Long Fall Drouth Broken in Eastern Nebraska.

WILL HELP CUT THE WINTER WHEAT

Grain Sown Gets Much Benefit from the Slight Precipitation\_Plowing Will Also Be Greatly Assisted.

NEBRASKA CITY, Oct. 10 .- (Special.)-The protracted drouth extending over a period of nearly two months ended today, A steady drizzling rain set in early this morning and continued throughout the day. Every drop was absorbed by the earth Seeding, toward which practically nothing has been done, will now be pushed forward. Pastures and meadows are past relief.

FREMONT, Neb., Oct. 10,-(Special.)-The first rain of any consequence this vicinity has had for two months fell last night and this forenoon. The total precipitation was quarter of an inch. It laid the dust in good shape and will be of some help to iter wheat. Farmers are beginning to fusion majority of about 175 will be overhusk their corn. The quality is first class, but the average yield is only thirty to thirty-

SYRACUSE, Neb., Oct. 19.—(Special Telegram.)-A gentle rain has fallen all day

WAHOO, Neb., Oct. 19 .- (Special.) -- Rain began to fall at this point this morning about 3 o'clock and a gentle shower has continued all day. Not a drop has been wasted, but all is absorbed by the parched earth. The rain seemed to have been general all over this county and there seems to be no prospect of let up this evening. It has been many weeks since Saunders county has had a good soaking, but in the face of the continuous drouth the farmers' faith has been strong in the promise of a seed time and harvest and the result is that many thousand acres of small grain, especially winter wheat, bas been sown and the present rain, though a little tardy in coming, has put the crop in for the winter. The corn crop is all out of the way of frost, and while the yield will not be so large as in former years the quality is much better.

DAVID CITY, Neb., Oct. 10.—(Special.)— There was a light frost here last night. Today has been cool and cloudy with a slight sprinkle of rain at times. EDUCATION DAY AT WILSONVILLE

Interesting Proceedings as Part of the Harvest Home Festival.

WILSONVILLE, Neb., Oct. 10 .- (Special.)-At the Beaver Valley Harvest Home exposition held last week at Wilsonville, Thursdaywas set apart as "Education Day." After a campure and speeches by Tom Majors and others in the morning, the meeting was sturned over to the teachers and pupils present, Ira F. Doling, county suprerintendent of Furnas county, was made chairman and I. C. Moore of Tyrone was appointed secretary. Then followed a well rendered program by the Wilsonville High school, led by Prof. J. T. Morris. Among the features were the following: Recitations by Frank Parker, Foster Ambier and Misses Gretchen Campbell, Lila Newell, Edna Downing, Blanche Austin, Fay Hosteiter, Grace Thomp-son and Elsie Phillips. A solo of unusual merit was rendered by Miss Ada Phillips.

After a brief address by Chairman Doling e introduced State Superintendent W. R. Jackson, who spoke on the subject "The Best Education for the Masses." "Less than 4 per cent of our children reach the high school," he said. "Hence the importance of our common school work." He said he was s'ad we have high schools, as those who go out from them will be sure to raise the standard. While we have good work in our high schools and in our state university, our great need today is a greater efficiency in our common schools. This on the principle of the greatest good to the greatest number. He commended the flag on the school houses as inculcating patriotism. Among errors in education "eramming" was cited. We do not want this, but rather to train and discipline the mind. We do not want or need that our children should become "walking encycloin electricity and electrical appliances but claimed equally great advances in meth-eds of education. After speaking well of the the most of any day this year. educational work of the Woman's Christian Temperance union and the benefit derived from school libraries, he gave statistics showing the superiority of our school system over that of other states and closed with a glowing tribute to the people who were so bearing the butdens of self-imposed taxation in support of the grandest system of education the world has ever known.

The chairman then introduced Chancellor

George E. MacLean of the University of Nebraska, who, by special request, spoke on the subject, "Culture and Agriculture." After congratulating the people on the fact that it is becoming quite common in all fairs, expositions and gatherings like thi a day set apart for education, he proceeded to show that the Anglo-Saxons were, from earliest times, a cultured peo-ple. The word "Aryan," as applied to the Aryan race he said, has a like derivation to "arable," meaning the "cultured" or to "arable," meaning the "cultured" or "plowed people." He quoted an author who defined "culture" to mean sympathy with intelligence. He spoke of the departments in the State university devoted to agricul-ture and the mechanic arts. "We praise labor as the only true mark of nobility." Have we learned to apply the principles and inventions of science to agriculture? Have we learned to diversify the products farm? INCREASING RAILROAD BUSINESS.

Shipments Much Heavier Than They W. A. Scott, general manager of the Chicago, St. Paul, Minneapolis & Omaha railway, while in the city from St. Paul, gave most encouraging report of the increase of business along the line under his control.

In an interview he said: "Our business is splendid all along the line. It has increased immensely since last year. This increase is in both the freight and the passen-ger traffic. For several months our grain business has been very heavy and it is in creasing in volume now. Most of our grain going to Minneapolis and to Duluth for eastern shipment. The wheat of the Do-kotas and of Minnesota has helped to swell our business to the point where it is today 'The movement of merchandise along the

Omaha road is much heavier than it was last year, indicating that the people along the line have more money to buy with than they had this time last year. There is more lum ber moving today than I have known many years. Large quantities of building stone are also being shipped. The large ship-ments of both lumber and stone plainly show the effect of good times, for there is evident a general desire to build.
"I find the Omaha road in good condition.

The heavy traffic is giving work to more train crews than have been employed for a long time. The road and the equipment are being well kept up, and everything seems to be moving along smoothly. A trip over the line and a comparison of the freight and passenger traffic of today with that of one year ago will convince any one of the return of prosperity, at least to the portion of the west in which our railroad operates."

A type of dengue fever has existed at Galveston for the past sixty days. There have been 5,000 cases of dengue and not a single death. A meeting of citizens of Galveston has been called for Monday morning for the purpose of asking Dr. Wyman to keep Dr. Gulteras here until he has had time to report fully on all suspicious cases. Galveston was somewhat excited Saturday night, but today the city was quiet. Santa Fe is the only road open. All other roads were cut off last night before anyone could get out of town. The Santa Fe took out seventy-five persons last night and 117 departed on today's train. Forty-two people are booked for New York by steamer Mon-day and forty people have left by boat for J. H. Weaver of Philadelphia is stopping Bay Shore points. This constitutes the total gira from here. The citizens claim if these four cases are yellow fever thea thousands of citizens have had it, as they have had similar sickness.

WASHINGTON, Oct. 10.—Last night Surgeon General Wyman of the marine hospital service received a brief dispatch from Dr. John Guiteras, the yellow fever expert, informing him of the appearance of the disease in Galveston, Tex. The dispatch was as follows:

"Five cases of yellow fever now here, Three more have been. Will report to local authorities. I do not apprehend serious trouble here, but dengue causes much confusion."

Dr. Wyman has been in communication with Dr. Fisher of Galveston and with State Officer Swearingen and has been advised that all necessary precautions have been taken to prevent the spread of the disease. The officials of the Marine Hospital service have known for several weeks of the existence. cials of the Marine Hospital service have known for several weeks of the existence of considerable dengue fever at Galveston but they decline to express any opinion o the development of the yellow fever at that place.
