NEW USES OF ALUMINUM.

Investigation into its Adaptability for Small Coins.

A new use which will probably bring aluminum into greater prominence than it yet achieved is the making of coins. Investigations have been made by the government into the subject of the advisability of the use of some aluminum alloy for the minor coins such as the one cent piece and the nickel.

The greatest success is reported of the experiments made and it is believed that more decisive action will presently be taken in regard to adopting aluminum for subsidiary coins. It was at first thought that the metal would not be so well adapted to the rough usage to which it would be subjected as circulating coin, but it would seem that since the lightness of aluminum results in less friction by about three or one-half times the wear in a number of aluminum coins is much less than that of copper coins.

The alloy which has been found most effective for this purpose are said to be practically as hard as copper. Another promising employment of aluminum is for the making of the metal for the casing of an aluminum casket which will be readily understood by any one whose sad duty it may be called for to bury the remains of the deceased in a casket. In addition to lightness of construction, caskets of this metal are lasting and noncorrosive and can be hermetically sealed.

Another growing use of aluminum is for lithographic plates. In the present lithography on fluted presses from stone the plates are made of zinc and the maximum number that can be obtained. By the use of aluminum plates the number of impressions possible in a day's work is about 25,000. Aluminum is to a great extent replacing zinc and copper in the making of glazed paper, celluloid, etc. There is also a possibility in a day's work is about 25,000. Aluminum is to a great extent replacing zinc and copper in the making of glazed paper, celluloid, etc. There is also a possibility in a day's work is about 25,000.

OBJECTION TO COMPROMISE

Delegates to the Gathering at Columbus Strike a Snag.

FIGHT ON IN THE MINERS' CONVENTION. Men in Other Fields Say the Settlement Only Benefits Pennsylvania and Ohio, While They Are Left Out in the Cold.

COLUMBUS, O., Sept. 9.—The national convention of United Mine Workers has struck a snag. Among the delegates has grown a feeling that even were the strike settled, Ohio and Pennsylvania would be the beneficiaries. There are men of this belief in Illinois, Indiana, West Virginia, the first two states being practically unanimous. President Knight and Secretary Kennedy of Indiana believe a settlement on the basis proposed would adjust matters in Pennsylvania, Ohio, Indiana and eastern Illinois, but would have little or no effect in northern Illinois. These men are substantially in favor of a continuance of the strike. The delegates from Illinois and Indiana, so far as can be learned, are acting in harmony.

Certain Ohio delegates are standing by West Virginia, as a settlement without advantage to that section, from the miners' point of view, would be tantamount to the miners' union losing the ground it has gained there. Some Indiana and Illinois delegates feel that they have been made the cat's paw of the movement. They say they have time and again struck at the request of other districts, and when such districts gained what they wanted the contest would be declared off, leaving Indiana and Illinois without substantial benefit.

The Massillon delegation is numbered among those who are in the strongest opposition. They say the lowest wages they have been paid was 54 cents per ton and a settlement at the proposed Pittsburgh rate of 55 cents would only increase the Massillon rate 2 cents per ton. They want a differential of 5 cents between the Massillon and Hocking Valley fields. President Carson of Illinois says they will stay out whether the strike is settled or not.

Pittsburg made a fight today for additional delegates and it is believed that a proposition was granted. A Pittsburg delegate says a settlement will be reached. The miners' convention remained in existence for the day, but the delegates are adjourning until tomorrow morning without having taken a vote on the proposed settlement.

President Ratchford said tonight: "You may recollect that every degree of certainty that a settlement will be reached, and that the action of the national board in recommending the settlement is in the interest of the delegates are beginning to see the best thing they can do is to accept the proposition of the operators and return to work at the price offered."

EVICTING THE STRIKING MINERS. Friends Carry the Furniture Back into the Houses. PITTSBURGH, Pa., Sept. 9.—The work of evicting the striking miners at Plain Creek and Clarksville was begun today and as a result of this action serious trouble is threatened by a mob of women who are armed with clubs and base ball bats and are waiting for the arrival of Superintendent De Armit and the deputy sheriffs. At 8 o'clock this morning sixteen deputies evicted James McCabe and his family from one of the company houses at Clarksville. The furniture was offered at the time, but as soon as the house had been emptied and the furniture piled up in the middle of the street, the women gathered in front of the house and refused to allow the deputies to enter. The furniture was carried into the houses again and the miners forced an entrance to the house again and carried the furniture back. Desperate resistance was offered by the women and an attempt is made to evict the family. Three hours later the sixteen deputies arrived at Clarksville and evicted John Puke and his family. They are being held in the women's prison at Clarksville. The same tactics were reported to there after the deputies had completed their work. The furniture was carried into the houses again and the miners themselves there prepared to make trouble for the deputies if they again attempt to evict the families.

The deputies have sent for Superintendent De Armit and he is expected here at any moment. The news of his coming spread through the town and the women gathered around the houses of Puke's home. They are all armed in one way or another and are sufficiently aroused to attack the deputies as soon as they return.

Conservative Physician. Chicago Post: "I have been attending your wife," said the physician by way of introduction as he entered the office. "Yes? What do you find is the trouble with her?" asked the business man, looking up from his work. "I have been attending the physician thoroughly, fully," it is rather difficult to give it a name. "What she needs is a change of air."

"Yes, sir," said the physician, "I have been attending the physician thoroughly, fully," it is rather difficult to give it a name. "What she needs is a change of air."
