Manawa Company is Much Worried and May Abandon the Exposition Line\_Bridge Company Shows No Sign of Disonictude.

ALLEGE THERE ARE MANY DEFECTS

Spencer Smith and a couple of other attorneys, who have led in the opposition to the motor company franchise and who did not withdraw their opposition when the other members of the citizens' committee concluded to do so, were reported yesterday to have prepared the papers in a suit which will be fried in the district court attacking the legality of the franchises as they came from the hands of the council and the mayor. It was expected that the papers would be filed last evening, but nothing had been seen of them around the office of the clerk of the district court when business closed for the day. The attorneys alluded to yesterday informed their friends that they had that would annual them. The nature of these defects was not pointed out, but it was intimated that the first publication in a special edition of the official paper a few minutes before midnight on the lest day of September just before the new corporation went into effect was one of them

The proposed legal attack upon their or-nance has caused considerable worry to the Manawa people, for any proceedings of the nature contemplated would serve to cast a cloud on the bonds the company proposes to issue that would make the bonds discuit of negotiation. Mr. De Long of the East Omaha end of the company spent the entire after-noon here yesterday in consultation with C. R. Hannan and others concerning the matter. Mr. Hannan was favorable to the scheme of submitting the matter to the electors at the coming fall election, but Mr. De Long states that the delay would render it impossible ofr his company to the work contemplated in the shortened time made necessary by such an election. He declared that rather than do so his company would abandon the whole en-terprise; that it was necessary to get to work at once if the line was to be completed in time to be of any service in carrying exposition passengers. He was very positive in all of his declarations and returned home leaving the whole matter in considerable The attorneys for the company are confident that no proceedings that may be instituted in court will have any ultimate effect upon the legality of the ordinance,

At the poor farm mine the strikers marched again and found that the negroe who have been imported to work there had been armed with revolvers, which they brandished and threatened to use if the marchers continued. The strikers charge that while the operators are trying to make appear that the strikers have been guilty of first violence, the truth is that they, the operators, have made the first move of the kind by arming their men. The men further declare that they have made greater gains today than on any pre-

## CAUSE AND CURE OF HOG CHOLERA

Success Attends Efforts of Railroads

to Prevent Its Ravages. DUBUQUE, Ia., Oct. 4.—The Chicago, Milwaukee & St. Paul and Chicago, Burlington & Quincy railway companies are still experimenting with a view to checking hogcholera which has been so seriously decimating the herds along their lines as to reduce the shipments materially. That success has attended their efforts is shown by letters from scores of farmers and hog raisers who have followed the advice and used the remedies recommended by the agents of the railroad companies. One of the most active agents in the effort to lessen the death rate of hogs is F. J. Clemens, division freight agent of the Chicago, Milwaukee & St whose headquarters is at Dubuque. He said today: "A thorough investigation, nade at various points into the cause of hog cholera leads me to believe that the disease s caused mainly by irregular and improper feeding. The disease is more prevalent in the fall when farmers commence to gather the animals for market than at any other ime. Hogs are then taken from the pasture, crowded into pens and permitted to gorge themselves with grain. If care were taken in changing from one grain to another and in the quantity and given at regular times. believe that what is called hog cholera would be prevented." The Chicago, Milwaukee & St. Paul expert is on the road all the time advising farmers and endeavoring to demonstrate experimentally that hog cholera is not caused by a germ, as is popularly sup-
