NARROW ESCAPE OF WATCHMAN'S FAMILY

Caught in the Blazing Pile and Only Able to Get Out in Their Night Clothes_Watchman Badly Burned.

The building used as a dencing pavilion. restaurant, saloco and ice house at Manhattan beach was totally destroyed by fire, which was started at 11 o'clock on Monday night. Receiver Judson, who has control of the property under orders of the district court, knew nothing of the calamity until nearly noon yesterday, when he was advised that the man who had charge of the property had been brought up from the lake suffering from severe burns,

Since the season closed this building was being filled with the perishable property of the company, and at the time of the fire all the bathing suits, the tables from the pavilion on the beach and about the grounds and a great deal of the machinery of the two steamers was stored there, in all valued at about \$1,000. In the north end of the 400 building were rooms where the watchman o'clock. who has taken care of the property during children. They retired early Monday night and were sleeping soundly when Thomas was awakened by heat and smoke in his rooom sprang out of bed and opened a side and was met by a scorehing sheet of flame that drove him back. The south and west sides of the building were in flames. Thomas aroused the other members of his family. They had no time to dress, He tarried a moment to gather up some of the valuables and when he reached the doorway he ran into a wall of flame. He was dressed only in a cotton night shirt, and this instantly blazed up around him, and before he could get out of the building was burned off him, and he was severely blistered. Several famflies are living on the island and they were attracted by the blaze and gave succor to the distressed family. Thomas was brought up town yesterday morning and is now in the

care of a physician. When Mrs. Thomas left the burning build-The loss will be in the neighborhood of \$3,000. There was no insurance.

The grocery stock of W. S. Homer, 538 Broadway, is now offered for sale in bulk for cash at a very low figure. The fixtures and other property, consisting of a scales, showcases counters and shelving, coffeemill, refrigerator, three horses, two wagons, one buggy, three sets of harness. will all be sold at reasonable prices. BOLTERS GET THE PARTY NAME.

Court Decides Middle-of-the-Ronders May Appear as Populists. DES MOINES, Sept. 21.—(Special Tele gram.)-The state election board today handed down its decision in the controversy between the rival factions of the people's party for the right to have their tickets placed on the ballot under the party name. The decision is in favor of the bolters, headed by A. W. C. Weeks. The board hands down a long opinion. It holds that the regular convention was held in due form and that that party undoubtedly had the right to use the narty name if it had chosen. But instead it saw fit to fuse with the deminations and that that party undoubtedly had the right to use the narty name if it had chosen. coracy, to adopt democratic principles, and that it would eventually startle the world nominate the same ticket as the democrats. The middle-of-the-road element was left as the company now owning the property the only exponent of the principles of the have spared reither labor nor expense in The regulars by fusing with the demparty. ocrats had forfeited the right under the law which will be in effect at the time of the election to have their ticket placed on the ballot; hence they had no use for the name. The bolters are, therefore, decided to be

entitled to use it. The attorneys for the fusion state comnittee will at once begin a certiorari pro-ceedings before the supreme court to determine the rightfulners of this decision. The Detober term, which begins soon, and there

decision as an unmitigated outrage. Name a Physician for Senator. ATLANTIC, Ia., Sept. 21.—(Special Telegram.)-The democratic state senatorial convention for the Cass-Shelby district held

here today nominated Dr. J. M. Emmert of Atlantic by acclamation. Dr. Emmert is a prominent physician. Fred White, candidate for governor on the fusion ticket, spoke here today. There was no enthusiasm and only a small attendance.

THE WEALTH OF UNION HILL

A fection of the Black Hills Desined to Startle the World.

PROGRESS OF DEVELOPMENT WORK

The Judgment of Mining Experts Sustained by Discoveries of Paying Gold Ore-Operations of , a Progressive Company,

From the Black Hills Mining Review. Mining men who of late have begun to regard the operations of the Union Hill company as being of greater moment to the general welfare of the Black Hills than any other one enterprise, are very near the truth. While it has asked fewer favors than is the rule with outside investors, the Union Hill company has identified more eastern capital and taken greater practical interest in the

development of the remarkable resources of this country than any previous combination of capitalists and if their rewards now promise to be proportionately great, it should be a subject for rejoicing, A farmer named Costello reported to the and not jealousy, by the communities they drawn from the bins through chutes into the solice yesterday that a new wagon bed had are benefitting. Including their heavy ingreat sums required for the new enterorises which are being constanuy different points in their splendid possessions. For instance, they have now a new stamp mill at Galena well along toward completion. which wil cost \$200,000 and include the best and most expensive machinery made. are to be 180 stamps-the second larges And they have begun operation at the righ end of things, for while as much as \$300,000 has been expended in development work and district during the past year, they have demonstrated the value of all the hundreds of claims bought and proved the merits of their mines before they built their costly mills. Although there are many other propositions in the Union Hill company's list of ularly for operation on the wonderful streak of high grade ore here gave as high and work has already begin or the streak of high grade ore here gave as high for the streak of high grade ore here gave as high as \$442 to the ton mines that will and work has already begun on the grade for a narrow gauge railroad between this mountain and the mill, a distance of about two miles. In a recent exhaustive article on this subject the Deadwood Dally Independent described this new stamp mill as

follows: "The mill is constructed on the plan known as a double mill, with one large ore in in the center running the entire length of the main mill building, which is 150 feet in length, and on each side of this ore bin, and running parallel with it is a row of ninety stamps, making in all 180 stamps. The foundations for this ore bin are all built and the sills laid in place, and the main bin is now under course of construction. The bin will be twenty-two feet wide and twentyfive feet high and will have a capacity of more than 1,000 tons of crushed ore, which amount will be kept constantly on hand to use in case of shipments being delayed from the mines during snow storms of accidents. The ore passes automatically from the bin the stamps, making thirty-six automatic selffeeders in all. The stamps are of the latest improved pattern, and the mortars are known as the Homestake pattern, which are similar the latest improved mortars adopted by the Homestake company at Lead, after experimenting with different styles for nearly four tons of hard ore every twenty four hours. The pulp will pass from the mortars onto oot of surface. Those plates will be amalgamated with quicksilver, which catches all smelted at a profit of from \$1.50 to \$3 per the free gold contained in the ore. After ton when transportation facilities are compassing over those plates the pulp then pleted and the Edgement smelter in operapasses with the water used for crushing, on to the concentrators. One of those concentrating machines will be used for each five stamps. All the values in the ore which is not free gold will be saved with those conpany, that its stockholders could combine DES MOINES. Sept. 21.—(Special Telegram.)—State Auditor McCarthy today issued his annual record to the legislature on the concentrates contained in the ore from of three in the number of savings, and an ing, for concentrators, are each forty feet increase of five in the number of state banks. rooms are already constructed and the roof now being finished. The engine room and boiler house are in close connection with the main mill buildings, the size of engine room being 31x122 feet, and the boiler house 40x75 feet. The steam producing plant will be composed of six bollers, each having a Hon, Robert E. Pattison, Philadelphia; Hon. capacity of eighty horse power. The power Benjamin Butterworth, Washington, D. C.; will be supplied by 500 horse power Corlist Hon. Thomas Bradley, Philadelphia; William condensing engine, and a 100 horse power K. Kurtz, "Investments," New York; Franengine, the former to be used to operate the stamps, the latter to operate the machine

shop, fans for blacksmith shop and electric light plant. The machinery is now being delivered at the mill daily, and several carcloser at the mill daily, and several earloads are at Pluma awaiting transportation.

"Hon, Robert H. Lilly, the well known mining expert and mill builder is to about the names of such many at the names of such many are in the name are ing expert and mill builder, is in charge of the construction work of the stamp mill. It was Mr. Lilly who built the Kildonan plant at Pluma in 1895, which at that time was the best and most complete plant of its machinery for the entire mill."

Union Hill is a mountain that has been

tain of free-milling ore that could employ thousands of stamps for ages to come. In thousands of stamps for ages to come. In phia—and others of equal financial strength many places it out-assays the Homestake and acute business foresight. it bears every indication of equality inex-haustible extent. Sam McMaster, whom every mining man in the country remem-bers as the "father of the Homestake," made frequent efforts during his lifetime to se cure possession of the Union Hill ground owned by William Fagan, and he al-Due depositors 45,442,884 16
Due banks and others 330,732 58

T refused \$75,000 for two of the claims, asking and holding for \$100,000. It was this ground that was first secured by Francis C. Grable and his wealthy eastern associates, and it has been the nucleus around which has since grown one of the most promising mineral estates in the known world, embracing some 2,000 acres and including over 300 well defined mines among which are silver propositions that will be of incalculable value if the prices

demonstrating the accuracy of Prof. Jency's judgment. A year ago they began at the spex of the mountain and sank a double-compartain tain and sank a double-compart-ment shaft 350 feet and continued down 300 feet further with diamend drills, every inch of the distance in paying ore. Then work was begun in earnest on the Hoodoo tunnel, 1,500 feet east from Union Hill shaft on the same property, and as much as \$65,-000 has since been expended in development work at this point. A three-compartment shaft is being sunk here which will be conlil be a vigorous legal contest on the questions involved. The fusionists denounce the cut and drifts run at each 100-foot level, and stopes opened up in a manner similar to the workings of the Homestake at Lead City, which has proven to be the most successful known method of mining. The ore from the upper workings, which are above this shaft, will be delivered through the Hoodoo tunnel, which is now in over 500 feet and is being pushed to intersect the Union Hill shaft and is to be continued through the mountain, a distance of 3,000 feet. An open cut has been run at a short distance from the shaft, where a mammoth

has kept the old Florence 20-stamp mill run-ning for months, product its high value by the most thorough team possible. While the writer was at the Hoodoo the workmen removed the tramway ranning into the open cut, and in doing so unsovered still another vertical vein with well defined slate walls, which averaged over ten feet in width and indicated from pan tests values of \$15 to \$30 per ton in free gold, some of

it as coarse as pin heads,
In the belt of territory reaching from
Union Hill to Galena town a series of parallel veins occur as on the Hoodoo, which are traceable from surface indications the entire distance to Bare Butte creek, where a dip under the formation takes place. Among this company's properties on which these veins are opened up in different places are, beside the Hoodoo, the Calumet Nos. 1, 2 and 3, the Gold Bug and the

In addition to the Hoodoo's equipment of modern mining machinery workmen were engaged in putting in position four large collers, one double drum hoisting engine of the Lidgerwood make—the capacity of each drum being 650 feet—one large air compressor (Ingersoll-Sergeant) with capacity to operate ten drills and one pump. A large rock crushing plant consisting a 200 horse-power engine and two No. Gates styled crushers and a large fan for blowing ore in the workings of the mines where air drills will not be in use. The ore when taken from the mines will be dumped into the large crushers, then drop down into large storage bins, then

Galena. There are six claims in the Union Hill group and seven in Pyritic group, all well explored, free-milling propositions, which will provide for the continuous operation of the stamp mill indefinitely and assure the future business prosperity of Galena. Great pains and good judgment has also been exercised in making provision for the large smelter being built by this company at Edgement. Although the representatives on the ground have purchased lavishly during the past fifteen months, there is not a claim tested and classified for future work. The big Colletta group of thirty-four claims furnishes inexhaustible bodies of lead carbonates and iron ores with values all the way from \$10 to \$60 and carrying sufficient flux to flux itself. The ores in this district are said to closely resemble the famous Yellow Creek district.

The Black Prince group lies three miles southeast of Galena near the Colletta group. ries a large amout of lead. There are also large bodies of iron ore in the Black Prince group, showing as much as 60 per cent iron in places. Work in the branch mint and Florence mines on Florence mountain, a few yards back from the stamp mill, has progressed steadily. The branch mint is a well-developed mine with 400 feet of tunnel, and is on the same vein and contact as the Richmond. It has recently produced ore yielding as hight as \$148 to the ton. The rence mine has 650 feet of tunnel and plenty of ore in sight, some of which has run \$368 in gold and silver. From these mines all the fluxing materials needed at the smelter will be supplied. The Old Sitting Bull-Richmond mine is prominent among the big company's possessions and is in better shape for profitable working today than ever before in its history. The mile or more of its splendid tunnels are in perfect order a force of miners having been steadily em-ployed during the past year taking out ore and making needful preparations for extensive future work. Some of the ore has been smelted at the old smelter on the ground and some of it shipped at a profit, but of it has been stored awaiting the completion of the company's smelter at Edgement. All Black Hills readers are familiar with the history of this property, and rememtwenty years. With these improved mortars ber that during the Davy regime it furthe crushing capacity of each stamp is about nished dividends not far short of \$1,000,000, before the extravagance of dissipated man-agers and the expenses of protracted litigaopper plates, which are electro-silver plated. | tion compelled a suspension of operations.

There is in the neighborhood of 300,000 tons. of ore on the old waste dump that will be

tion.

It is claimed by disinterested people, who their wealth and buy and operate all the mines in the Black Hills, and that the list embraces the "cream of the financial world." The organization of the company was effected by Francis C. Grable, in February, 1896, with the following list of capitalists as officers and directors: President, R. E. Pattison, president Security Trust company of Philadelphia, and for eight years governor of Pennsylvania, vice president, Hon. Benjamin Butterworth of Washington, D. C., lawyer and capitalist, and for over thirteen years cis C. Grable, president State bank of machine ford; Russell L. Hall, president First Na tional bank, New Cansan, Conn.; William Archer, contractor and builder, New York Andrews, manufacturer and investor, York City; Joseph F. Crater, Easton, Pa. John Dawson, contractor and builder New York City; Philip S. Hortz, with Southwark National bank of Philadelphia; David Jones kind in the world. Fraser & Chalmers of Chicago have the contract for supplying the machinery for the entire mill."

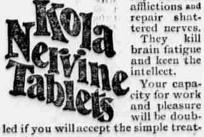

The supplying the machinery for the entire mill. That has been supplying the machinery for the entire mill. The supplying that has been supplying the machinery for the entire mill. The supplying that has been supplying the supplying th tested by every art that experience could suggest and unlimited capital could provide, and it has been demonstrated to be a mountain of free-milling ore that could provide.

lee, of the Corn Exchange bank of Ph CORPORATIONS AMALGAMATE. The stockholders in the many extensive industrial enterprises which have drawn at-tention toward the beautiful new city of Edgement during the past few years, bein many of them equally interested gigantic mining operations inaugurated by Figures C. Grable, a consolidation of interupon. Such an amalgamation was effected at Philadelphia on August 17, under the new name of the Edgement Smelting and Union Hill company. The capital stock of the new company is \$6,000,000, and the plans for future operations are correspondingly enlarged. Already a half million dollars have been expended in the vicinity of Edgemont n public improvements, and it is hardly pos

vein has been uncovered, ore from which sible to over-estimate the possibilities of this DIRECT EVIDENCE ALL IN company's future operations in that locality as well as in the mining districts of the corthern hills. Over forty miles of irrigating canals, with more than 100 miles of lateral ditches, have transformed between 20,000 and 25,000 acres of desert land into the most pro ductive farm acres, and new projects of the same character, which are now on foot are of still greater magnitude. According to

plans for a new system of irriga-tion, which is now under way, one stowage reservoir will consist of 540 acres with water to a depth of eighteen feet. In the system now complete there are four storage basins, one of which covers 160 acres and contains an average of twenty of water. One hundred thousand dollars will be expended in the new system this fall Edgement is a natural manufacturing point and the extersive sheep-grazing districts of Wyoming, which are near at hand, guarantee a perpetual supply of working material for the large woolen mills built by the Edgemont company. The finest grindstones it the world are produced at their factory, the quarry yielding the stone is said to be wonderful in the extent and quality of its products. Inexhaustible beds of from ore in close proximity of the town will supply ance of the peculiar sand required by glass blowers. This junction of the B. &. M. road is but a short distance from the great Cambria coal fields of Wyoming, which fact as-gures an abundance of cheap fuel for the operation of smelters and factories. As was demonstrated in an article in last week's Mining Review, there are hundreds of thoudifferent developed sections of the Black Hills much of which can be profitably worked at the new smelter at Edgement, but is of too low grade to permit of the long freight haul to eastern smelters. tom mill of moderate charges the modern affair of the Edgement company will be the means of opening up many of the districts which are now practically lide, and while it cannot fail of adding to the dividends of the Edgement and Union Hill Smelting company, it comes as a Godsend to countless small mine operators in the Black Hills.

with splendid stone buildings, perfectly paved streets and exquisitely planned artificial lakes and handsome parks.

Mining Notes. A new hoist has been erected at the Edge mont and Union Hill Smeltery company's stamp mill to facilitate the raising of the heavy timbers.

The old Davy residence, office and laboratory at Galena have been rebuilt and repaired, and the Union Hill company are entertaining more distinguished visitors this summer than ever came to the Black Hills before during one season.

The Deadwood Daily Pioneer-Times says "A rich body of free-milling ore recently struck on the Hoodoo property. The vein is twelve feet wide and a vertical, lying between perphyry and slate walls. By pan tests the ere shows a value of \$30 per ton. free-milling. Development work is shaft on the May is being sunk in low grade ore. A crosscut tunnel is being run from the Hoodoo tunnel to the May shaft to open some ore bodies between. Work at the new mill is going along rapidly

and the company's prospects are very bright. Fires of a Day. EVANSVILLE, Ind., Sept. 21.-The commission and produce house of A. PRISONER'S ATTITUDE TOWARD H'S WIFE

Mrs. Johnson Testifies to Seeing Sausage Maker Chase His Better Half with Revolver Defense Promises Sensation.

CHICAGO, Sept. 21.-The direct evidence n the Luctgert case is in and the state has losed. Shortly after 2 o'clock this afteroon the last witness of the prosecution was son. She came into court, supported by Captain Herman Schuettler, of the Sheffield time the body nourished and sustained. Avenue police station. Mrs. Johnson has been ill for several weeks and the prosecu- the secret of the uniform success of Stuart's tion feared the woman would not be able to Dyspensia Tablets. This is a comparatively appear to testify. Her evidence was imporant as showing Lucigert's attitude toward his wife. A carriage was sent to her home on the North Side and Mrs. Johnson made the trip to the court house attended by a friend. the criminal court building and almost fainted at the elevator leading to Judge Tuthill's court room. When sworn, Mrs. Johnson testified that upon one occasion she saw nome. The big sausage maker, the witness said, was armed with a revolver. ais wife names and threatened to shoot, but did not. Ex-Judge Vincent did not cross-examine the witness. When she left the stand States Attorney Dencen said: "If the court please, the states rests."

There was a general movement in the crowded room as the spectators glanced toward Luetwert and his counsel. Luctgert leaned forward and whispered to ex-Judg-Va cent. The latter arcse and made a formal motion that the case be taken from the jury on the ground that the state had failed to make out a case. Judge Tuthill promptly overruled the motion without argument Then ex-Judge Vincent stated that owing to the lateness of the hour he would like to postpone his opening address to the jury until tomorrow morning. There was no ob jection and an adjournment was taken It required just twenty days for the pres

entation of the evidence of the presecution Ex-Judge Vincent said tonight the defens would present its side of the case in just half that time. "My address to the jury n opening will be short and directly to the oint," he said. "We deny the murder; the oint." corpus delecti has not beg; proved as the law requires. This fact cannot be assumed nor inferred from such testimony as has been presented here. We will explain away at the cyldence brought out here by the police department after months of bavestigation and manipulation. I do not care to give out full our defense until we get started, but promise some startling developments before we are through." SCORES A POINT.

Frank Bialk, the aged watchman at the metgert sausage factory, who, besides watch ing the premises at night, kept fires burning in the furnaces, was the first witness to be called this morning to show motive. He say that Mary Slemmering paid frequent visit to Luctgert at the latter's office in the saucas factory at night. Luetgert, because of h unpleasant domestic affairs, had a bed place a small small room just and slept there. office the witness remembered & Hard of this city was destroyed by fire early this morning together with its car shed fore May 1 the date of the disappearance

and stables. The loss will reach \$25,000, of of Mrs. Lucigert. It was 9:30 o'clock in the which \$10,000 is covered by insurance.

retired to the bedroom and closed the door.

The witness said that Mary Siemmering
visited Luetgert on an average of three by Kennedy and Warner at Beaver Meadow, visited Luetgert on an average of three four miles from here, was burned to the nights each week for months before Mrs. Luetgert disappeared. This had been going on for three or four years before May 1 o about \$50,000.

COLUMBUS, Ga., Sept. 21.—The lumber witness said Luctgert called him about 10 yard, sash, blind and door factory of Butts & Cooper, together with the Southern rail-Mary as Luctgert said he was ill. Bialk read's freight depot, burned last night. Two entered through a window and went

Frank Odorofsky testified to substantially

A TALK WITH MRS. PINKHAM

About the Cause of Anemia.

Everybody comes into this world with a predisposition to disease of some particular tissue; in other words, everybody has a weak spot. In ninety-nine cases out of a hundred the weak spot in women is somewhere in the uterine system. The uterine organs have less resistance to disease than the vital organs; that's why they give out the soonest Not more than one woman in a hundred-

nay, in five hundred-has perfectly healthy organs of generation. This points to the stern necessity of helping one's self just as soon as the life powers seem to be on the wane.

Excessive menstruation is a sign of physical weakness and want of tone in the uterine organs. It saps the strength away and produces anemia (blood turns to water).

If you become anemic, there is no knowing what will happen. If your gums and the inside of your lips and inside your eyelids look pale in color, you are in a dangerous way and must stop that drain on your powers. Why not build up on a generous, uplifting tonic, like Lydia E. Pinkham's Vegetable Compound?

MRS. EDWIN EHRIG, 413 Church St., Bethlehem, Pa., says: "I feel it my duty to write and tell you that I am better than I have been for four years. I used Lydia E. Pinkham's Vegetable Compound, one package of Sanative Wash, one box of Liver Pills, and can say that I am perfectly cured. "Doctors did not help me any. I should have been in my grave by this time if it had not been for your

medicine. It was a godsend to me. I was troubled with excessive menstruation, which caused womb trouble, and I was obliged to remain in bed for six weeks. Mrs. / Pinkham's medicine was recommended to me, and, after using it a short time, was troubled no more with flooding. I also had severe

pain in my kidneys. This, also, I have no more. I shall always recommend the Compound, for it has cured me, and it will cure others. I would like to have you publish this letter." (In such cases the dry form of Compound should be used.)

BOON TO WOMEN.

NEW MEDICAL DISCOVERY.

A Positive Cure for Dyspepsia. This may read as though we were putting It a little strong because it is generally thought by the majority of people that dyepepsia in its chronic form is incurable, or practically so. But we have long since shows that dysprosia is curable, nor is it such a

difficult mater as at first appears. The trouble with dyspeptics is that they are continually dieting, starving themselves, or going to opposite extremes or else deluging the already over-burdened stomach with "bitters," "after dinner pills," etc., which invariably increase the difficulty, even if in some cases they do give a slight temporary relief. Such treatment of the stemach simply makes matters worse. What the stomach heard. This witness was Mrs. Louise John- wants is a rest. Now how can the stomach become rested, recuperated and at the same

This is the great secret and this is also new remedy, but its success and popularity leaves no doubt as to its merits.

The tablets will digest the food anyway,

regardless of condition of stomach. The sufferer from dyspepsia according to She was quite exhausted when she reached directions is to cat an abundance of good, wholesome food and use the tablets before and after each meal and the result will be that the food will be digested, no matter how bad your dyspepsia may be, because, Luetgert in a rage chase his wife out of their as before stated, the tablets will digest the food place it in a temperature of 98 de-To illustrate our meaning plainly, if you take 1,800 grains of meat, eggs or ordinary food and place it in atemperature of 98 degrees and put with it one of Stoart's Dyspepsia Tablets it will digest the meat or eggs almost as perfectly as if the meat was enclosed within the stomach.

> The stomach may be ever so weak yet these tablets will perform the work of digestion and the body and brain will be properly nourished and at the same time radical. asting cure of dyspepsia wil be made because the much abused stomach will be given, to some extent, a much needed rest, Your drugglet will tell you that of the many remedies advertised to cure dyspepsia, none f them has given so complete and general satisfaction as Stuart's Dyspepsia Tablets and not least in importance in these hard times is the fact that they are also the cheapest and give the most good for the A little book on cause at I cure of stomach
