

Pulse of Western Progress.

The examination of the La Plata mountains by Prof. Lakes was an excellent thing for that district. His report showed that the country is a promising mineral region and that intelligent prospecting, followed by systematic and thorough development, would open up mines of great value. Ever since that report was made there has been a better feeling in regard to the La Platas, and it may be expected that the near future will be marked by a notable increase in work. These mountains are situated near the southwestern corner of the state, in the vicinity of Durango and near the headwaters of the Mancos and La Plata rivers. The La Plata City, which is the center of the district, is about nine miles from Hesperus, a station on the Rio Grande Southern railroad. It is about twenty-two miles from Durango. There are several different localities, some of which are reached from one railroad station and some from another. The region around La Plata City is reached from Hesperus. The East and West Mancos is more accessible from the station called Mancos, while McQuitty, Lightner Creek and the Fino are best reached from Durango. The La Plata Mines of the 9th has an extensive description of the district, giving its many different camps, special features, and the various mineral preparations of the claims of the La Plata to the favorable consideration of mining men. It shows that the district is well worth attention. Prof. Lakes' report, it seems that one trouble about the La Plata country is that it has not been systematically or thoroughly mined. Prof. Lakes' report, however, it and claims have been located, but there has been little work to really show the character of the country. This requires money, and money is not readily obtained in a locality which has not really proved itself to be of great value by the production of a large amount of mineral or the opening of high quality veins on the surface. But it may be counted upon that this will be changed in the near future.

THIS IS A LUCKY NUMBER.

The Harding Mining and Manufacturing company, "Lucky 13," is a mining company which has just discovered a gold vein as rich as Deadwood would get excited about it if Deadwood were a mining company. The vein is in the Cripple Creek and Crevice or verdant upstart like Dawson City. It was found at a depth of only a little more than 100 feet. The vein is about 100 feet wide, and out of twenty tests one has shown less than \$20 a ton. The shaft has been sunk thirteen feet into the gold-bearing rock. The vein is about 100 feet wide, and shown richer than the last. Nearly all the lucky owners of "Lucky 13" live in the western metropolis and are understood to be comparatively poor. The vein is about 100 feet wide, and out of twenty tests one has shown less than \$20 a ton. The shaft has been sunk thirteen feet into the gold-bearing rock. The vein is about 100 feet wide, and shown richer than the last. Nearly all the lucky owners of "Lucky 13" live in the western metropolis and are understood to be comparatively poor. The vein is about 100 feet wide, and out of twenty tests one has shown less than \$20 a ton. The shaft has been sunk thirteen feet into the gold-bearing rock. The vein is about 100 feet wide, and shown richer than the last. Nearly all the lucky owners of "Lucky 13" live in the western metropolis and are understood to be comparatively poor.

VILDS A PROFIT AT 45 CENTS.

Though the East Pacific mine near Winston, owned by Robert A. Bell of this city, is primarily a gold proposition, the ore, particularly in the lower workings, carries a large percentage of silver. Even so, the white metal makes a considerable difference in the profits of the property, says the Helena Independent. Mr. Bell was in the city the other day and said that the miner had been \$1 an ounce while he has been operating the property, a little more than a year he would today have \$99,000 more in the bank than when he started. "I mean a less in the way of about \$1,800 a year," he said. "I have been able to continue to operate the property for sixty days, and at least until silver gets to 45 cents an ounce. Lower than that I will not sell the ore, because it means a loss. I have been working on the property, and in addition there are fifty men leasing, so there is a force of 100 men at the mine. The work now being done on tunnel No. 4, and from the appearance of things a few feet more will strike the vein. The tunnel is driven in the full length, which will be about 200 feet. The plan is now to drive it in about 2,500 feet. If no more ore bodies are found, the mine will be closed. It is sufficient ore to run the property for two years at its present output. But if the ore comes in No. 4 tunnel that time will be considerably added to. It is estimated that the low margin by which men engaged in mining make and lose fortunes, the East Pacific is a good example. Mr. Bell took hold of the property the former owners were of the opinion that they had about worked the property out. They had lost the vein, and after spending several years of their lives, it, they said to Mr. Bell. He had an idea that the search for the vein had not been carried on in the right direction, and he ran a crosscut in the direction of the vein from that in which the former owners had prosecuted their search. He struck it at one place within thirteen feet of the vein. The miners had been working. Then he ran crosscuts at intervals all along, and in every one of them he caught the vein. All, or nearly all, of the veins were rich in silver. The East Pacific not only runs high in gold and silver, but also carries a considerable body of lead. The advance in the price of lead has given a new appearance to it, to be given to everything.

THE WATERS OF THE WEST.

The water in the Grey Bull river is lower now than was ever before known. It is getting to be a question with some about getting sufficient water with which to irrigate, and only the fact that the irrigating season is pretty well over keeps the water supply question from being a serious one. Yet, notwithstanding the fact that the water is being over water wasted after it is taken from the river to water all the land now under cultivation in the valley. One of the fastest runs ever made on Sherman hill occurred last Saturday. The feat was accomplished by Engineer Kellett, with the 943, hauling the Portland special, the new fast freight, consisting of about twenty heavily loaded cars, from the west switch at Sherman to the east switch at Laramie in exactly thirty-four minutes. This distance, which is over a steep mountain grade, was covered by the 943 in the phenomenal time of thirty-five minutes. The Monte Vista Milling and Elevator company is building another 50,000-bushel grain elevator. Ground was broken Thursday for the erection of a modern three-story brick building, to be used as a mill. Mrs. Sarah H. White of Silver Cliff has been appointed to succeed her deceased husband as county clerk. A company with a capital of \$50,000 has been organized at Fort Collins to engage in the flour rolling and grain business. The northern Colorado Produce exchange of Greeley is preparing to build or lease a warehouse for the handling of produce. The railroad entering Aspen has made an emergency rate of \$3 per ton on ore of a value of \$35 or less per ton, in order to assist the operators to continue working the mine while silver remains so low in price. This will do some good, but does not improve conditions materially. Fort Collins bankers are considering two propositions for the relief of the city against the Denver banks—the charging of 10 cents upon all checks given by Denver banks that come to Fort Collins for collection, and the withdrawal of balances from the Denver banks and transferring the same to Omaha or Kansas City. The grain harvest is now under full headway, and the various ranches east and north of Palmer lake report a crop of oats over grown in the vicinity, both as regards quantity and quality. Potatoes are an average crop, and the wheat crop is about the same. It is understood that twenty cars of steel pipe and material to be used in constructing the White Sulphur Springs water system have been ordered by the city. It is so arranged in Dorsey in a few days. No sooner had the controversy over the Davis estate been settled and all of the heirs apparently satisfied than a brand new heir named John Davis, a general, appeared at Antioch, O., who wants to know where he gets off. Dr. W. Seward Webb went into the hunting line in the Jackson Hole country the other day by relay horse, making the three days' trip in half the time. It required sixty pack mules and twelve wagons to take provisions and outfit. She is college bred. It is understood that the Montana Coal and Coke company of Horst contemplates the erection of fifty more coke ovens in order to supply the growing demand for coke. The long-headed county commissioners of Oury have turned over the maid of honor contest to the three cashiers of the banks in the county. There is a good deal of interest manifested in the purchase of land in the vicinity of the mine. Several of the large mines have favorites and the contest will wax warm between now and the closing of the market. A peculiar feature of Monday evening's storm at Fort Collins was the strong odor of onions that swept down from the west. In the vicinity of La Porte, where bell fell for two hours, the wind was blowing in one direction, and these were blown to the ground by the driving storm of hail and filled the air with an almost overpowering aroma. Everybody in the vicinity for some time imagined that his nearest neighbor was preparing to cook onions for supper. Leadville seems encouraged over the advance in the price of silver, and through the metal there is hope for small profits from the ore production. The amount of iron in the ore has more to do in the successful operation of many Leadville mines than the price of silver. The gold production of the camp from a few mines is enormous, and the estimate of the year's output run as high as \$2,000,000. The new silver mine near Rawlins holds gold and the stuff now shipping carries two ounces gold, 55 per cent iron and 15 per cent lead. In August 336 carloads of ore were shipped from Gilpin county, an increase of 134 cars over the shipments of the same month last year. Over in Clear Creek county, in the vicinity of Idaho Springs, the same situation exists. New mills are going up and new properties becoming known as shippers. A new Chicago syndicate has secured control of the European mine on Season mountain and is preparing to operate it. Ore from the Gold Medal recently obtained \$5,000 to the ton. It was found in a new lower level, and sparkles with free gold.

UTAH.

There are four blind and sixteen mute children in the Idaho school. The state will appeal from Judge Stempel's ruling holding that the anti-gambling law is invalid. The cyanide mill at the Camas No. 2 mine, at Halley, is making a recovery of 90 per cent of the cyanide used. The mine is owned by Kendrick druggist is worth because he locked up a common Indian dog, which made a break for liberty through a 75 plate glass window. The placer diggings have been discovered far from Boise on the top of the lava bluffs. The gravel carries 10 cents in gold to the pan. The mine of the old Lapwai postoffice has been changed to Spaulding in honor of the pioneer missionary who located there nearly fifty years ago and planned the first fruit trees in this section of the country. Captain Hiesloe has brought into Boise a curiosity from Union county, Ore., that may prove to be an object of great interest in the scientific world. The fish is either of prehistoric times. It is a stone in the form of a human head, life size, and

received. The company commenced cutting beets on Thursday and cut in the first two hours 310 tons, which Superintendent Hays considered very fair run to commence with. The first two hours' run was made entirely from Lehi beets.

The Alamo company, which is the owner of valuable property in Carr Fork gulch, Bingham, will a meeting last week for the purpose of levying an assessment on the capital stock of the company of half a cent a share for the purpose of continuing work in the improvement of the stock industry. We are pleased to announce that the Wyoming Valley Oil company, says the Douglas Budget, which has been drilling for oil near Cheyenne under the supervision of Manager Andrew Pease, but which dented work several months ago because of inexperienced drillers and consequent trouble with both well and machinery, will resume operations at once.

The city council of Greeley is laboring with the power company trying to make a contract for lighting the city. The company agrees to furnish fifteen arc lights to light all the horse houses, city hall, etc., for the sum of \$300 per month. A petition favoring this proposition and a remonstrance were presented at the last meeting and the entire matter is now in the hands of a committee. Surveys have been completed by Assistant Engineer Davis for the Pacific for an immense reservoir west of Rawlins. The reservoir will be eight miles in circumference and will be fifty feet deep in the center. The reservoir is to be built by the Union Pacific company and will be used for furnishing a water supply for the Rawlins shops, watering live stock, irrigating purposes, etc.

THE MONTANA.

Huron is making an effort to secure land for the Cheyenne, and there is a good prospect of success. All the towns in the Black Hills have fallen woefully short of water as a consequence of the very hot weather. The Big Horn hot springs has been platted and will be fitted with the county clerk in a few days. The townsite is composed of 120 acres of land and taken from the Cheyenne reservation. The laws and lets can be filed upon as soon as the plan is filed in the county clerk's office. The Indian department has been notified of the presence of a 13-year-old white girl on the Cheyenne reservation in San Quence, who are alleged to be holding her in bondage. It is said the girl was stolen in Canada a few months ago and brought to the Sioux reservation. The great increase of stock shipments from Huron has necessitated the enlargement of the Chicago & Northwestern stock yards. From 1,200 to 1,500 head of cattle, and will be fitted up with feed and water troughs, sheds, and other conveniences. The stock yards are most conveniently arranged stock yards in the state.

Peter Couchman, Indian agent at Cheyenne, was in Aberdeen recently and stated that the Sioux are in a state of disorder among the Rosebud bend of horses on the reservation was beyond what he could stand to the point. The disease is spreading and it will be necessary to remove the stock to the state. Governor Leary at Sioux Falls has directed Attorney General Grigby to begin suit against Auditor Mayhew for the recovery of \$175 and against ex-Auditor Hippie for \$2,500, alleged shortages as shown by the report of Public Examiner Taylor. The attorney general said he would not begin action until the future hearings on the case. The public examiner has made no mistake.

The enforcement of the prohibitory law in North Dakota is being pushed by the state. The various ranches east and north of Palmer lake report a crop of oats over grown in the vicinity, both as regards quantity and quality. Potatoes are an average crop, and the wheat crop is about the same. It is understood that twenty cars of steel pipe and material to be used in constructing the White Sulphur Springs water system have been ordered by the city. It is so arranged in Dorsey in a few days. No sooner had the controversy over the Davis estate been settled and all of the heirs apparently satisfied than a brand new heir named John Davis, a general, appeared at Antioch, O., who wants to know where he gets off. Dr. W. Seward Webb went into the hunting line in the Jackson Hole country the other day by relay horse, making the three days' trip in half the time. It required sixty pack mules and twelve wagons to take provisions and outfit. She is college bred. It is understood that the Montana Coal and Coke company of Horst contemplates the erection of fifty more coke ovens in order to supply the growing demand for coke. The long-headed county commissioners of Oury have turned over the maid of honor contest to the three cashiers of the banks in the county. There is a good deal of interest manifested in the purchase of land in the vicinity of the mine. Several of the large mines have favorites and the contest will wax warm between now and the closing of the market. A peculiar feature of Monday evening's storm at Fort Collins was the strong odor of onions that swept down from the west.
