

THE OMAHA DAILY BEE.

E. ROSEWATER, Editor. PUBLISHED EVERY MORNING. TERMS OF SUBSCRIPTION. Daily (Without Sunday), One Year, \$1.00.

THE YELLOW FEVER SCARE.

It has been a good many years since this country had a visitation of yellow fever in serious form and with the adequate precautionary measures which can now be taken against the disease there is little reason to apprehend that it may become epidemic.

Nevertheless the prompt action of the federal authorities in preparing to stamp out the disease, if it was found to exist, is commendable. It is a disease that spreads with great rapidity when it has obtained a foothold and makes short work of its victims.

Our quarantine arrangements may not be quite all that they should be, but undoubtedly they will be found adequate to the task of keeping out yellow fever or preventing its development in localities where the conditions may be favorable to its appearance.

securities may be returned at any time we shall not have complete financial independence. Yet it is true that the United States is in a very safe and sound financial condition at this time and there is every reason to believe that it will continue to be for a prolonged period.

FOUR POLICE BOARD MEMBERS. The non-partisan reform police commission has made another exhibition of itself. In strict compliance with its sworn duty to keep the city's expenditures within the bounds fixed by law, Mayor Moore addressed a letter to the commission calling its attention to the threatened deficit in the police fund.

Every republican club in Omaha and the state will endorse and subscribe to the plank in the republican state platform denouncing dishonesty in public office and demanding vigorous prosecution of public thieves.

POPULISM AS AN OFFSHOOT OF REPUBLICANISM, as asserted by a popolectic party, but it is an inshoot of democracy. The chief question to be solved is whether the populists swallow the democratic party, or as seems more likely, the democrats swallow the populist party.

IMPENDING FAMINE IN IRELAND. The news regarding the failure of the crops in Ireland will, it is to be hoped, prove to be exaggerated, though undoubtedly the conditions are very bad and that great suffering must ensue if the British government should fail to provide adequate measures of relief.

It strikes us that the reform police board is very sensitive and easily insulted since its return from the three-ringed circus at Lincoln. What is there in the mayor's letter that is untrue?

THE mayor declares that of the \$78,556 available for police purposes for the year 1897, \$58,303 had been expended September 2, leaving a balance of \$20,253 in the police fund to carry the department for the remaining four months.

RUSSIA'S CROP DELICT. Russia's average crop of wheat reaches nearly 56,000,000 bushels, but this year she will have enough for her own people, putting on the overworked and willing American farmer the responsibility of keeping the bread in their mouths.

COST OF COAL MINERS' STRIKE. Few of even intelligent readers have any real conception of what a strike is. It is estimated that the miners have lost \$15,000,000 in wages; that the mine operators have lost \$1,500,000 in profits; that the railroads have lost \$10,000,000 in freight; that the loss to the merchants and others furnishing the necessities of life to the country is \$1,000,000.

OUR GROWING FINANCIAL POWER. There is no question that the United States is steadily growing in financial power, but whether this country is near the point of financial independence, as some profess to think, may fairly be doubted, though there can be no doubt it is advancing steadily in that direction.

THE late bank statistics show that there has been a very large accumulation of capital in the United States in spite of the loss and depreciation in values during the past four years.

THE National Farmers' congress, in session at St. Paul, has just adjourned a merited stab to some despising political agitators who sought to divert the attention of a series of people to legislative demands.

THE latest bank statistics show that there has been a very large accumulation of capital in the United States in spite of the loss and depreciation in values during the past four years.

IF there is any other reason than the payment of political debts which has prompted the police board in foisting incompetents and disreputables upon the police force and creating special positions for them, it has not been brought to the notice of the public.

EX-CONGRESSMAN LEWIS HAUBACK OF Kansas, whose death has been just announced, was well known in Nebraska, especially in Grand Army of the Republic circles, having been a frequent visitor to the recurring reunions of the veterans, and his loss will be felt by many of his Nebraska friends.

EX-CHIEF SIGWART boasts that his pull with the police commission rests on the service he rendered the gang candidate for mayor last April, when he detailed detectives on the city payroll to report to the Howell campaign managers for political work.

One of the advantages claimed for the new Nebraska ballot law is that it will enable the elements to the fusion agreement to tell what their relative strength is without regard to the fact that they have put in nomination the same candidates. This would be mighty small compensation for the disadvantages of the ballot law, but in this direction it is likely to defeat its object.

penation for the disadvantages of the ballot law, but in this direction it is likely to defeat its object. With the same ticket under three different party names and party emblems, the fusion voters will not distinguish between the voters, knowing that he can vote for fusion candidates by placing a cross at the top of any one of them. The election returns will therefore be utterly unreliable so far as they bear on the relative strength of the different fusion elements.

Hundreds of ill-who own property in Omaha which will receive incalculable benefits from the exposition have not yet put their names down on the stock subscription list, and many who have subscribed have done so in an amount far below what they can afford to do and should contribute.

SEPTEMBER MAGAZINES.

In Harper's for September Captain A. T. Mahan shows his readers "A Twentieth Century Outlook," which contemplates an increased proficiency in the arts of war as a result of the war of universal peace.

The September Century opens with an excellent paper by Baron Pierre de Coubertin, entitled "Royalists and Republicans," containing much interesting information concerning the political situation in France.

A stimulating out-of-door article is "To the Shore and Back," by Frederick I. Schiller, which contains a description of salmon fishing in that almost unknown country of the Northwest, and starts a procession of anglers in the direction of such a paradise.

THE September Cosmopolitan contains much of interest and help. In the "Marian Signory," by Frederick I. Schiller, which contains a description of salmon fishing in that almost unknown country of the Northwest, and starts a procession of anglers in the direction of such a paradise.

REMEMBERING THE FARMERS. The clamor for the re-remission of silver did not subside, but a very good substitute for it has been found, and that is the re-remission of the farmer. That was the avowed object of the re-remission of silver, but it has been accomplished in a much shorter and more direct way: wheat, corn and cotton have re-remembered the farmers of the country and made them the most independent class of men.

WHY CHARLEY REIGNED. Ex-Congressman Towne, who is among the most enthusiastic advocates of the free silver movement, has recently given an account of the manufacturing methods of the Cosmopolitan at Irvington-on-Hudson opens this month. Julian Hawthorne's series of articles on the "Big Game" is continued, the present installment giving prominence to the rescue work of the missionaries in the famished-stricken districts of the interior of the Yukon gold fields. Ouida has a characteristic essay on "The Art of Dress," in which she tells us how to dress in the best style, and how to avoid the vulgarities of the fashion.

RUSSIA'S CROP DELICT. Russia's average crop of wheat reaches nearly 56,000,000 bushels, but this year she will have enough for her own people, putting on the overworked and willing American farmer the responsibility of keeping the bread in their mouths.

THE BATTLE IN NEBRASKA.

Free Silver's Last Ditch in the Agricultural West. Nebraska seems to have been fixed upon by the free coinage leaders as the most hopeful field on which to make this fall a "last ditch" struggle for the falling cause of the free coinage.

The September Century opens with an excellent paper by Baron Pierre de Coubertin, entitled "Royalists and Republicans," containing much interesting information concerning the political situation in France.
