The: the world supposed her invitation certain, is a tendency to fill the rural schools with them to contribute more directly than no to the improvement of the teachers of rural schools. The state would then be justified in demanding some degree of professional train ing from every teacher in the rural as wel as in the city school.

The establishment of libraries, the prose-cution of the work of school extension by lectures and other means, the introduction of such studies as will have a tendency t connect the school and the home, especiall rument to make a protest, but Japan seems festined to a sad awakening from her dream every-day life of the community, and the necessity of applying the laws of sanitation to the construction of rural school houses, demand immediate attention. LACK OF SUPERVISION.

The rural schools are suffering from want official and intelligent supervision. In or official and intelligent supervision. In every state some standard of qualifications, moral and intellectual, with some amount of actual experience, should be demanded by law from those who aspire to fill the office of superintendent or supervisor of schools. Good morals and good manners constitute an cosential part of an educational equipment. The inculcation of patriotism, of respect for law and order, of whatever tends to make a good citizen, is of as much importance in a small as in a larger school. Regularity, punctuality, obedience, industry, self-control are as necessary in the country as in the city school. Country school teachers should call to their aid the beau-

There is embodied an interesting report urging negro teachers for negro schools. It says the instinct of the educational develop ient of the negro must be from within and y the race itself, and not solely through extraneous agencies; that the intellectual and moral dependence of the race must not be perpetuated and the responsibility of teaching his own race furnishes incentives and means for race elevation. The conclusion reached is that the instinct of race identity renders impossible the realization of an ideal relation between the white teacher and the negro pupil:

Probability the Measure Will Not Be Finished This Week. WASHINGTON, June 27 .- The republican tariff managers are still hopeful that the present may prove to be the last week of the tariff debate in the senate. All the schedules have been gone over once, leaving nothing to be done but to consider the paragraphs in the various schedules which have been passed when reached in their regular order because of differences of opinion among the republi-cans themselves. Many of these differences have been adjusted in the republican ranks, but the democrats will naturally take advan-tage of their knowledge of the feeling exist ing among their opponents to debate some he questions at length. It is understood now hat coal, leather, hides and lead ore will each be vigorously discussed, as will also the questions, though more briefly, of recip-rocity, the treatment of trusts and the disposition of the Hawaiian reciprocity treaty. In view of the determination of the democrats to exploit all these questions and oth ers as well, it would seem impossible to conthe senate's work on the bill before the end of the week, and it is more than probable that the final work will be reserved for the

Ellis Ward will remain with Pennsylvania with Pennsy sylvania and says he sees very good material in this year's freshman class for a big 'var-

sity crew next year.

The crews did not go out on the river this afternoon. There is much speculation as to the outcome of the freshmen race. Columbia stands first pick. As to the 'Varsity race, Mr. Couriney said today that he believed they would have a harder race on Friday than they rowed last Friday. One thing is very certain, that the crews in the Friday race will make every endeavor to cut the time of last Friday in the hope of demonstrating that they are faster than the Ysle and Harvard crews.
