Nebraska's great constellation. That packing ouse in addition to those already at South Omaha will make that city second Chicago as a packing center and fat stock market. It will cost over \$1,000,000 and give employment to over 2,000 men. This will greatly benefit all Nebraska and adjoining states. And the said sugar factory will give ratiroads centering into that point it will be of easy access to a great portion of the state. It will become in a short time the great refluing center for refining the crude product of the many factories which may in the near future spring up throughout the state, and Nobraska with its varied industries will be-come the banner state in the union. All this he not a mere possibility, but a probability. Yes, stand up for Nebraska!
