HAL CRAGO SHOWS HIMSELF The second heat was a horse race, the finish, a close one between the three, evoking vociferous applause from the stand Dandy Jim led by a nose at the quarter in 0:321/2, with Badge and Crago right at his heels. They were the same at the half, 1:0614, and also at the three-quarters, 1:40. In entering the stretch the three were on a ine, and the drive began. It looked like

tient to find that the treatment he is given for a disease is more disastrous than the disease itself. Such is the case, however, with the usual treat-ment given for diseases of the blood.

Notwithstanding the great progress made in many branches of medicine, the doctors have failed absolutely to find a successful treatment for blood poison, and the many diseases having their origin in the blood. They give but one kind of medicine, they know but one treatment, and whether in the form of powder, pill or liquid, the doctor's prescription is always the same—potash or mercury.
Too much cannot be said of the harm-

ful and disastrous effects of these drugs. The doctors are unable to rid the system of the poison, and direct their efforts toward covering up the symptoms from view. There is but one effect to be obtained from potash and mercury- they bottle up the poison and dry it up in the system, but it must be remembered that they dry up the marrow in the bones at the same time, gradually consuming the vitality. Those disfiguring copper-colored splotches are but indications of worse results to follow. No sooner has the system taken on the full effects of this powerful drug than that suppleness and elasticity of the joints gives way to a stiffness, followed by the racking pains of rheumatism. The form grad-

ually bends, the bones ache, while decrepitude and helplessness prema-Under this treatment, it is but a short step from vigor and health to a pair of crutches. With this wreck of the system often comes falling of the hair ad eyebrows, loss of finger nails, and decay of the bones—a condition Be most horrible. This is no overdrawn cture, for the world to-day is full of

these hobbling mercurial wrecks. Contagious Blood Poison is the most horrible of all diseases, and has been appropriately called the curse of man-kind. Until the discovery of S. S. S., fled the doctors, and it is in this dis-ease that the evils of mercury and potash are most common, because these drugs are given in such large doses in an effort to counteract the poison. While they succeed in bottling up the poison in the system, it always breaks forth again, attacking some delicate organ, frequently the mouth and throat, filling them with eating sores. S. S. S. is the only known cure for this terrible disease.

It is the same in other diseases of the blood. Scrofula, Eczema, Cancer, Rhenmatism, all are given the same treatment by the physicians—mercury and potash, and the result as above set forth is always the same.

We offer a remedy purely vegetable, powerful in its effect, yet harmless in every way. For fifty years S. S. S. has been curing blood diseases, from the most violent to the mildest case, after all other treatment failed. It is guaranteed purely vegetable, and one thousand dollars reward is offered for proof to the contrary. It is a real blood remedy for real blood troubles, and never fails to cure Contagious Blood Poison, Scrofula, Eczema, Rheu-matism, Cancer, or any other disease of the blood. If you have a blood disease, take a remedy which will not injure you. Beware of mercury ; don't do violence to your system. Don't get

ment of Columbia College Crew. Copyright, 1897, by Press Publishing Company.) LONDON, June 12.—(New York World Pablegram—Special Telegram.)—J. H. Clas-Cablegram—Special Telegram.)—J. H. Clasper, a famous boat builder, being asked his opinion of the new style oar adopted by Columbia college, replied: "The idea is not original with the New York designer. It is simply an extreme form of the oar used at Eton many years. It has been tried by many crews, including Oxford, Cambridge and Leander; all save Eton promptly rejected it. I regard it good in one respect, the lower edge of the blade is rounded and gives an advantage in feathering, but as the upper edge also is rounded, there is a waste of power when the ströke is given.

"The Columbia oar is much broader in the middle than Eton's and tapers almost to a point. This will prevent the oar from taking the proper angle from the outrigging and also necessitate a much harder strain upon the oarsman as he straightens back. However, the greatest objection to broad bindes is the opposition to the wind. Even if a race is rowed in a dead calm, the speed of the boat creates a current of air, which must be considered in a close contest.

"For this reason I never liked the American blade such as Yale used last year. I think Columbia will find after a brief experience that the oar adopted by her rivals is far the best."

It is a remarkable fact that the only competitor for the America's Cup in commission this season in British waters is Tanker-ville Chamberlayne's Arrow, which was also the last British yacht to win the trophy more than thirty years ago. Tankerville Chamberlayne is very proud of the champion and keeps her in thorough repair. Her present skipper says: "She is a better thip today than ever she was, in regard to soundness as Mr. Chamberlayne has spent £2,000 per, a famous boat builder, being asked his

chief attraction being the great American Arrow will probably be raced this season up for the winner. As has frequently been the case this year among the youngsters, there was another upset and the favorite.

Young Athletes. NEW YORK, June 12.—Under the auspices Frohman, was away back in the ruck and M. F. Dwyer's colt, Previous capitally ridden by Sloan, passed the judges amid the cheers of the spectators. Hand Ball, P. J. Dwyer's good colt, was in second place and sto Morris colt, Varus was third, the others being nowhere.

There was a prompt and good start, and by the time they reached the timing flag Hand Ball was to front, with Previous and Aratoma close up all the jockeys doing a bit of urging. During the first quarter there was no changed places constantly. As they neared the head of the siretch Varus came nout of the bunch and set sail for the leaders. By the time they had straightened out for home Hand Ball and Varus were a little in front, with the other two back a short distance, and the rest trailing. Then Simms and Littlefield began driving and it looked as if they would finish in that order, heads apart, but Sloan sent Previous after them on the cutside and landed his mount a winner by half a length. Results:

First race, six furlongs: Nick, 125 (Sherrer), 13 to 2 and even, won by half a length; Imperator, 129 (Thorpet, 6 to 1 and 2 to 1, second by two lengths; Illusion, 118 (Neumover), 12 to 1 and 5 to 1, third. Time: 1:136, Harrington, Prompt Concord, Ed Kearney, Sir Play and All Over also ran.

The young athletes from New England captured the point trophy with a total of 51, their nearest competitor being Lond Island, with 24 to its credit, while New York followed closely with 23. New Jersey, Connecticut and Iowa scored 14, 8 and 6, respectively.

Elight records were established and the record for low hurdles was equalled by W. B. Joyce of New England. H. S. Manvel of New Jersey scored the individual honors by winning both the quarter and half mile runs in splendid style.

The record which suffered most was that of the twelve-bound hammer, the best previous performance being 129 feet 10 inches, made by F. C. Ingal's of Connecticut, last year. H. J. Brown of Lond Island completely smothered this with a throw of 149 feet 1½ inches. This was a remarkable throw, and this young giant gives promise of intercollegiate championship form when he takes on his college currer.

The only event captured by a western man was the mile walk, won by Sanford Ringler of Iowa in 7 minutes 37 4-5 seconds—a new record.
