foot eight inches is made sections, above which is a five-inch in-red course. Still above this are two heavy cks of marble, on which the saycophagus directly sets. The total height of all is seven and one-half set. Some day the body of Mrs. Grant will re-pose beside that of her fusioned in a dupli-cate of the sarcophagus now in the crypt of

Mayor Broatch Goes East. Mayor Broatch left last night for his old home in Connecticut, where he will remain by a portice made up of a row of recessed columns. Above and behind the portice rises an almost blank wall, which will one day be relieved by the four equestrian statues shown usually in plans of the monument, and finishes in a parapet which shows upon its face the sculptured figures of peace and war.

Above the parapet, there starts abruptly a cupola, seventy feet in diameter, surrounded, as a relief, with ionic columns, Around the crown of the cupola a line of May 10, when his term of office expires.
