Howard, a photographer who recently located in this city and who left a few weeks ago for parts unknown, is a source of some anxiety to a number of York buciness men. Howard rained three hours last night, in which time is a skilled photographer, and he soon 0.88 of an inch of water fell worked up a good business here. His expenditures for livery rigs and new clothing were evidences of his prosperity. But he lived a trifle too high, and as a consequence corn crop is in excellent condition and blds he was compelled to evade the ever-increas fair to make as big a crop as last year, ing number of bill collectors by leaving town. Upon the carnest assurances of his partner, a Mr. Williams, who has been stay-ing here to finish up a few photographs, that Howard would be back in a few weeks he having gone east to settle up an estate, the merchants whom he has let down have patiently waited for his appearance; but when Williams also left the city Sunday night, the last hope of Howard's return died away and his victime admit getting beaten. The photographic outfit that Howard used is still here, but as it was leased from Mrs. W. L. Lee, whose husband formerly operated the gallery, it cannot be attached by the creditors. It is understood that this is not the first city in which Howard and Williams have operated in a like manner.

CONFIRMS THE ANDREE DISPATCH.

News Passed Along the Line by Ships from the North. CHRISTIANA, Aug. 17 .- Information re ceived here confirms the story published in a dispatch from Hammerfest, Norway, saying that one of the searchers for Herr Andree met the sealing vessel Alken about July 22, and was informed by its captain that one of the crew had chot a carrier pigeon between North Cape and Sever Islands, on the north coast of Lapland bearing a message from the explorer ad-dressed to the Bladet of Stockholm, which as follows: "Eighty-two degrees passed. Good journey northward.-Andree. The date of the message was illegible. The pigeon also carried a letter dressed to he Bladet, but the captain de-clined to surrender either the dispatch or the pigeon and continued his voyage north-ward. The captain is familiar with Andrec's plans and is greatly interested in them.

The news arrived here very indirectly The captain of the Alken communicated the information to the commander of the ship injepers of Tromsoe, the latter transmitted the news to the commander of the steamer Express, upon which the Lorner polar expedition was coming home and the Express finally passed the news along to the steamer Lofoen, which brought it here. MINTS CLOSED NONE TOO SOON.

London Times View of the Silver Question in India. LONDON, Aug. 17.—The Times publishes a two-column special article today review-WOUND IS NOT SUPPOSED TO BE FATAL ing the effects of closing the Indian mints connection with the visit of the American bimetaille commission. It says. "The closing saved the Indian government from the losses incident to a heavy fall in exchange and consequently from a disastrous increase in the burden of its gold obligations. It is understand that the contract of the ione. This fligtation, which seems innocent and innocuous has already cost then dear. But for that the government have assented to the closing of the mints long before 1893.

The article comments on the "charac teristic crudeness and boldness of Ameri can diplomacy in cending a bimetallic mission to ask for the re-opening of Indian mints while at the same time deal ing the worst possible blow at British com merce by passing the Dingley tariff.

"It is clearly impossible," says the writer to treat seriously a commission which argues that unless we do something for sil ver the next election in the United States will return Mr. Biyan to the White House to the lasting injury of British interest. It is not certain that Mr. Bryan will be elected. It is not even certain that if he were elected we would suffer more than with Mr. McKinley or another McKinley act. Investors in American securities have time before the next presidential election and before the crash to get rid of them One thing is certain we would be ver-polish to do anything for silver. Eve should the United States and France agree adopt bimetallism and England to open the Indian mints it would only bolster silver for a chort space, to fall again to its proper market prices, so that Indian finances sould be in a position and the Landon Time would be in a position as bad as before, if

The Westminster Gazette this afternoon choes the editorial of the Landon Times his morning on bimetallism cabled to Associated Pross and says it sees no chance of the Indian mints being reopened to the coinage of cilver, adding: "To fool any longer with President McKinley's commission is surely unnecessary. In declining to abide by the market value of silver as the standard of currency value, India has taken a step toward demonetizing silver. Japan and Russia have adopted the gold standard and no one means to go back on it. There why not say so and not be deterred by threats of a possible Bryanite victory and dismiss the question finally."

DOESN'T WORRY ABOUT ANDREE

Curator of Royal Geographical Society Believes Professor is Safe. LONDON, Aug., 17,-(New York World Cablegram-Special Telegram.)-I had a talk today with John Cowles, curator of the Royal Geographical society. He said: "Anything regarding Andree is necessarily conjecture. I have no ground for losing hope of his ultinate safety. Andree is a man of infiniprecaution, the balloon is made of the bes material and his supplies are sufficient to ast a long period. I have more faith in Andree, since his exhibition of sublime moral courage last year in not starting when the wind was unfavorable. Previous to his departure Andree consulted me and asked me to urge all possible objections. I see nothing impracticable in his theory. It is certain his proposed plan of reaching the pole has failed or we should have had advices ere this. I think he must have landed in some remote portion of Siberia. EXPERIENCES IN THE KLONDIKE REGION

Shows Some Fine Specimens of Yellow Metal Which He Obtained in the Diggings of the Frozen North.

RED OAK., Ia., Aug. 17 .- (Special.) -- R. B. Hall, a former postmaster and business man of Red Oak, has returned from an extensive prospecting tour of the gold fields bordering on the Klondike and British Columbia. His first venture was two years ago and it proved so satisfactory that he went up this spring and cetablished a claim about 200 miles above Juneau. He does not blow very much about coming home loaded with gold, but the fine specimens he displayed, together with the animated manner in which he talked of the country, were evidence onclusive of a successful debut as a gold miner. Mr. Hall has two expert miners prospecting in the Klondike region, having fitted them out for two years' work. He urges people to remain away from there until spring. The hardships they will have to encounter cannot be realized except by actual experience. Those starting now, or even as early as three weeks ago, will find impossible to proceed beyond a given oint; neither can they return for navigation closed and they will be imprisoned by the rigors of a winter, from the fatal which no amount of money can save them. Much indignation is expressed at the in-

nterests are guarded by the government. The license which the miner must procure places the government at his disposal to which exists against banks would be re-protect him against claim jumpers or im- moved. spring will find him again in the land of

SEATTLE, Wash., Aug. 17.—The steamer Humboldt, which was to have sailed today for St. Michaels, Alaska, with 350 passengers and 400 tons of freight destined for Dawson City, is in the hands of a United States deputy marshal. When the boat was about to sail today the passengers discovered that large amount of their freight was to be left on the dock. They were very angry and held a mass meeting. Mayor Wood o Seattle, who is the manager of the boat, was called upon to explain and promised that those who left provisions would be properly cared for, and that the goods would be shipped on the next boat. This did not suit the crowd, which demanded a guaranty. Arthur Seymour of Haverhill, Mars., made speech, demanding that the rights of these who had paid for tickets and freight be con served. Incidentally he said he supposed here were those in the crowd who like to hang the mayor. His words had an explosive effect, but he managed to restore order, and a committee was appointed to adjust matters. At this point it was ar iounced that John Galovan of Spokane had ibelied the steamer. Matters bid fair to be settled so that the steamer will get away

CANADIANS ABUSE A PRIVILEGE. Landing Freight from Steamers at

Unauthorized Places in Alaska. WASHINGTON, Aug. 17.-Word reached the government authorities that British steamers are landing freight and passengers at Skagaway, Alaska, instead of at Dyea, in direct violation of the law. Dyea is the sub-port of entry on the Lynn canal and Skagaway is six miles off. The matter will be investigated by this government The creation of the sub-port at Dyea several weeks ago was done at the request of the Canadian government to save passengers the annoyance of disembarking at Juneau and awaiting another steamer for Dyea. The request came from Canada about a month ago, and the action of the administration in establishing the sub-port permitted Canadian vessels to enter at Dyea and land passengers and baggage there.

Mail for Klondike.

WASHINGTON, Aug. 17.—Acting Poetnaster General Shallenberger received a elegram today from the postmaster genera of Canada, stating in reply to a communication sent by our government regarding Klondike mail that a counter proposition had just been mailed by Canada. The acting postmaster general had suggested to Canada hat an exchange of mails between the inited States and Canada be established at Dawson City in the Klondike district. proposition may be the Canada has just forwarded to the State partment for the construction of a telegraph ne from the Linn canal to Klondike with proposition for maintaining of dog trains the carrying of mails in both directions along the line.

Canada and Klandike. WASHINGTON, Aug. 17 .- It is not be leved by officials of the government that any serious hardships will be imposed by Canada upon American miners in the Klon-

dike gold regions. It is pointed out that it would be difficult to enforce any serious impositions on the miners. Such a course might result in retaliation enforced by the United States so as to make it almost possible for the Canadians to go or return To Replace City of Mexico.

NEW YORK, Aug. 17 .- The old Dominio ner, City of Columbia, which for years has een running in the freight and passenger trade between this city and ports in Vir ginia, has been purchased by the Pacific Coast Steamship company, and will replace the ill-fated City of Mexico, which foundered in a fog off Sitka, after striking a rock while returning from Alaska to Puget sound. on August 5.

QUEER WAY OF MAKING A RAISE. Attempts Suicide to Elleit Sympathy and a Donation.
OAKLAND, Cal., Aug. 17.—Mabel Crosby,

who attempted to commit suicide near Lambertville, N. J., a few days ago, is well known in California. She is known here as Mrs. Pearl Price, and threatening suicide is her profession. Whenever she becomes financially embarrassed, she permits somebody to prevent her committing suicide. Then she takes up a collection, has herself photographed in a living picture pose and goes to another town. In this way Mrs. Price has been quite successful in gaining a livelihood. She used to be on the stage, which gave her a knowledge of elocution and effective posturing. Later on she performed in a circus, where she gained a training that enables her to take high dives into the water. Last winter she won the sympathies of the people by trying to hang herself in Los Angeles. Then it was dis-covered that under the name of Crosby she had previously played the same trick, taking up a collection. Next she appeared at New Orleans and leaped in the Mississippi, but was rescued by a fireman, people sent her on to her starving children

The remaining report on the program was that of the committee on formation of bureau of education, submitted by Chair man William Corawell. He said if the bankers of the United States would establish a bureau and employ speakers to present the claims of the banks properly before the activity of this government in affording protection to the American miners. Under the jurisdiction of Canadian laws, miners charge high for accommodation, it is the fault of legislation and not of the banks themselves, much of the present hestility

ONE OF TWO WAYS.

The bladder was created for one purpose, namely, a receptacle for the urine, and as such it is not liable to any form of disease except by one of two ways. The first way is from imperfect action of the kidneys. The second way is from careless local treatment of other diseases.

CHIEF CAUSE.

Unhealthy urine from unhealthy kidneys is the chief cause of bladder troubles. So the womb, like the bladder, was created for one purpose, and if not doctored too much is not liable to weakness or disease, except in rare cases. It is situated back of and very close to the bladder, therefore any pain, discase or inconvenien e manifested in the kidneys, back, bladder or urinary passage is often, by mistake, attributed to female weakness or womb trouble of some sort. The error is easily made and may be as easily avoided. To find out correctly, set your urine saide for twenty-four hours; a sediment or settling indicates kidney or bladder trouble. mild and extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney and bladder emedy is soon realized.
