

THE OMAHA DAILY BEE.

TERMS OF SUBSCRIPTION. Daily (Without Sunday), One Year, \$5.00. Daily (Including Sunday), One Year, \$6.00. Three Months, \$1.50. Six Months, \$3.00. Single Copies, 5 Cents. Published Every Morning.

STATEMENT OF CIRCULATION. State of Nebraska, Douglas County, at the office of the Publisher, The Bee Publishing Company, Omaha, Nebraska, being duly sworn, says that the actual number of copies of the Bee published during the month of April, 1897, was as follows:

Table with 2 columns: Category and Circulation. Total circulation for April 1897 is 6,073.

THE BEE ON TRAINS.

All railroad newsboys are supplied with enough Bee to accommodate every passenger who wants to read a newspaper. Insist upon having the Bee. If you cannot get it on a train from a news agent, please report the fact, stating the train and railroad, to the Circulation Department of The Bee. The Bee is for sale on all trains.

INSIST ON HAVING THE BEE.

It would be a clever turn if the Sultan could clear enough out of his military extension into Greece to take Egypt out of pawn.

The impending picnic of the local retail grocers is an event which will generally be regarded by the hungry as a good thing to the.

Well wishers of Omaha who desire that the exposition shall be a grand and complete success should see to it that no national convention escapes.

The head of the Vanderbilt family has now a statue erected in his memory. The Vanderbiltian public, however, has no monument to commemorate it.

Citizen Train is reported to be exceedingly chagrined at the general misconception placed upon his well-meant effort to advertise Omaha and the exposition.

The United States senate has recognized the belligerency of the Cuban insurgents, and the world may now know a belligerent when it sees one, providing only it is labeled.

The armistice between Greece and Turkey is limited to seventeen days. It might have been made thirteen days but that would have foreboded bad luck for the vanquished.

Bolin is at last headed toward the penitentiary, but the taxpayers are still paying interest on a treasury shortage of over \$100,000 which Bolin's bondsmen agreed to make good without delay.

If ex-Treasurer Bartley can find even cold comfort in the supreme court decision in the Bolin case he is certainly entitled to all the solace he can draw from it either by himself or with the assistance of his lawyers.

The sugar schedule, we are told, is hard for the average person to understand. No question about that. The trust relies on getting what it wants by making the schedule almost incomprehensible to ordinary people.

The state of things in North Bend, where the village marshal was seized and locked up by tramps who then proceeded to loot the town at will, reads suspiciously like one of the Cuban war stories of the "new journalism."

Members of the United States Bimillennial commission have reached Paris and their friends may rest assured that they are enjoying life in the French capital whether or not they are accomplishing anything on behalf of "down trodden silver."

The permanent retirement of Senator Call of Florida leaves the field clear for Senator Morgan of Alabama to talk as long and as often on every question that comes up in the senate without fear of conflicting with the prerogatives of his associates.

Since the czar has shown himself a potent adjuster of large controversies he might be induced to try his hand at a settlement of the unappreciated difference between the fighting McCooks and the belligerent Logans, which grow out of his coronation.

China can sympathize with Greece with a feeling born of experience. It is not so long ago that China was compelled not only to suffer the humiliation of defeat by the Japanese army and navy but also to pay a war indemnity of huge proportions.

How can ex-councilmen who ran for office under the new charter and whose chief regret is that they failed of election now turn around and join others who could not even secure renominations in an effort to overturn the new charter and get back on the salary roll by that means? There is not a member of the old city government who has not recognized the new charter at a dozen different points. To what inconsistencies desperation will sometimes drive men.

THE MORGAN RESOLUTION.

The passage by the senate of the resolution declaring that a condition of public war exists in Cuba and that the United States shall maintain a strict neutrality between the contending parties, according to each of the rights of belligerents, will probably end the agitation of the Cuban question in congress for the present. It was made plain by the course of the house on Thursday that the republicans of that body do not propose to do anything which might to any extent embarrass the president or force him to action which he may not deem timely.

There ought to be sufficient confidence in the judgment of President McKinley and in his purpose to do what is just and right to allow him to have a free hand in this Cuban matter. Especially should republicans feel that he can be depended upon to act wisely in dealing with this question. No one can fairly question his desire to protect American interests affected by the war. No one can reasonably doubt that he would be glad to see the conflict ended and Cuba independent. But he must be guided not by his sympathies or wishes, nor yet by popular clamor, but by the solemn obligations of law and of international duty.

All's well that ends well.

PROMISE AND PERFORMANCE.

After all the professions and promises made by Nebraska fusionists on platform and stump as to what might be looked for in the way of railroad assessment and taxation if they should be given control of the state government, the action of the fusion State Board of Equalization in fixing the tax valuation of all Nebraska railroads at precisely the same figure as last year would strike the honest and well-meaning members of the great reform party as ludicrous were it not so humiliating.

THE COMMISSION AND POOLING.

The letter of Chairman Morrison and Mr. Clements, of the Interstate Commerce commission, to Senator Cullom, chairman of the senate committee on interstate commerce, will probably be disappointing, if not discouraging, to the advocates of early legislation to authorize pooling. The letter does not specifically oppose pooling, but it is against any such legislation at this time as being inopportune in view of the fact that a number of cases affecting provisions of the interstate commerce law are awaiting the decision of the supreme court of the United States.

It must give the officers in control of the state penitentiary the headache to contemplate an unexpected \$100,000 surplus in the 1895 penitentiary appropriation that must be turned back into the state treasury. But they may be depended on to revise their official mathematics so that nothing of the same nature occurs again while the fusion state administration lasts.

It is safe to say that the number of Americans in Cuba has doubled since it became known that \$50,000 was to be appropriated by congress out of the national treasury for their relief. The prospect of escaping starvation must be a powerful lever to force Americans in Cuba to admit their nationality.

Judging by the big batch of opinions filed, the Nebraska supreme court is evidently determined to prove to the public that it is able to grind out the usual number of decisions in spite of the fact that the constitutional amendment enlarging the bench failed of adoption.

The conference of the architects of the various exposition buildings has resulted in the most harmonious preliminary understanding, and the certainty is affirmed that the architectural scheme of the exposition as a whole will excel in

THE WORLD'S GREATEST MONOPOLY.

Standard Oil stock sold this week at 21 3/4, almost the highest figure recorded for the old price of "holding up" the market. It represents a doubling in value since the panic of 1892. In the latter part of that year, when all other stocks were down, it advanced to 10 1/2, and then, as the market recovered, it advanced to 21 3/4.

THE IMPUDENT CONCERT.

How impudent a part the great powers have played and what a role they have played in the Balkan peninsula is now painfully evident. Last week they had both combatants to Greece obeyed, but Turkey defied Greece and the latter had to demand the decided advantages she had just gained in Epirus and evacuated that province, trusting to the promise of the great powers that they would retreat to the point of no return.

THE SUGAR TRUST TACTICS.

It appears that the Sugar Trust is to resort to the old tactics of "holding up" the market in order to get through the schedule whose favorability to the trust has been a subject of much discussion. This may well lead to another sensational investigation and give rise to a scandal worse than that of 1894, but that it can result in the adoption of the long-range sugar schedule now before the senate is not to be believed.

THE BEE IN CUBA.

Some of the belligerents in Cuba have a plan to exploit the Bee. It is to be the Spanish paper they use in Cuba to purchase as much as a \$5 gold piece.

THE GREAT GREEK ABROAD.

Not one among the European nations has the least right to be surprised at the sudden demand for a territorial indemnity in the Balkan peninsula following the grab-bait policy which has uniformly characterized their dealings with conquered nations. Their pretended amazement at the methods which they employ to reach their ends is a cheap exhibition of theatrical hypocrisy.

Their pretended amazement at the methods which they employ to reach their ends is a cheap exhibition of theatrical hypocrisy.

OTHER LANDS THAN OURS.

There is a constant accumulation of evidence that M. Delianis was crumby deceived when he declared in the Greek chamber that everything was in readiness for war. It is now ascertained on all sides that no preparations for a serious campaign had been made. There was no ready supply of such indispensable war material as powder, shells, rifles or cartridges, and no effort had been made to erect batteries or fortifications to defend the mouths of the passages through which the Turks would be compelled to descend to the Thessalian plains.

One that is spreading and constantly pushing our shoe trade on to greater glories. Special sale the year round on low priced shoes, the most shoe for the money. No ill-fitting, nor carelessly made shoes. There's a great difference in shoes bought here and not here. Ours are as perfect at \$3.00 as at \$6.

C. P. Cartwright & Co.

16th and Douglas.

POLITICAL DRIFT.

June 4 is the date of adjournment of the Illinois legislature. Not till then will Chicago breathe easier and take a deep breath. A member of the present congress has the honored American name of Patrick Henry. He is a democrat and a Mississippian, was a senator in the first congress of Andrew Jackson, and was formerly a farmer.

MERRY JINGLES.

Chicago Record. When Greek meets Greek, they whisper. Behind their mountain trellis, With hatted brows and knotted brow, "Well, doesn't this beat Hellany?"

BEFORE AND AFTER.

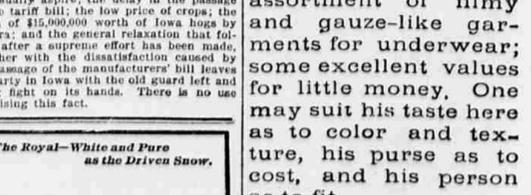

Harlem Life. With him she strolls the shelving sands, Or walks the woodlands airy; He seems to her a hero bold, And she to him some fairy.

A Hot Wave

In May is pretty likely to find people unprepared for it. There isn't a time then to go to the tailor—while we can fit you out in a few minutes. If any alterations in the suit are necessary, they take but a few hours at the most.

The first hot wave, too, is the signal for a change in the weight of one's underclothing. We have a very fine assortment of filmy and gauze-like garments for underwear; some excellent values for little money. One may suit his taste here as to color and texture, his purse as to cost, and his person as to fit.

The cases in which the neckwear and fancy summer shirts are displayed are as gay with color as a blooming conservatory.
